COMPRESSED BAMBOO MOCHA

COMPRESSED BAMBOO FRENCH BLEED

COMPRESSED BAMBOO NATURAL

BAMBOO' STORY

Mao Bamboo is one of the hundreds of bamboo species, it is tall and straight, is perfect for making into various products.

COMPRESSED BAMBOO COFFEE

GREEN & SUSTAINABLE

Strong, durable and most importantly, elegantly beautiful, bamboo is a versatile and totally sustainable product, so fast growing that it replaces itself within 6 years. The Environmental Bamboo Foundation states that bamboo reduces carbon dioxide gases; a grove can release 35 percent more oxygen into the air than a similar-sized plot of trees.

STRENGTH & DURABILITY

Bamboo is harder than Red Oak, Ash, Maple or Beech, with a tensile strength that rivals steel and weight-to-strength ratio surpassing that of graphite.

DIY UNICLIC LOCK

It is easier to install with infinitely less risk of cupping or warping unlike the glue down process, if any damage occurs, it is easier to replace those damaged boards.

STAIRCASE

Bamboo staircase can be match the same colour as your bamboo flooring. The bamboo nosing is ready and come with Uniclic lock system. It will perfect to lock the flooring without gaps.

PANEL SIZE: 1850 x 135 x 14mm

20 Year warranty for material structural integrity
