What makes a kitchen?

The kitchen you opt for will last you for 15 years or more. So put time and thought into your purchase – don't just focus on aesthetics. It's the cabinetry hardware that makes a kitchen practical. We've been analysing kitchen users' needs for years and are always coming up with innovative solutions for a better quality of living. That's our job.

What you should look out for

Ergonomics, storage, motion and design; these four essential requirements have been identified by Blum's Research Department.

Ergonomics – As smooth as clockwork

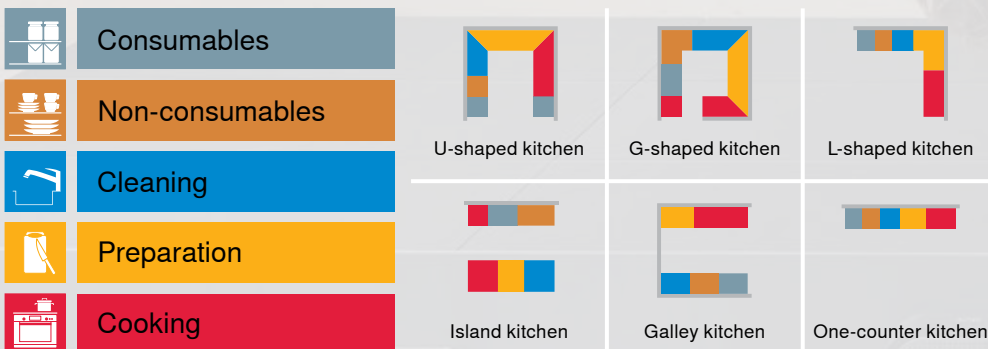

Kitchen tasks can be a piece of cake. Clearing away shopping. Laying the table. Unloading the dishwasher and naturally, cooking. Meal preparation and clean-up are daily recurring activities. To make your life easier, ask yourself what your habits are right from the start when planning your kitchen.

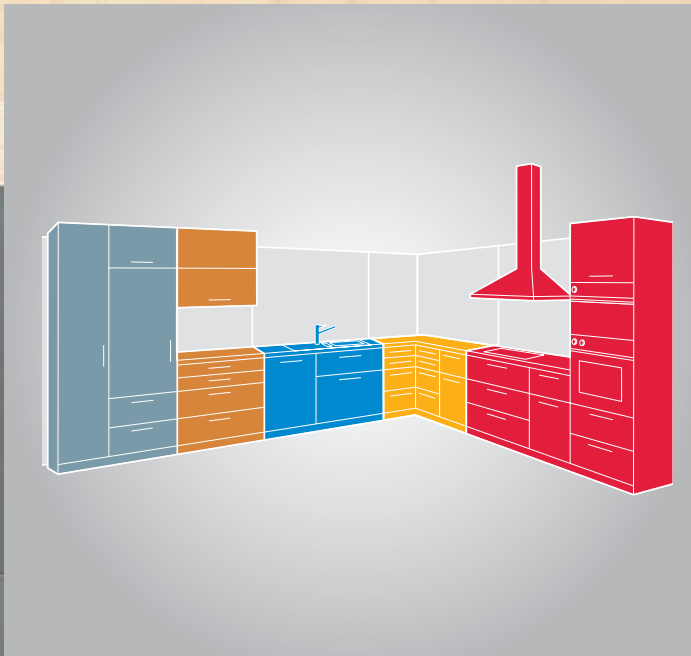

www.blum.com/ideas1

Ergonomic inspiration for your kitchen

For right-handed people, the 5 zones should be arranged clockwise. If you're left-handed, it's the other way around.

5 kitchen zones

Kitchens can be divided into 5 work areas or 'zones' to cater to typical tasks. This means that you can keep everything exactly where you need it, shortening distances and saving you valuable time.

Use lift systems and drawers instead of doors

Make your kitchen ergonomic: Use full extension drawers and pull-outs. They give you clear visibility and easy access to contents. No more hunting for things!

Practical inner dividing systems

Nice and tidy. Flexible inner dividing systems ensure that cooking utensils, cutlery, odds and ends or provisions are immediately at hand.

Storage – Everything exactly where it should be

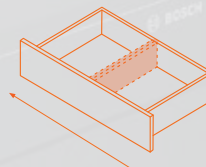

You can never have too much storage, especially when it comes to kitchens. What to do if the floor plan is small? Use every inch available and create extra space! It's easy with clever cabinet solutions.

www.blum.com/ideas1

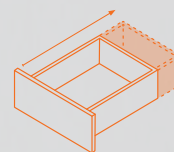

blum

Inspiration for more storage space

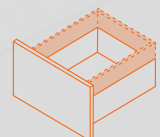

up to **+15%** with wider units

up to **+30%** with deeper drawers

up to **+55%** with higher side panels

Extra space

Create unexpected space!
A special sink pull-out makes full use of the space around the sink.

Customised storage space

The SPACE TOWER pantry unit can be tailored to your personal needs. Ideal for singles and large families.

Corner storage space

Never before has it been so easy to use corner space. Check out the SPACE CORNER cabinet with drawers!

No leftover space

The SPACE TWIN narrow cabinet securely holds bottles, chopping boards and baking trays and keeps everything nice and tidy.

Motion – Supreme ease

Make sure your new kitchen feels good. Use wall cabinets, doors and drawers that open with ease, close softly and effortlessly. This is where top-quality fittings technology comes in. You'll feel the difference. Try it out for yourself!

Experience motion

BLUMOTION

Drawers, doors and wall cabinets close softly and effortlessly with soft-close BLUMOTION.

SERVO-DRIVE

The electrical opening support system for drawers and overhead wall cabinets is the ultimate in user convenience. That's why it's also available as a single set for your refrigerator or waste pull-out.

TIP-ON BLUMOTION

This innovative technology combines mechanical opening with soft and effortless closing for handle-less drawers.

TIP-ON

Mechanical opening system for doors and wall cabinets, to close, press shut.

One-touch opening

If you don't want handles but want enhanced opening ease, opt for an opening support system. Whether mechanical or electrical, cabinets open at a single press.

Ultimate ease

A real feel-good factor in your new kitchen: Heavily laden drawers (each weighing up to 70 kg) have a feather-light glide and open and close with ultimate ease.

Soft close

The beauty of silence in a hectic kitchen. Make sure your furniture is equipped with soft close. Some wall cabinet lift systems close softly and effortlessly at the press of a switch.

Design – Help your planner

It's a good idea to consider a few basic things in the run-up to planning. Tell your kitchen planner what your needs and requirements are so that you get what you want. There are a number of factors that can impact the design of your new kitchen.

Ideal storage place

Certain items are used more often than others. Keep those you use all the time at an easy-to-reach level. Store the items you seldom use in other areas.

Healthy posture

Apply good ergonomics and make sure the height of your kitchen worktop is right for you.

TIP

Lift systems are ideal for overhead wall cabinets. Fronts lift up and out of your way (no more hitting your head on cabinet doors).
