NOVA GRAPHITE

OUTDOOR KITCHEN

The **NOVA Graphite Outdoor Kitchen** gives you the ultimate flexibility when designing your own amazing outdoor cooking and entertaining area.

The **Gasmate NOVA Graphite Outdoor Kitchen** will take your alfresco area in a modern direction by incorporating dark stainless steel while still keeping all of the unique cooking features alfresco cooks have come to love from Gasmate.

The dark Graphite stainless blends well with stained wood decking and contrasts seamlessly with lighter colours.

It reduces the visual harshness and distinct contrast that, can at times, be the disadvantage of plain stainless steel.

One of the biggest drawbacks of traditional stainless steel is how smudges and fingerprints seem to multiply across its metallic surface, meaning extra work for you to keep it looking flawlessly clean. Graphite stainless steel, however, is much more resistant to smudges, fingerprints, streaks and water spots.

Graphite stainless steel complements many design concepts and colour schemes—largely because it “feels” a bit warmer than traditional stainless steel. Graphite stainless steel is ideal against white and grey, for a fresh, modern look. Yet the new finish also suits natural wood tones with its warmer undertones.

Graphite stainless steel is the same composition of iron, chromium, silicon, nickel and carbon that makes up traditional stainless steel products, but it has a protective coating of polymer that creates a black matte finish.

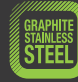

NOVA GRAPHITE BBQs

- Supplied fully assembled
- 6 Stainless Steel Burners – 12MJ/h each with individual controls
- High grade #304 stainless steel hood and exterior cabinet panels with Graphite stainless steel finish.
- Double skin hood for solid structure and better heat insulation, features temperature gauge and stylish slim cool touch handle
- 13MJ/h Ceramic rear burner for healthy rotisserie cooking with integrated high output 15MJ/h side burner. (not available on Twin Hood or Classic Built-In BBQs)
- Easy to clean, heavy duty enamel coated cast iron plate and grill, featuring an angled self-draining system which allows cooking fats and oils to run easily into the drainage channel at the front of the BBQ
- Stainless steel flame tamers for controlled heat distribution and to minimise cooking fats flaring up
- Electronic ignition for effortless lighting
- Convenient internal lights and LEDs above control knobs
- Elevated high grade #304 stainless steel cooking and warming rack
- NOVA BBQs on trolley feature a cabinet with ample storage with convenient slide-out cylinder storage and locking castors
- AGA certified to Australian Standards
- Approved for natural gas conversion
- Supplied with LPG hose and regulator

150cm LARGE WALL MOUNTED RANGEHOOD

MODEL NO: **GR1500**

120cm MEDIUM WALL MOUNTED RANGEHOOD

MODEL NO: **GR1200**

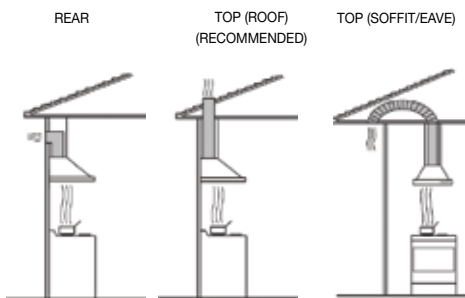

RANGEHOOD INSTALLATION

Please consider the following before commencing to install your rangehood. Your rangehood will need to be ducted to ensure it operates and complies with local and national regulations.

Duct Mounting Options

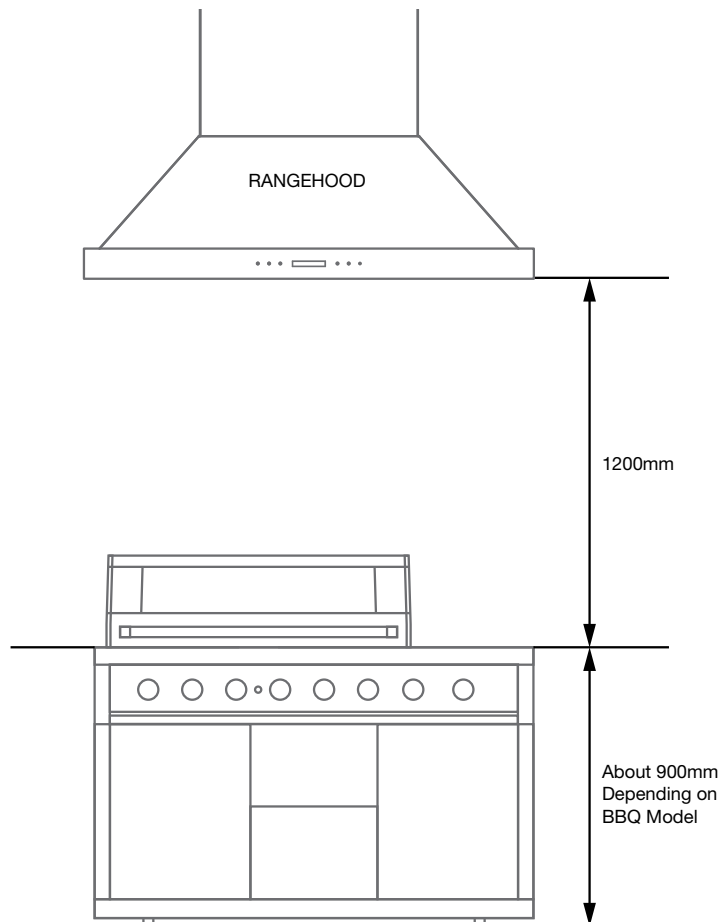

You will need some additional parts to complete these installations. All motors need to be ducted individually and the included expanding duct is 150mm diameter.

*If installing ducting at the rear or via the soffit/eave please review instruction for the reductions in ducting requirements.

The Ideal Position of the Rangehood is as follows:

1. Height above cooking surface – 1200mm
2. Distance from cooking surface to rangehood mounting bracket bottom screw hole: refer to instruction manual for exact distance.
