**CASE STUDY**

# BENT STREET RAMP ALTONA VIC

**SECTOR**

Commercial

**APPLICATOR**

Spray Pave Melbourne

**DATE**

September 2019

**PRODUCTS**

- Dulux Avista Resurfacing Primer
- Dulux Avista Resurfacing Base Compound
- Dulux Avista Colour Oxide in Cream, White and Lite Mocha
- Dulux Avista Extended Wear Sealer

**THE PROJECT**

The Bent Street Vehicle Access Ramp along the Altona and Seaholme foreshore was built to give access to the beach for the Altona Lifesaving Club, emergency services vehicles and beach grooming and seaweed collection vehicles. This freshly laid concrete needed to have a decorative concrete finish that could tolerate high foot and vehicle traffic, and have good durability. It also needed to be able to blend into the natural surrounding environment.

**THE SOLUTION**

The Dulux Avista Resurfacing System was chosen as it offers an excellent antislip finish and high durability – essential for this foreshore location and high level of vehicle and pedestrian traffic. The Resurfacing System also only needs minimal maintenance (sealing every 24 months) therefore reducing the impact of disruption to this busy public space. The Dulux Avista Resurfacing System is available in a wide range of colours, allowing a natural beach colour scheme to be selected, blending in with the surroundings.

**BENEFITS**

- Dulux Avista resurfacing products provide excellent adhesion to most concrete substrates, while being hard wearing and slip resistant, vital elements for high traffic areas.
- The Dulux Avista Colour Oxide comes in a wide range of colours to suit a variety of project locations, with options for custom finishes with flecks.
- Dulux Avista Extended Wear Sealer was used to seal the surface. This product is highly durable and is designed to protect the substrate from weathering and ingress of dirt and grime.

Before

After

Cream base with White and Lite Mocha Flecks
