## ATLANTIS PANDORA . AP

Latest addition to the Atlantis stable is a beautiful decor textured glaze inspired by the greek goddess Pandora and a blue planet. This glaze is similar in structure to Abalone both being a departure from the crustacea type finish of original Atlantis offering. These are both mature double fired complex glazes suitable for any situation or climate.

In this Catalogue we proudly present two new astonishing glazes we hope you will add to your inventory. Both glazes will grace a hotel, home or commercial application, both have the timeless maturity of times past with an elegance that demands attention. The small premium on Pandora glaze is to cover the complexity in manufacture but the result is worthwhile.

## ATLANTIS DOUBLE FIRED. AD

AVAILABLE ONLY FROM 4 SEAS.

*We are truly humbled by our own creation modelled on nature's ravages to an ancient art form. Its importance in modern decor cannot be ignored and no decor ceramic range would be complete without it. Created as the ultimate expression of a texture finish this ever-lasting recreation of the salvage from the lost city is a masterpiece not easily copied by others. Each piece has a character of its own and unlike the soft terracotta base popular in the ancient originals our artisans use earthenware clay fired to achieve frost resistance. The unique finish is now earthenware not terracotta high fired until it is frostproof. It is suitable for both hot and cold climates.*

## ATLANTIS HELIO. AH

*The latest twist in the Atlantis story suggests an ageing on ancient timbers now rare or endangered like lignum vitae or ironwood, this introduction of colour is a useful decor tool.*

## ATLANTIS VERDIGRIS. AV

*With all the best attributes of Atlantis and a base tone hinting of underlying metals and copper oxides this exciting extension to AD offers a convincing alternative.*

# WATER FEATURES

BURBLING BEAUTIES | BB

Most jars have the option to install a burbling pipe.

For those who do not have a pond where they can place the jar we offer the option to make a water feature anywhere you want.

With the terrazzo base and pedestal you can make a simple, practical and elegant water feature that can be placed under or above the ground.

The water pump and mechanism to regulate the water flow can be hidden inside the pedestal. Leaving a beautiful, restful, burbling and overflowing jar whose water appears to be disappearing into the ground.

# RIVERSTONE

'River Stone' is a lovely smooth and timeless finish in a decor colour with an interesting random hue associated with water over stones in a river.

The construction of this product includes fibreglass for reinforcement and no coloration so it should not rust, fade or crack with age.
