

Programme of Delivery

# 2024

## Factory

The new Factory series ceramically transforms lived-in concrete floors into a lively and uncomplicated covering. Circle, the decorative tile for walls and floors, sets classic accents. For further information, refer to the pages 214 - 223.

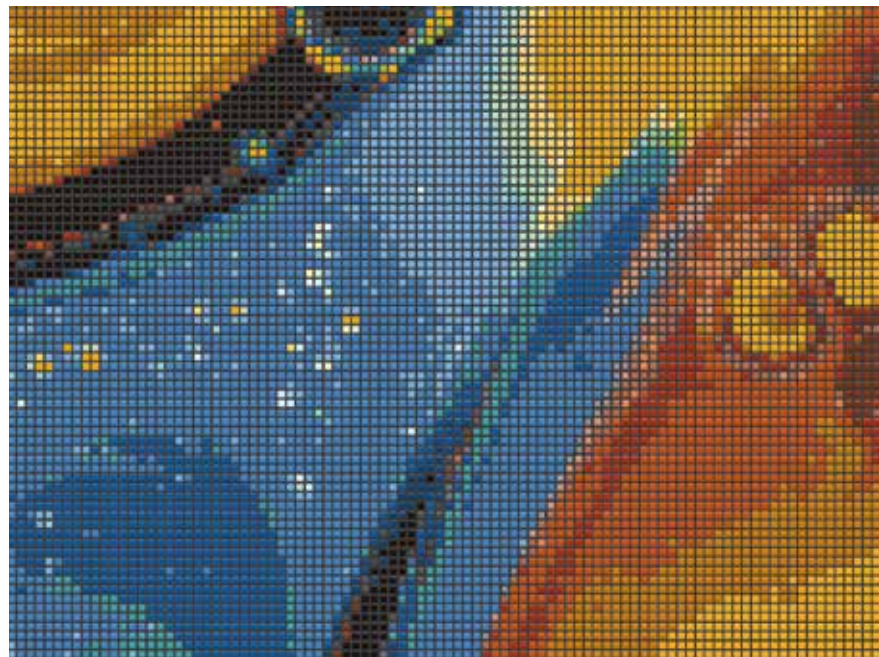

## Trio

The novelty Trio bridges the gap between craftsmanship that has become rare and modern tile production. At the centre of the triad is the floor in a natural cement stone look: clay, natural stone and cement are seamlessly layered on top of each other and broken up by small colored stones. For further information, refer to the pages 490 - 499.

## Mosaic Designer

The new mosaic planning tool from AGROB BUCHTAL. For further information, refer to the pages 14 - 15.

# We understand. Since 1755.

## Reliable

We know a lot about tiles. We have been working with clay since 1755 and have a comprehensive understanding of our material and the production of highest-quality stoneware, porcelain stoneware and earthenware. In our four German production facilities, we are constantly refining our recipes for mixing clay, feldspar, fireclay, kaolin and water. As a natural material which transitions from plastic to solid in carefully monitored firing processes, clay offers endless possibilities for creating ceramic products that help make architecture durable, sustainable and beautiful.

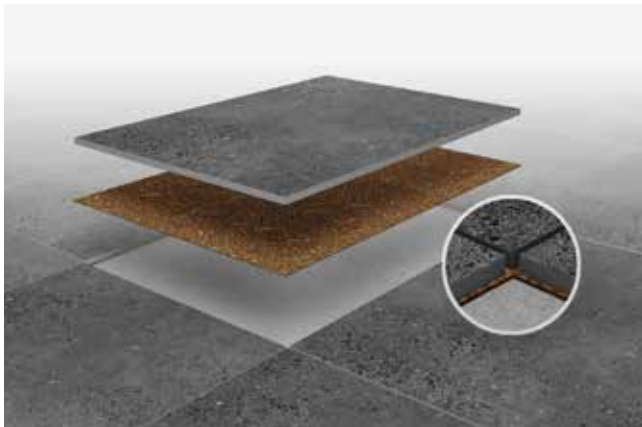

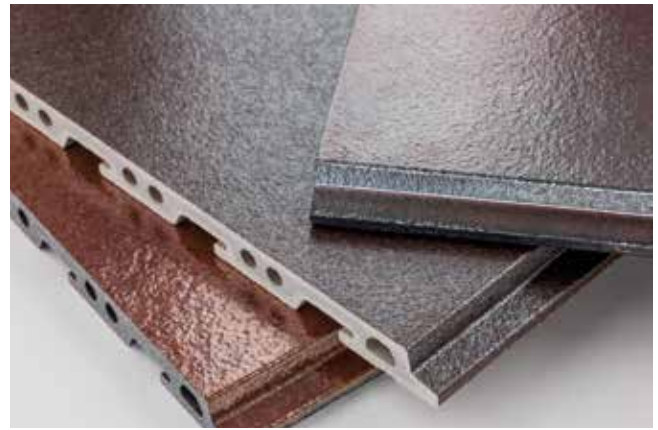

## Versatile

Our products are used far and wide. Indoors and outdoors. From private homes to museums. From hotels to hospitals. From restaurants to offices. From shops to swimming pools. From bathroom floors to building facades. We offer floor, wall and facade tiles for every purpose. And we produce all kinds of special elements to meet almost any specific requirement, whether it's a special piece for a swimming pool or an integrated orientation aid for visually impaired people. Our tiles can be found everywhere, world-wide.

## Cooperative

No matter how good our products are, we believe that only their application brings out their qualities. That's why we value collaboration and are happy to share our knowledge to find the best solution for each of your architectural projects. Where our standard products reach their limits, we develop customized solutions. Special productions are our speciality. We have the expertise and experience to support architects from the invitation to bid to the project completion. Tell us how we can help you. Contact us if you want to hear what we know.

## Innovative

We know how to produce great tiles. Yet we work ceaselessly to make them even better. Craftsmanship and new technologies are combined to create innovative slip-resistant surfaces for wet areas and to develop new and simple methods for working with ceramics, such as e.g. Drytile, which allows laying without adhesive. We invest in health and hygiene, as demonstrated by our sustainable Hytect technology, which is used in almost every product we make. In addition to developing innovations in all areas, we are proud of offering tailor-made new solutions and helping architects to realize their best ideas.

## Sustainable

The requirements to be met in the construction sector are continuously increasing. Building owners, planners and users make new demands which also include the future developments to a great extent. Energy efficiency, preservation of resources and climate change are the keywords in this context, which have a decisive influence. AGROB BUCHTAL is aware of its responsibility with regard to sustainable building and supports not only the idea of sustainable building by its membership in the German association for sustainable building (Deutsche Gesellschaft für Nachhaltiges Bauen (DGNB)). Our industry has decided early – in the scope of an ecological product declaration according to ISO 14025 – to make all ecological product data important for the planning process of a sustainable building transparent. The fact whether a building is convincing from the point of view of sustainability can be determined by certification systems. For this, specific product information must be available and documented.

# Modular color systems

Modular color systems are designed for complex requirements in all areas of architectural ceramics. The new Area Pro series is a real all-rounder with its extensive product range of tiles and accessories. It combines sophisticated design with high functionality and thus offers well thought-out solutions for the most diverse areas of application. As a perfect synthesis of function and aesthetics, Emotion supports consistent room concepts for functional and representative areas. With 50 colors matched to one another and 24 formats, Chroma and Plural promote the varied, room-spanning design of wall and floor surfaces. Fresh and Loop offer particularly exciting colors and formats in the mosaic sector.

## Area Pro: naturally intuitive

Good design always conveys an intuitive approach to its use – and thus, designing with Area Pro is also easy. With its earthy shades and pleasant haptics, the wide range of products immediately inspires ideas for their use. The series inspired by fine-grained, layered limestone blends in effortlessly and stands out at the same time. This makes the tiles and their accessories perfect all-rounders in almost every ambience. The series already exudes the potential to become a classic.

## Chroma: the color concept: mixing and combining

When it comes to color design in the pool area, blue is usually the color of choice. However, Chroma also offers warm and neutral shades from the color system inspired by nature – for classics rich in variation, individual accents and a holistic look. A total of 35 different colors are part of the standard delivery programme of the Pool series.

The color scales are divided into six groups: warm, earthy, cool, fresh and sunny shades move around a group of muted, neutral grey shades. Each group contains colors which can be easily combined, both within the group and with other groups. In this way, a consistent and uniform design can always be created.

## Plural: colorful and flexible

The color range specially developed for Plural comprises 50 colors matched to one another. Whether glazed or unglazed, earthenware, stoneware or porcelain stoneware – the narrow 3 mm joint is just as standard with Plural as the pollutant-reducing Hytect coating and the design in various slip-resistance classes. Thus, Plural can be used in many indoor and outdoor areas: from the facade to the floor, from the underground station to the wellness landscape.

## Emotion: modular and timeless

With colors and surfaces matched to one another, slip-resistant tiles from R9 to R12V4 and formats from 30 x 30 to 60 x 60 cm, the tiles of the Emotion series offer architects a great deal of freedom. Emotion ensures good design above all where there are transitions between areas with different slip-resistance requirements. Front cooking in visual contact with the restaurant guests is thus just as possible as the smooth and aesthetically successful coexistence of workshop and showroom in a car dealership.

## Fresh: fresh and modern

Fresh offers a harmonious range of modern, fresh colors in the popular mosaic formats of 2.5 x 2.5 cm and 5 x 5 cm, with which individual, but at the same time designs, which are uncomplicated to realize, are possible. A particularly practical advantage is that R10/B and R11/C slip-resistant mosaics in colors matching the tiles are available.

Color gradients accentuate selected areas, liven up overall pictures and stage artistic interplays with homogeneous tiled surfaces. As cladding for individual elements such as columns, partition walls or bar counters, they bring their own rhythm to the room.

## Loop: fine and round

The secret of the depth, luminosity and durability of the colors is the glaze. Up to ten layers are applied to the stoneware and fired in to make them abrasion-proof. We create the glazes ourselves – with selected raw materials. This is how mosaics of radiant, lasting beauty are created.

Loop offers a wide spectrum of intensive and muted color shades in the blue and green range, strong yellow, orange and red variants, grey and brown nuances to deep black. Delicate transparency for lightness and timelessness, luminous richness for accent and expression.

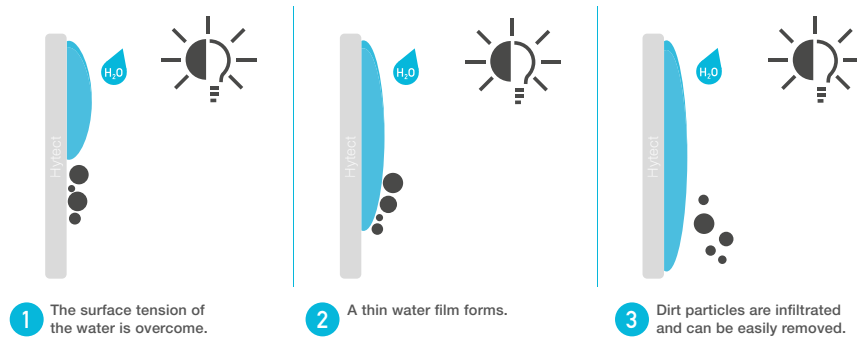

# Innovative. Hytect – the air is clean

The Hytect technology is safely baked into the surface of the ceramics at high temperatures. When light falls on the tiles coated in this way, active oxygen is released by photocatalysis. This creates the effect against bacteria and mould. At the same time, Hytect tiles naturally neutralize air pollutants. And because they are also

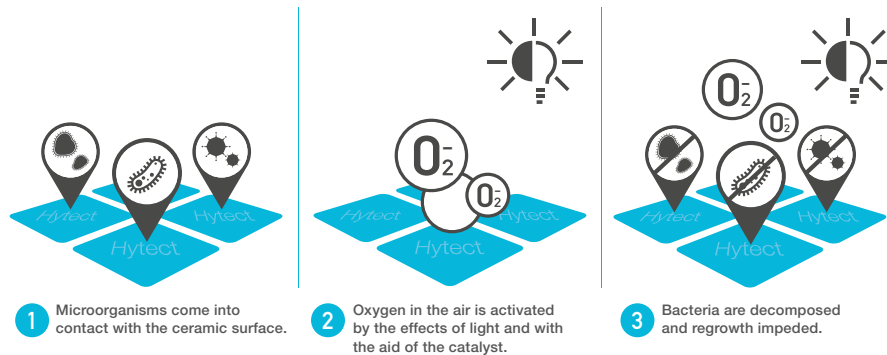

hydrophilic, dirt and grease hardly stick to them. All these effects work undiminished over the entire service life of the tiles. And thanks to a wide range of products, Hytect ceramics can be used in a wide variety of areas. Our products provided with our Hytect technology are marked with the Hytect logo.

## The effects

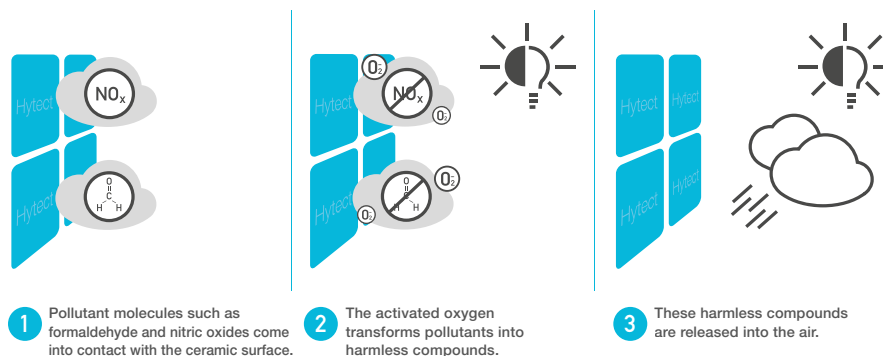

Extremely easy to clean

Effective against fungi and bacteria

Active elimination of air pollutants

# Slip-resistant tiles for all areas of application

Falls caused by slipping, stumbling/twisting or misstepping are the primary cause of accidents in most companies and facilities. Slip-resistant tiles, marked with the GRIP quality seal, are one of our core competences. Since the market launch of the first slip-resistant tiles in the 1930s, we have continuously further developed this innovation through intensive research.

The results include renowned prizes for exemplary surface designs, functional improvements such as low-noise and vibration-free driving on ceramic coverings as well as micro-rough special glazes for the barefoot areas in swimming pools. The quality of our slip-resistant tiles is guaranteed by permanent controls of the in-house laboratories and neutrally supervised at regular intervals by external institutes as well as the participation in interlaboratory tests with accredited test laboratories.

## The latest innovation in slip-resistant tiles: R12V4

In collaboration with the German designer Sebastian Herkner, a special anti-slip surface was developed for Area Pro. Sebastian Herkner was looking for a pattern which looks spontaneous and yet has a certain logic. This is how he came up with the repeating, trapezoidal rectangles and the pattern that can be continued in all four directions. Area Pro is available with various slip-resistant surfaces, including Grid, with a slip resistance of R12V4. None of the slip-resistant surfaces impairs the aesthetics of the tiles. They are also available for large-format tiles, which, due to their properties, may also be used in commercial kitchens.

Functionality and beauty combined: the R12V4 surface of the Area Pro series.

Designer Sebastian Herkner develops the slip-resistant surface "Grid".

The design of Grid.

# The in-house planning department

## Efficient support for 7 decades

At AGROB BUCHTAL, high-quality products and competent services are supplied. In this way, planners and architects using our products can benefit from the know-how of our in-house planning department, which has proved itself since 1952, when specifying our products.

A committed team of qualified technicians, engineers, architects, designers and color experts ensures a quick and problem-free realization of individual concepts. And as these experts are not only specialized advisers but also carry out numerous routine tasks, the customers of AGROB BUCHTAL can completely concentrate on the realization of their creative ideas. The range of services includes laying plans, determinations of quantities, detailed estimates, texts for bidding purposes or project-specific advice regarding application techniques. Upon request, a person to contact will be at your disposal on location.

# Individual production for special requirements.

## More than standard solutions

Creative architects and planners need unlimited design scope in order to be able to realize their ideas in an appropriate manner.

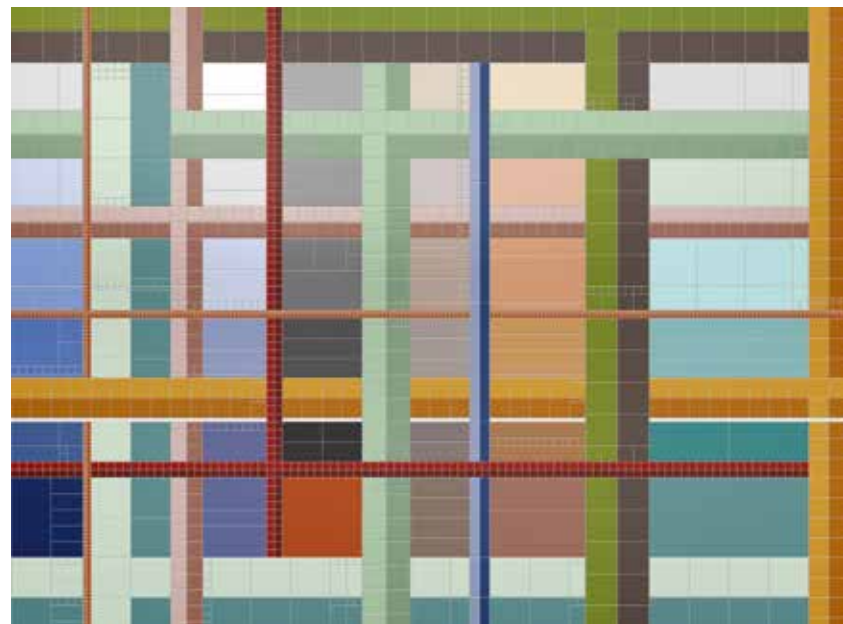

### Special colors

They are individually selected or newly composed from almost 20,000 glaze recipes in any shade desired. This also applies to Corporate Colors corresponding to the CD of the respective company.

### Water-jet cutting technique

It permits the precise cutting of ceramic tiles in free and also curved forms, which can be combined according to the respective design specifications.

### Special formats

They are in demand both in the case of aesthetically sophisticated new buildings and at the renovation of historical buildings and are manufactured exactly according to the specifications of the architects.

# Creative particle accelerator

## Free your mind

The new mosaic design tool from AGROB BUCHTAL expands the horizons for architects and interior designers by giving them an infinite number of solutions when it comes to form, colour and size. This digital service creates freedom for new ideas. With its intuitive, almost playful operation, this tool offers an excellent and convincing experience for users, enables AGROB BUCHTAL to revolutionise the ancient art of the mosaic and give it a new life.

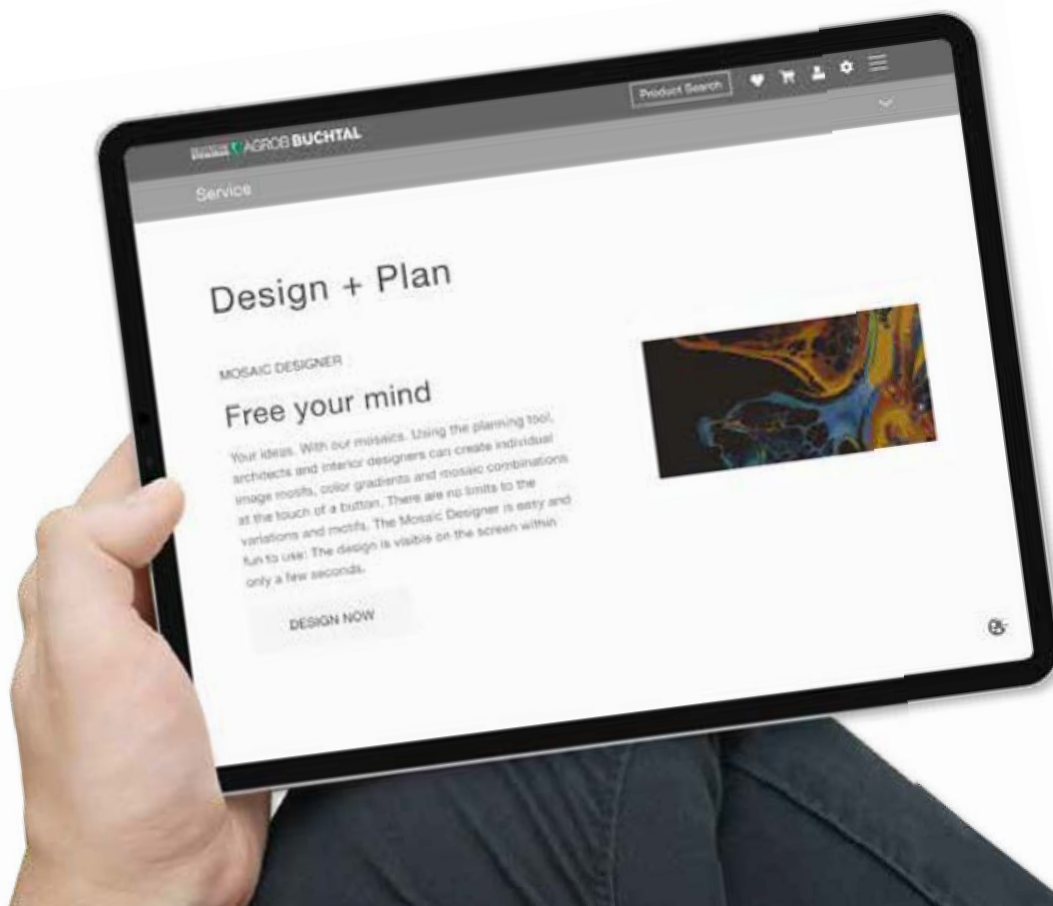

The desired basic parameters such as the dimensions of the mosaic, choice of product series, tile format and grout colour are entered so that individual colour gradients or combinations can be generated automatically. The time taken to generate the design, which is then displayed on the screen, depends on the size of the mosaic.

For example, 103,968 mosaic pieces each measuring 1 x 1 cm are needed for an area measuring 3 x 6 m, and these are arranged digitally into the desired format at lightning speed.

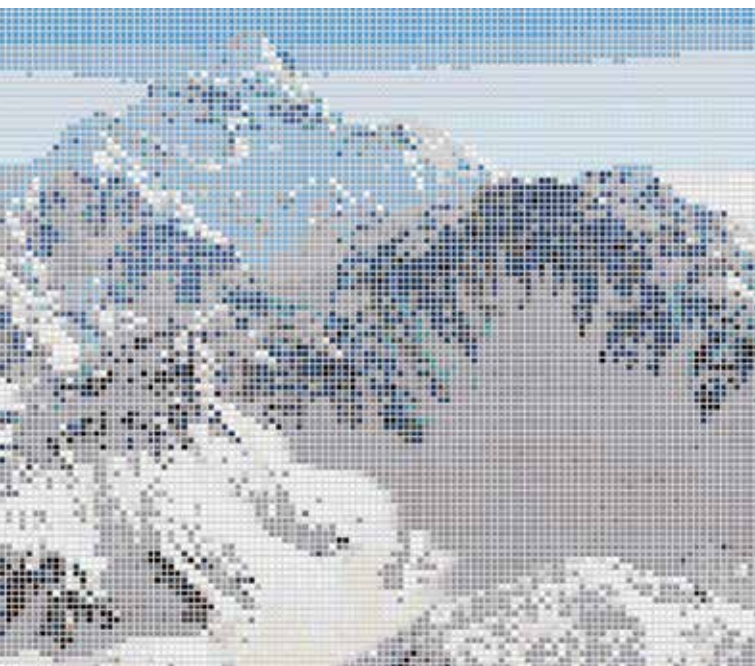

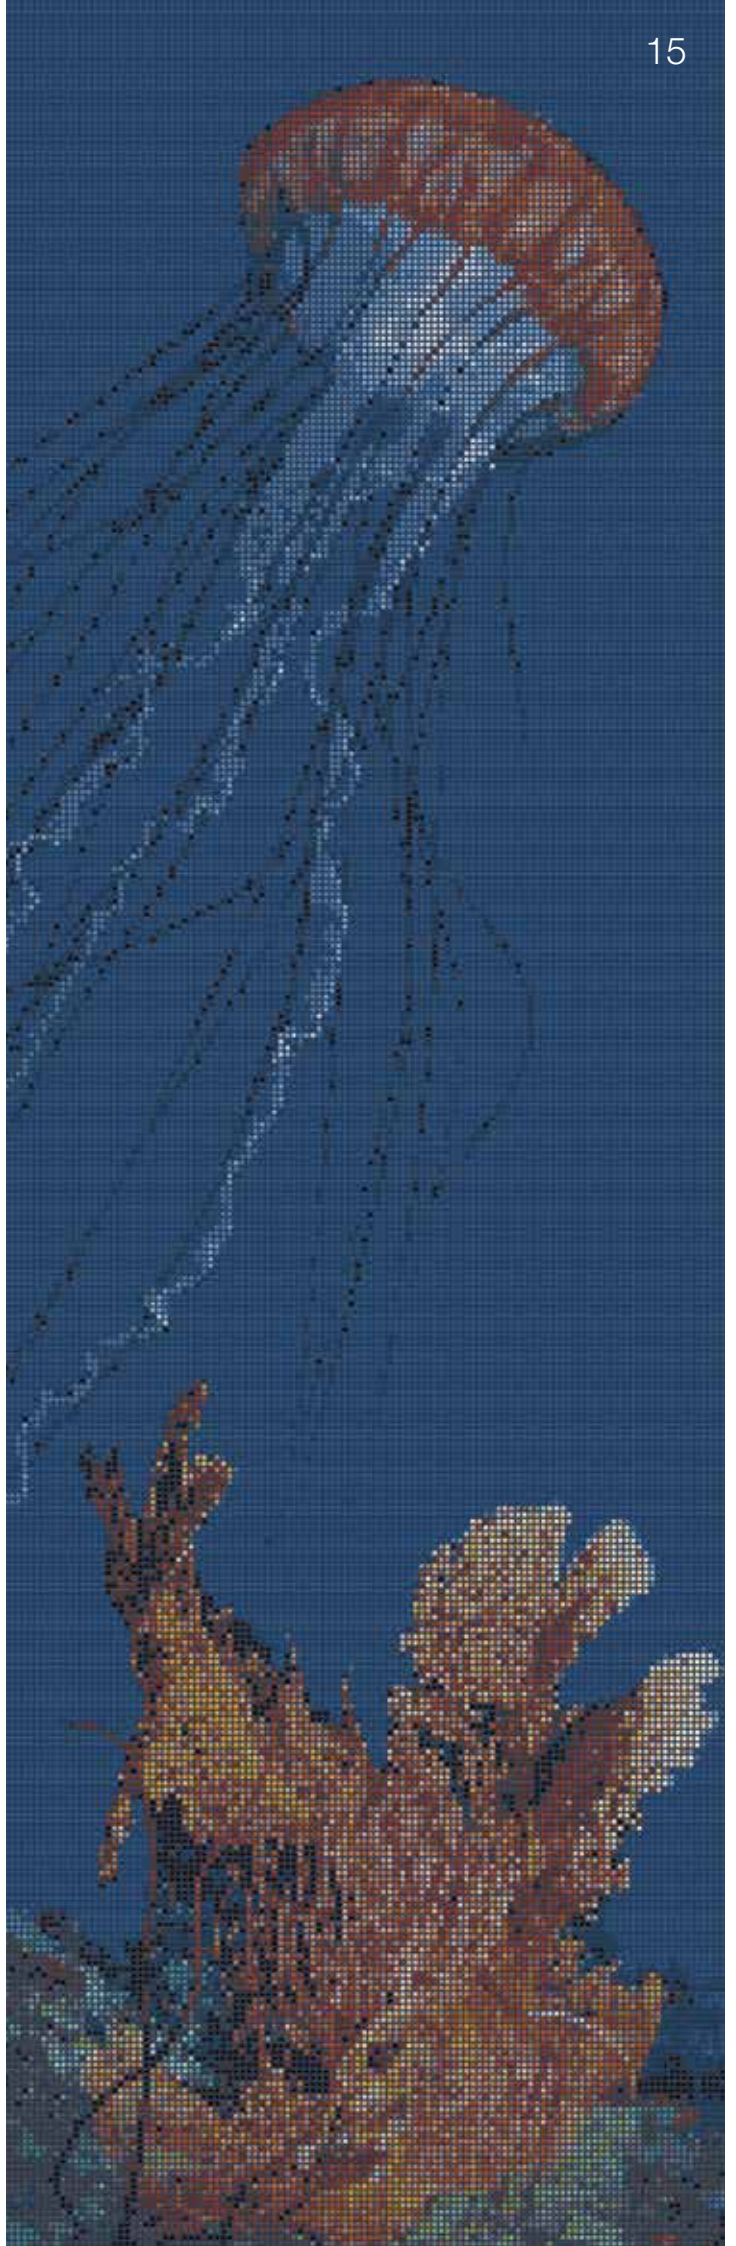

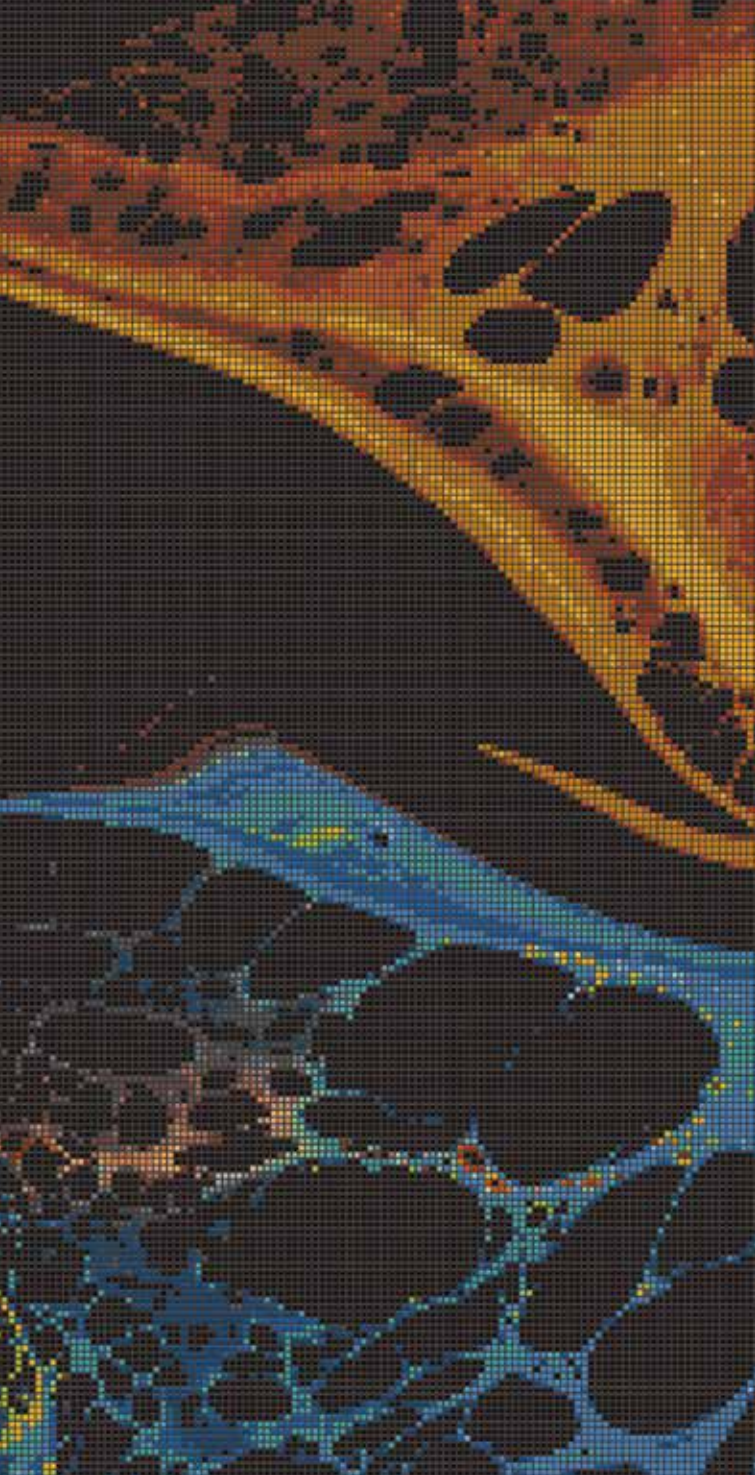

When it comes to size, there are no limits for the AGROB BUCHTAL Mosaic Designer, the “creative particle accelerator” as it were, especially when it comes to designing swimming pools, spa amenities, restaurants, hotels, schools and public areas such as underground stations. The first large project is already at the planning stage.

There is a choice of three mosaic series: Loop, Fresh and Plural. These three pure colour system series without wood, concrete, marble or other surface textures are ideal and simply waiting for designers to exploit their wide range of shades. Every design can be saved as a project or immediately sent to AGROB BUCHTAL as an enquiry.

Besides graphic gradients and mixed colours, it is also possible to incorporate individual motifs into the Mosaic Designer. Pictures and photographs can be uploaded directly using the upload function.

directly to the Mosaic Designer

# We develop product solutions for all areas of application

## Retail

Retail concepts require high-quality, authentic materials which are robust and can withstand heavy loads, such as, for example, our extra thick tiles. Or special product solutions such as the Drytile floor tile coated with cork, which is laid dry. This saves an enormous amount of time and is thus an economic advantage for the construction of new buildings or renovation.

## Drytile — As fast as your business

## Extra thick tiles

### Hotel + Gastronomy

Hotels are temporary homes. An all-round successful interior design contributes to making guests feel at home. Authentic materials which create atmosphere and highlight the special charm of the place are in demand. Tiles have been a popular and versatile means of design in architecture for centuries. High-quality ceramics is robust, resistant to wear, color-fast, easy to clean and therefore economical.

### SURF®

### Mosaics for wellness areas

## Health + Care

In health and care facilities, the well-being of patients is paramount – whether in patient rooms, operating theatres, treatment rooms, large kitchens, laboratories or therapy baths. The standards of hygiene, cleanliness and accessibility are very high. At the same time, operators want sophisticated interior design with a calming and friendly atmosphere. This has a positive effect on the patients' well-being and thus promotes recovery. We also offer special products for special requirements in health care facilities: ceramics with a special glaze absorb disturbing reflections – specially designed for operating theatres and areas where laser technology is used. Special solutions for therapy pools combine functionality with beautiful design.

## Therapy areas

## Ceramics against germs

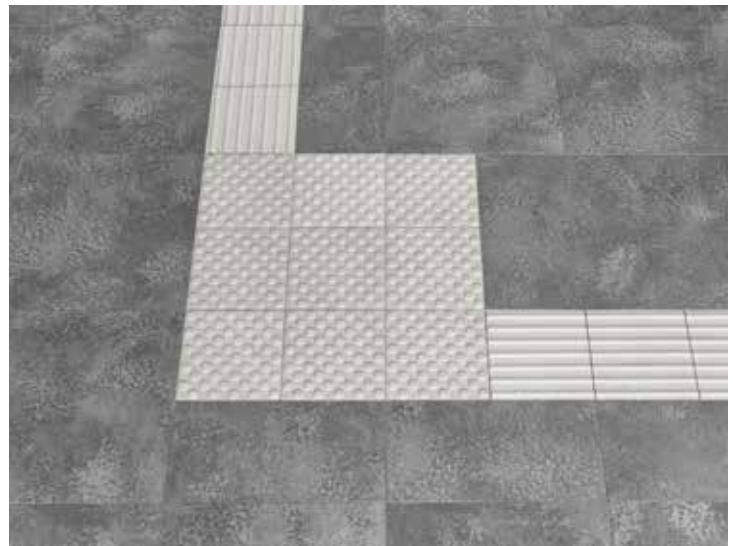

## Education

Schools, kindergartens and universities are places of education, just like political, artistic or musical institutions. An attractively designed environment increases the willingness to learn and has an inspiring effect. And when people feel comfortable, they like to come back. Color is an important element for giving rooms atmosphere and expression. In combination with material and texture, a positive, activating environment is created in day-care centres or primary schools, for example. The depth of color, brilliance and expressiveness of ceramics are long-lasting. High-quality ceramics also withstands the stresses and strains of constant public traffic for decades.

## Modular color systems

## Orientation aid for the blind

## Industry + Infrastructure

The planning and execution of infrastructure buildings are challenging. Buildings such as railway stations, underground stations, tunnels or airports should be multifunctional, look appealing and fit into the cityscape. Thousands of people come together in these areas every day. Highly frequented areas require slip-resistant, robust and low-maintenance building materials, but also easy-to-clean surfaces. This is where the Hytect tile comes in useful. The patented surface coating activates a natural process which cleans the air and neutralizes nitrogen oxides and odours. Likewise, unwanted graffiti is demonstrably easy to remove. Special products such as orientation aids for the blind provide orientation and enable barrier-free design.

### Pool + Spa

The conception of contemporary pool architecture is complex and must meet high demands. And not only in terms of design: whether sports, leisure and adventure pools, therapy pools, private and hotel pools, sports and competition pools – they all have to be safe, easy to clean and inexpensive to maintain. Tiles meet these functional requirements: for example, with slip-resistant special surfaces ensuring a safe foothold even when wet. Modularly combinable tiles and special pieces are important for a consistent design from the pool and pool surround to all adjacent areas such as showers, saunas, changing rooms or restaurants.

Further information on the products can be found in the Pool + Spa programme of delivery.

### Consistent design in all pool areas

### Color gradients

### Laying of pictures

Each individual mosaic tile is placed by hand and then glued on net.

## Facade

The facade is more than a protective outer shell. It covers the building like a dress. Its design not only shapes the building itself, but also often has a visible effect on the urban environment. As a building material which has been tried and tested for thousands of years, ceramics also has ideal properties for the facade. It is non-combustible, resistant to chemicals, light-fast, pressure-, impact- and scratch-resistant. In addition, it is harmless in terms of building biology. It scores with its unlimited service life and can be completely recycled. The design possibilities arise from the combination of color, surface, format and shape in all conceivable versions: powerful, rich colors or monochrome, restrained ones. Glazed, unglazed, matt or glossy surfaces. Large-size panels, narrow oblong formats or mosaics for organic shapes. Three-dimensional shapes, baguettes or tubes.

KeraYou®

## Living

Wall and floor coverings significantly characterize the overall impression of rooms. When planning contemporary bathrooms and living spaces, design usually is the top priority when it comes to choosing wall and floor coverings. At the same time, the materials used to furnish the home office or dining room, hallway, living room or bathroom should also be hard-wearing and durable. It is important to create living comfort without compromises, ecologically sustainable, easy to clean and barrier-free. We offer products which meet these requirements and create smart additional benefits with the advantages of the antibacterial Hytect surface. From the mosaic up to large formats.

# Series from A to Z

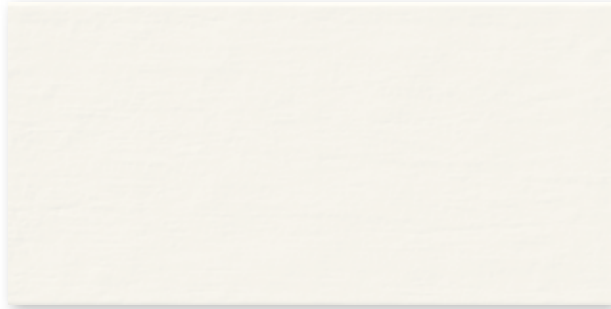

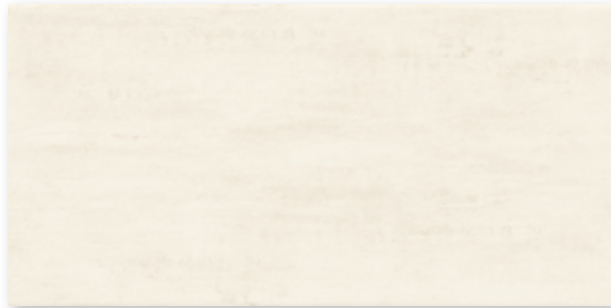

## Warm and natural

With its naturally textured surfaces, Alcina offers an elegant range of earthy and warm shades for walls and floors in living and wet areas. Accordingly, Alcina can be combined with various living styles. The delicately coloured wall tiles have a Hytect surface. Strong or subtle contrasts are created by floor tiles in different colours and formats. The Sola décor provides stylish variety – in all floor colours. This extensive range of tiles is rounded off by matching skirtings, non-slip 5 x 5 cm mosaics and patio tiles.

## Deeply impressive and lively

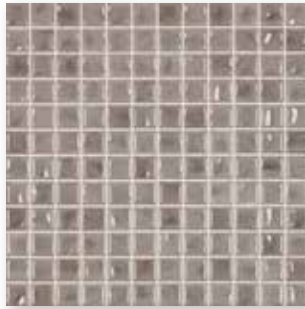

Inspired by the motion of water, Amano is characterized by a finely textured relief surface. In combination with blurred glazes, Amano creates watercolor-like effects and lends the series natural charm and exclusive liveliness. Amano distinguishes itself by delicately transparent, muted colors and smooth contrasts. When the light is refracted on the glossy surface, Amano impresses with sparkling reflections.

# Area Pro comes naturally

Just as the best design objects offer an intuitive understanding of how to use them, the Area Pro series also comes naturally. With its earthy colors and pleasant tactility, the wide range of ceramic products offered by Area Pro immediately spurs ideas on how to use them. The Area Pro series, which is inspired by fine-grained, layered limestone, blends in and stands out. This

Rendering

makes these tiles and accessories reliable perfect all-rounders in almost every ambience. The series already exudes the potential to become a classic. Area Pro is the ceramic equivalent to the little black dress or a classic white shirt. Whether in office buildings, residential buildings or leisure facilities — like the fashion classics, the series is convincing in any environment and is thus a true all-rounder. All tiles can be laid regardless of direction. In addition, they impress with their versatility and a variety of formats and color shades. All colors of Area Pro are matched to the Chroma and Plural series of AGROB BUCHTAL, so that they can be combined with each other in many ways. In addition, customized projects are also possible with this series.

# Grid

In order to live up to its own claim of combining high functionality with sophisticated design, AGROB BUCHTAL engaged design shooting star Sebastian Herkner, who normally works for brands such as Thonet, Ligne Roset or Moroso. He created a completely new design for the surface of the highest slip-resistance class. The result: "the Grid".

# Smart features

## Always perfect grip

Area Pro is available with diverse slip-resistant surfaces, including Grid with a slip resistance of R12V4.

## Sustainable, thin wall tiles

In the case of the 6 mm thin wall tiles, less material is required. Less material means less energy at production and transport as well as a lower weight.

## Innovation Drytile

The Drytile system is available for floor tiles between 30 x 60 cm and 60 x 120 cm. Drytile is an innovative technology at which a cork compound is applied on the back of the tiles. Thanks to this cork layer, the tiles can be laid without the use of adhesive.

## Hytect hygienic surface

Area Pro tiles are provided with the sustainable Hytect surface, which makes them extremely easy to clean. In addition, Hytect protects ceramic tiles against bacteria and mould and neutralizes air pollutants and unpleasant odours.

## Washbasins and shower trays

Area Pro also includes a selection of ceramic washbasins and ceramic shower floors, which are available in all twelve colors of the series.

## Ceramic channel cover

For tiles laid around the pool in swimming baths, AGROB BUCHTAL offers the appropriate termination which ensures visual continuity: a channel cover with water-cut openings.

## Play with movement and transparency

The Aruba series is puristic, harmonious and ideal for private bathrooms. In warm white colors and sandy shades, it is available as wall tile and Kentia decorative tile with palm leaf motifs. The decorative tiles can be arranged as desired and can be laid without specific direction. They are available in oblong format. This and their special tile pattern offer unlimited visual freedom when laying. It also makes the filigree rhythm of the tile pattern possible and particularly emphasizes the movement of the leaves. The floor tiles round off the range, also in the particularly representative size of 60 x 120 and in the visually appealing mosaic format. The Hytect surface makes the entire series very easy to clean; it has an antibacterial effect and ensures hygienic cleanliness.

## Experience diversity

Ascona is made for spas, wellness areas and swimming pools in hotels, but also for private homes. This is also due to the diversity of this series. Already visually, with mosaics and oblong formats, small and large formats for walls and floors as well as the fine selection of colors, one has a wide range for design. However, the series also impresses with its functional possibilities and technical solutions, especially for all swimming pool areas or spas – by the way, indoors and outdoors, in entrance areas as well as in rooms where visitors walk barefoot or in dedicated wet areas. Thanks to clear lines and grounded colors, a wide variety of style worlds can be created. Puristic architecture is just as possible as classic or modern country house designs. The Ascona series can be perfectly combined with our mosaic series Marble & More.

## Modern and durable

Inspired by slate structures, Basic Stone was created. The ceramic surface of the 5 x 5 cm mosaic made of unglazed porcelain stoneware with Hytect surface represents the theme of slate in a modern and at the same time durable manner through a relief mix in combination with discreet graphics. Fine glossy spots of mica and subtle color contrasts underline the stony character of the surface. The color range is based on natural slate colors.

Rendering

Mosaic, 5 x 5 cm, 2 x 2 in

*Mosaic sheet 30 x 30 cm, 12 x 12 in, black, structured, R10/B*

*Mosaic sheet 30 x 30 cm, 12 x 12 in, medium grey, structured, R10/B*

*Mosaic sheet 30 x 30 cm, 12 x 12 in, light grey, structured, R10/B*

*Mosaic sheet 30 x 30 cm, 12 x 12 in, mud, structured, R10/B*

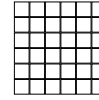

*Mosaic sheet 30 x 30 cm, 12 x 12 in, beige, structured, R10/B*

Mosaics glued thermoplastically on back of AGROB BUCHTAL can be used not only in dry zones but also without any problems in underwater areas (e.g. swimming pools/whirlpools) as well as in permanently wet areas (e.g. pool surrounds/showers).

## Timeless and simple

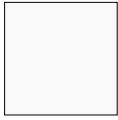

The timeless color range and formats from 5 x 5 cm up to 35 x 100 cm permit economical solutions in diverse areas. The additional series Basis Pro enlarges the range with a selection of porcelain stoneware floor tiles in a contemporary and long-lasting design. Further advantages: the high slip resistances from R10/A to R11/B and up to R13V10, shower tub systems, stair tiles and special pieces complete the range.

## Functional and versatile

Basis Pro enlarges the established Basis programme with porcelain stoneware products in contemporary and long-lasting design. Basis Pro is a compact selection of floor tiles in classic formats, timeless basic colors and a range of slip-resistance categories geared to the solid project sector. The series offers functional, ceramic solutions for public buildings and residential construction.

## Noble marble look

The natural expression of Italian marble and the generous format make Bliss something special. The combination of the basic tiles with the freshly colored Paradise surface decor is particularly impressive. The basic tiles harmonize with various floor tile series, the tiles are Hytect-coated and therefore particularly hygienic.

Rendering

<sup>2</sup> Decoration elements only available in full boxes.

<sup>3</sup> The decoration you have chosen is a high-quality product made of glazed earthenware. The decoration consists of different individual pictures. The connections of the individual pictures are deliberately designed freely and thus do not connect in the continuous laying. The composition of the motifs in the box may vary due to production reasons.

## Inspired by wood

With its subtle reminiscence of wood surfaces, Cedra is the perfect choice for a homely bathroom design. The two wall tile colours in two formats can be harmoniously combined with the borders. These borders, which are available with and without porcelain stoneware inlays, set visual accents. They pick up the three classic colours of the floor. Particularly practical: in addition to the floor tile, the shower area can be continued with a matching mosaic in R10/B. The wall tiles are particularly easy to clean thanks to their Hytect surface.

## In its element: Chroma

Especially under water, the demands on the architectural raw material ceramics are great. Chroma bundles all the experience in swimming pool construction in a product series specially designed for underwater use for architects and planners. The standard joint width of 6 mm, which is widely used above all in pool construction, is used.

## Stability in the pool: 6 mm joint

Physical stresses lead to high loads in the pool area, which make a specific joint width advisable. The laying of the tiles with a 6 mm joint ensures maximum safety.

## Safety without compromises

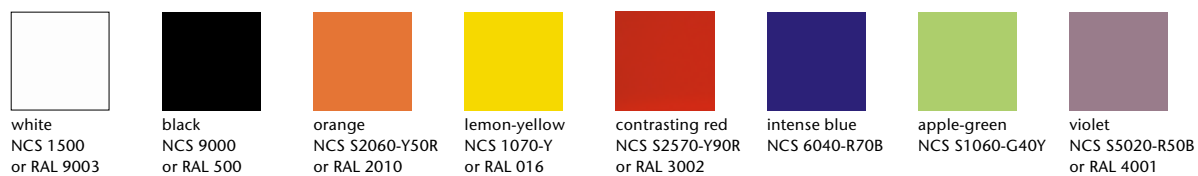

Accident prevention has the highest priority in every swimming pool – especially in areas with a particularly high risk of slipping, such as stairs leading into the water or walk-through pools. That is why Chroma also offers the slip-resistance classes of category "C". In this way, the highest design and safety requirements can be implemented uniformly and without compromise.

Oasia Hotel, Singapore / Architect: WOHA Architects + Patricia Urquiola

<sup>2</sup> Especially suitable for non-slip and clearly visible (stair) edge design.

<sup>3</sup> The cove skirtings comply with DIN EN 14411, group Al<sub>b</sub>, glazed (GL)

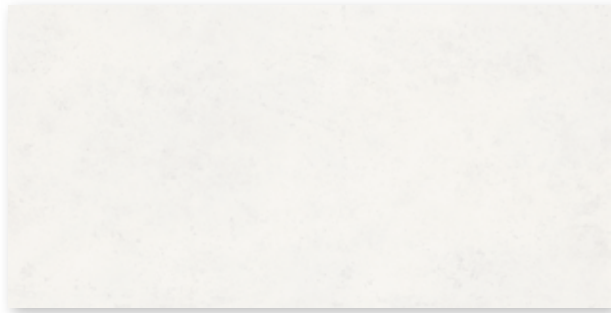

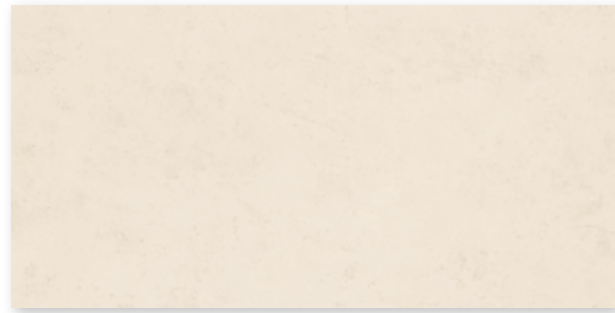

## Flowing play of colors between concrete and sand

Shadowy, cloudy, purist. Polished concrete with inclusions featuring sand and fine stone grains, Como is symbolic of a material which provides plenty of scope for individual creations. Yet so simple that it can be used practically anywhere. For a stylish ambience with a loft character, elegantly aesthetic or purely original. Highlights are provided by decorative elements such as Script, with color and relief print in the wall tile colors of glacier-white or natural beige as well as the border Block in graphite-black or sand-beige.

## Harmonious feeling of homeliness

With its wall tiles in the colors silver-grey and sand-beige, the series Concrete creates a natural and harmonious living ambience. Attractive accents can be set with the Screen and Stripes mosaic tiles in graphite and sand-beige and the matching borders. The wall tiles are easy to clean thanks to their Hytect surface.

## Inspiring and modern

The heritage hype in fashion, lifestyle and technology which has been going on for years has also left its mark on tiles. Craft quotes the familiar and yet looks surprisingly modern. The series, which is equally suitable for indoor and outdoor use, owes its handcrafted character to the depth and transparency of its highgloss glaze. Compositions of alkaline earths, fluxes and metal oxides in interaction with the clay body create particularly luminous, intensive colors and the typical surface structures when the tiles are fired openly.

<sup>3</sup> Minimum order quantity: 250 m<sup>2</sup>

<sup>4</sup> Exception: tobacco: smooth, silky-matt

<sup>5</sup> Exception: complies with DIN EN 14411, group Alla - part 1, unglazed (UGL)

<sup>6</sup> For format 2270: Due to manufacturing reasons, right and left overglazed short edges are generated at a ratio of 1:1 in the case of this article, which have to be purchased by the customer. Only one longitudinal edge can be glazed.

For the series Craft:

Minimum order quantity in the case of special colors: 500 m<sup>2</sup>

Price for lower quantities on request.

The customer agrees to purchase a possible overproduction of 10 %.

Overglazed edge(s) possible up to max. 10 % of the order quantity.

A separate order is necessary.

<sup>1</sup> Minimum order quantity: 250 m<sup>2</sup>

For the series Craft Extended:

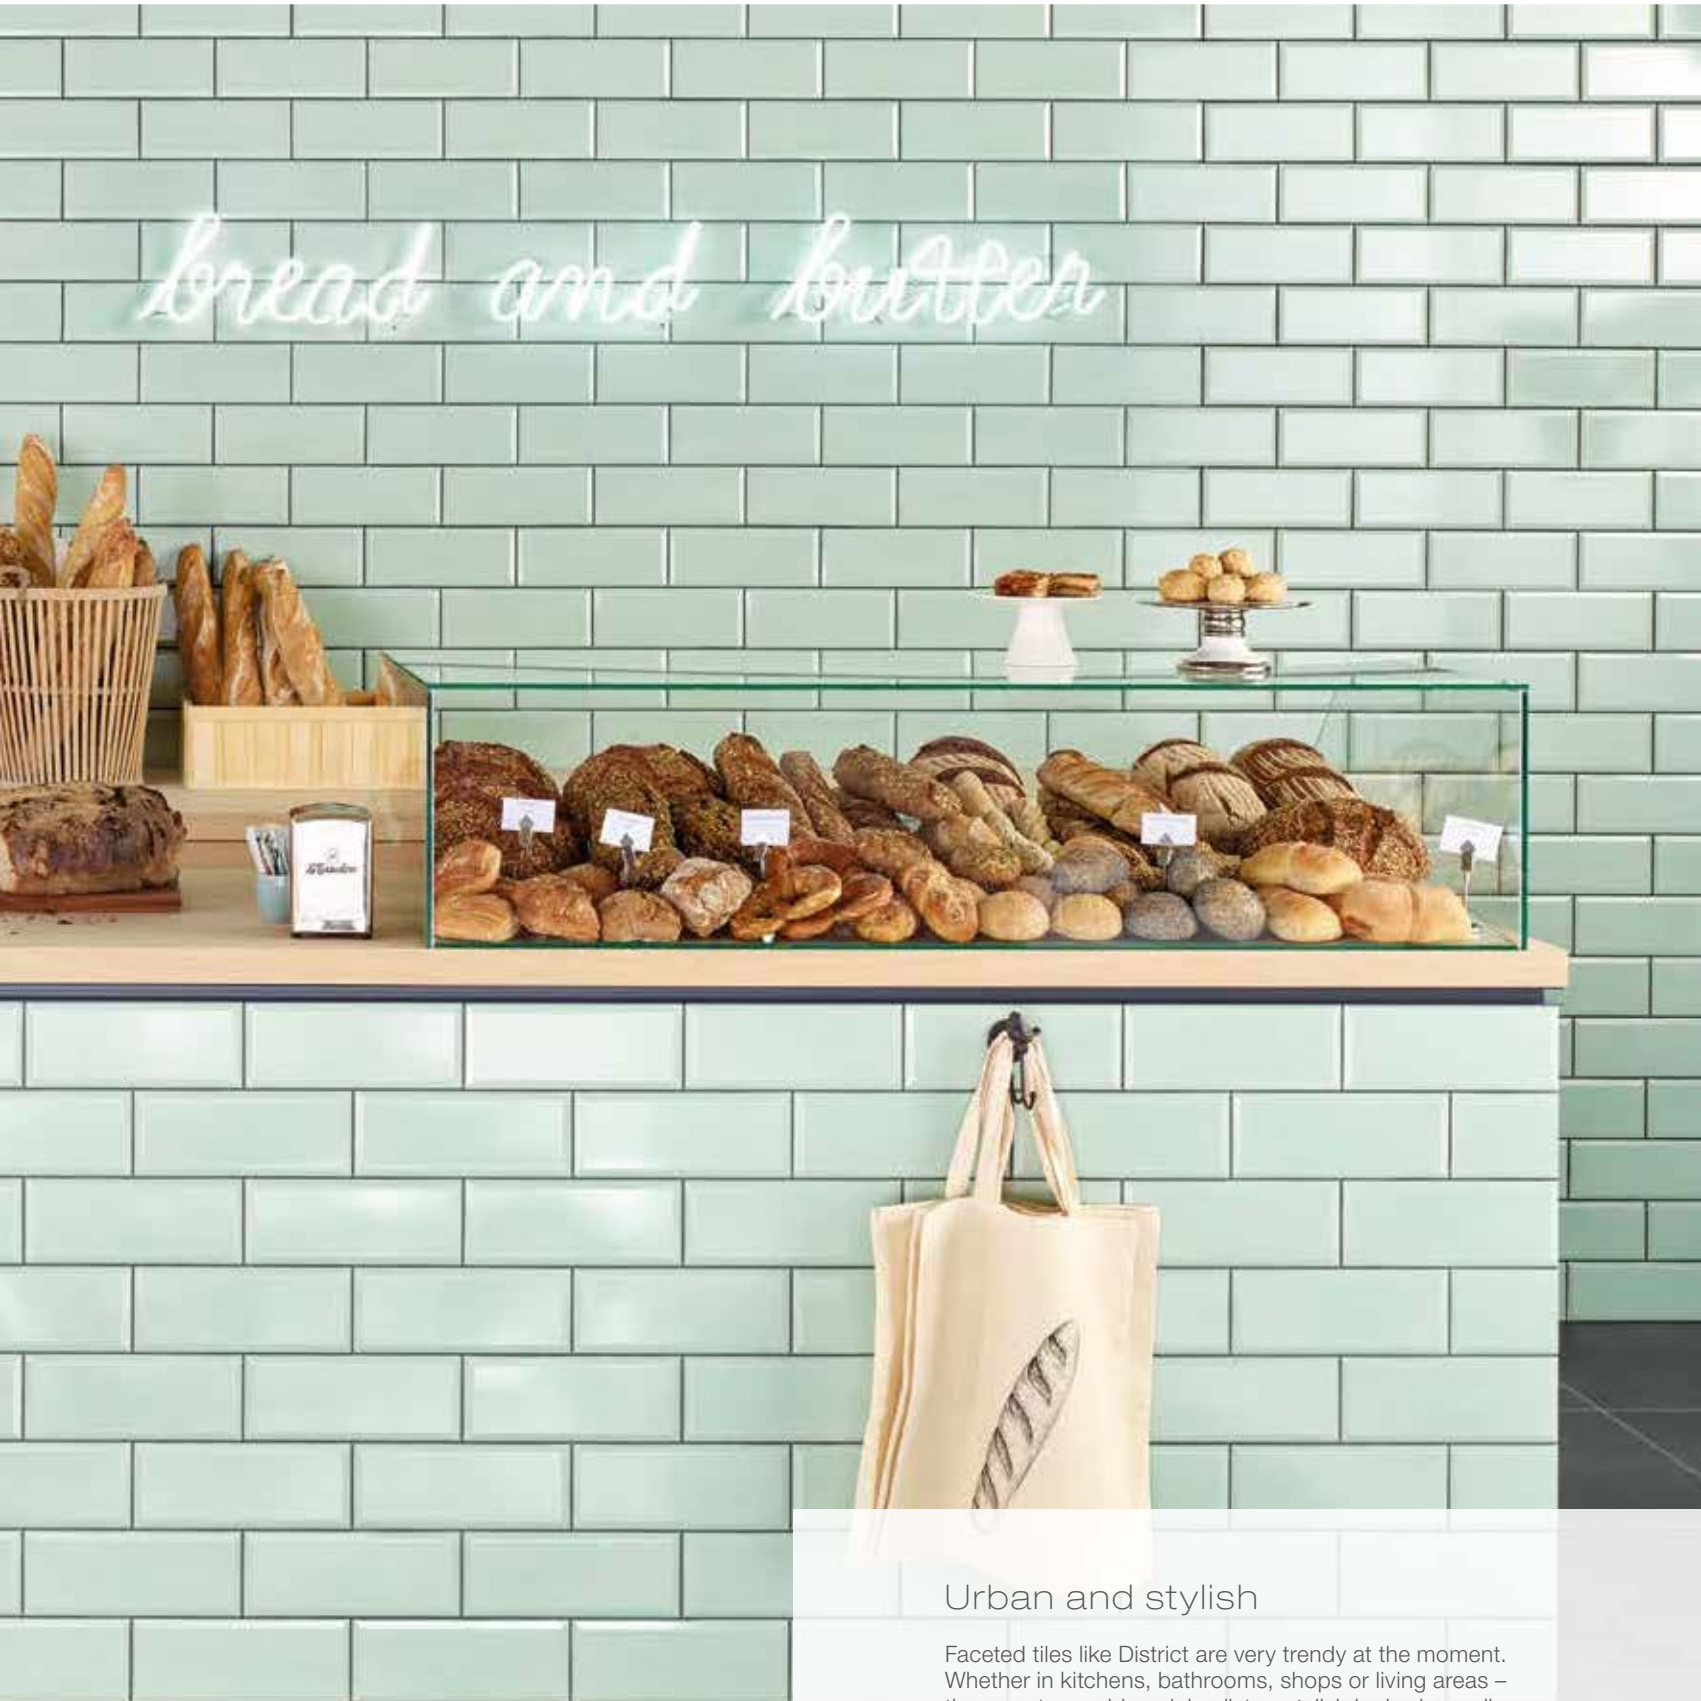

Minimum order quantity in the case of special colors: 500 m<sup>2</sup>

Price for lower quantities on request.

The customer agrees to purchase a possible overproduction of 10 %.

Overglazed edge(s) possible up to max. 10 % of the order quantity, a separate order is necessary.

### Urban and stylish

Faceted tiles like District are very trendy at the moment. Whether in kitchens, bathrooms, shops or living areas – they create a noble, minimalist or stylish look, depending on the color and area of application. With District, there are eight trendy colors to choose from. All are available in the formats of 5 x 10 cm and 10 x 25 cm. Thanks to the thermoplastic glueing on the back in the case of the 5 x 10 cm format, they are particularly easy to lay as sheets in addition.

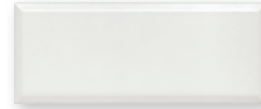

Wall tile 5 x 10 cm, 2 x 4 in, Facette almond beige, smooth

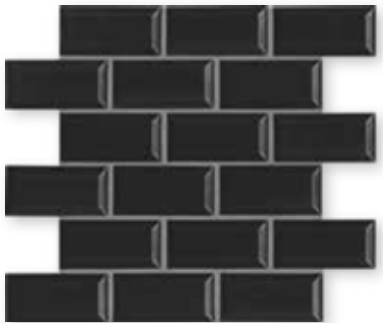

Wall tile 5 x 10 cm, 2 x 4 in, Facette white, smooth

Wall tile 10 x 25 cm, 4 x 10 in, Facette almond beige, smooth

Wall tile 10 x 25 cm, 4 x 10 in, Facette white, smooth

Wall tile 5 x 10 cm, 2 x 4 in, Facette pitch black, smooth

Wall tile 5 x 10 cm, 2 x 4 in, Facette ash grey, smooth

Wall tile 10 x 25 cm, 4 x 10 in, Facette pitch black, smooth

Wall tile 10 x 25 cm, 4 x 10 in, Facette ash grey, smooth

Wall tile 5 x 10 cm, 2 x 4 in, Facette miami mint, smooth

Wall tile 5 x 10 cm, 2 x 4 in, Facette denim blue, smooth

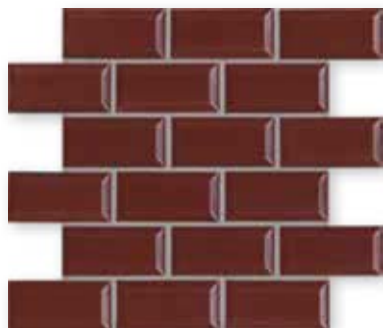

Wall tile 10 x 25 cm, 4 x 10 in, Facette miami mint, smooth

Wall tile 10 x 25 cm, 4 x 10 in, Facette denim blue, smooth

Wall tile 5 x 10 cm, 2 x 4 in, Facette racing green, smooth

Wall tile 5 x 10 cm, 2 x 4 in, Facette burgundy red, smooth

Wall tile 10 x 25 cm, 4 x 10 in, Facette racing green, smooth

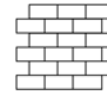

Wall tile 10 x 25 cm, 4 x 10 in, Facette burgundy red, smooth

Mosaics glued thermoplastically on back of AGROB BUCHTAL can be used not only in dry zones but also without any problems in underwater areas (e.g. swimming pools/whirlpools) as well as in permanently wet areas.

Only suitable for laying on the wall.

## Conductive floor coverings

These two specific solutions – as a stoneware tile (Eladuct) on the one hand and as a ceramic large-size panel in model size 60 x 60 cm on the other (ELA 10.6) – are suitable for use in those areas where electrostatic charge requires a conductive floor covering or where the latter is recommended. The special laying instructions must be followed carefully. We shall be delighted to advise you and to give you assistance for individual applications.

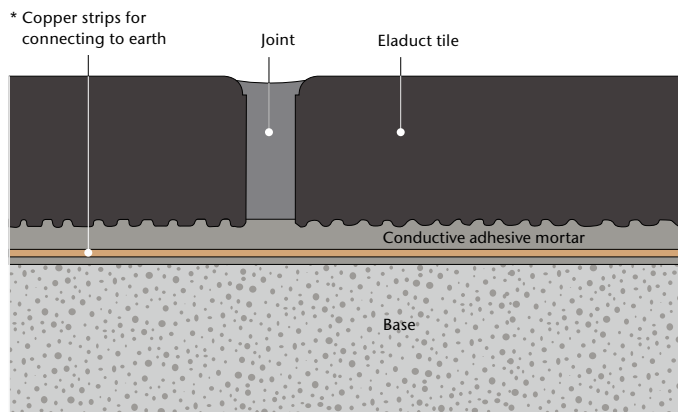

## ELADUCT

Static electricity conducting stoneware tiles, unglazed

3555  
Eladuct unglazed

### Sectional Drawing

\* Number and arrangement depending on the technical requirements.  
Connection only by an electrical specialist in line with the relevant guidelines.

In the case of Eladuct, static electricity is discharged through the tile body.  
Volume resistance according to Procedure A pursuant to DIN EN 1081: 10<sup>8</sup> Ohm.

### Conductive Floor Coverings

These two specific solutions – as a stoneware tile (Eladuct) on the one hand and as a ceramic large-size panel in model size 60 x 60 cm on the other (ELA 10.6) – are suitable for use in those areas where electrostatic charge requires a conductive floor covering or where the latter is recommended. The special laying instructions must be followed carefully. We shall be delighted to advise you and to give you assistance for individual applications.

### Eladuct

is especially predestined for those areas where the discharge of static electricity is desired together with the advantages of an unglazed surface (high mechanical-chemical stress resistance).

Examples: gravure and flexographic printing areas, laboratories, rooms for lacquer production, processing and decanting, munitions dumps, chemical production plants etc.

## KERAION ELA 10.6

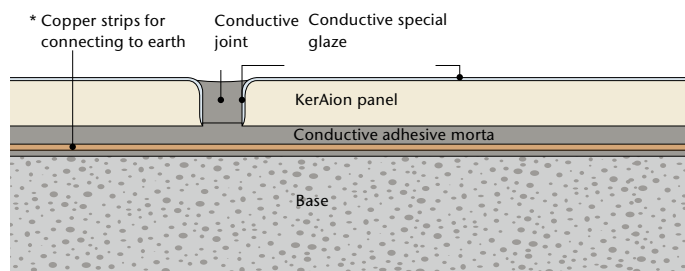

2401 RH - IV  
grey glazed

(RH = non-slip version)

### Sectional Drawing

\* Number and arrangement depending on the technical requirements.  
Connection only by an electrical specialist in line with the relevant guidelines.

In the case of ELA 10.6, static electricity is discharged via the four overglazed panel edges.  
Surface resistance according to Procedure C pursuant to DIN EN 1081: 10<sup>6</sup> Ohm.  
Electrical leakage resistance  $R_{\lambda}$  according to DIN EN 1081: 10<sup>6</sup> Ohm.

### KerAion ELA 10.6

is recommended for those areas where the discharge of static electricity is desired and importance is attached to the advantages of a glazed surface (e.g. very easy to clean) and a generous, representative look.

Examples: office rooms, production rooms for electronic equipment, physical measuring and work rooms, laboratories, rooms for microchip and computer manufacture, medical areas (e.g. operating theatres), telecommunication workshops, sales areas for electronic equipment etc.

In the case of KerAion ELA 10.6, static electricity is discharged via the four overlaid panel edges.  
Surface resistance according to Procedure C pursuant to DIN EN 1081: 10<sup>6</sup> Ohm.

## Modular and timeless

With colors and surfaces matched to one another, slip-resistant tiles from R9 to R12V4 and formats from 30 x 30 to 60 x 60 cm, the tiles of the Emotion series offer architects a great deal of freedom. Emotion ensures good design above all where there are transitions between areas with different slip-resistance requirements. Front cooking in visual contact with the restaurant guests is thus just as possible as the smooth and aesthetically successful coexistence of workshop and showroom in a car dealership.

## Luxurious and harmonious

Whether in combination with natural materials, pastel colors or metal: Evalia adapts to individual home ideas and adds a tasteful, luxurious touch. The large-format R9 floor tiles in grey, beige and anthracite harmonize with the wall tiles in grey beige matt or glossy. Likewise in grey-beige: the Shino decorative element measuring 30 x 60 cm and the R10/B mosaic in 5 x 5 cm whose similar look and feel inject some dynamism into the design. Wall tiles, decorations and mosaics are easy to clean thanks to the Hytect surface. The range of tiles is rounded off by skirtings.

Wall tile 30 x 90 cm, 12 x 36 in, grey beige, smooth

### Decoration Elements

Decorative tile Shino 30 x 60 cm, 12 x 24 in, grey beige, smooth

## Decoration Elements

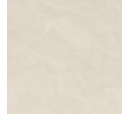

*Decorative tile Shino 30 x 60 cm, 12 x 36 in, grey beige, smooth*

Color deviations are possible and represent a component of the design. The decoration you have chosen is a high-quality glazed earthenware product with a particularly impressive and realistic stone look. The decoration comprises various individual pictures, whose connections are consciously freely designed. Accordingly, individual tiles do not create a continuous design.

<sup>4</sup> The decoration consists of different individual pictures. The connections of the individual pictures are deliberately designed freely and thus do not connect in the continuous laying. The composition of the motifs in the box may vary due to production reasons.

<sup>5</sup> Decoration elements only available in full boxes.

<sup>6</sup> without Protecta upgrading; with Hytect coating

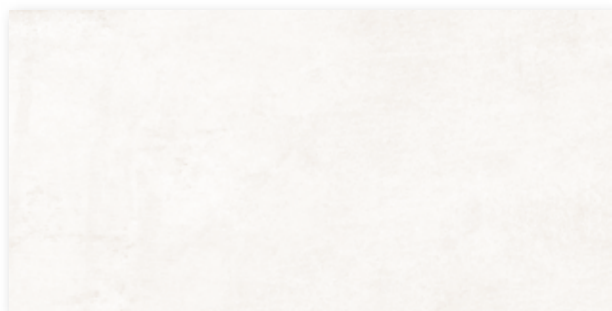

## Authentic surface

The Factory series ceramically transforms lived-in concrete floors into a lively and uncomplicated covering. In combination with classic ornamental accents, the result is a series which combines the style worlds of Industrial & Modern Country in a cosy way. Color shades from both worlds round off the concept and cater to individual design preferences. Factory also includes Circle, a versatile decorative element for walls and floors, which sets accents without appearing fashionable or dominant. All products are Hytect-coated and therefore particularly easy to clean.

## Innovative and robust

Specialists achieve more. This also applies to the ceramic floor tiles of the Ferrum series, which were specially developed for the tough requirements of industrial plants. The integrally colored, unglazed split tiles are particularly slip-resistant and thus prevent accidents at work. They are extremely robust and exceed the compressive strength of concrete or coating materials many times over. A technically sophisticated range of accessories, which includes cove skirtings, nosing tiles and gutter tiles, facilitates the realization of company-specific complete solutions.

<sup>2</sup> Exception: the color colorado-brown corresponds to the DIN EN 14411, group All<sub>A</sub>.

<sup>3</sup> Exception: light-beige granulated: structured, matt

<sup>4</sup> Also available in the color light-beige, granulated on request.

<sup>5</sup> Fitting insert for the outlet: Art. no. 182 - Programme of delivery Pool + Spa 2024 (installation prior to laying)

No pallet rebate is granted for the Nosing Tiles and the Gutter Tiles. Surface to be treated with a suitable impregnation agent! See page 549 in the Technical Information.

## Fresh and modern

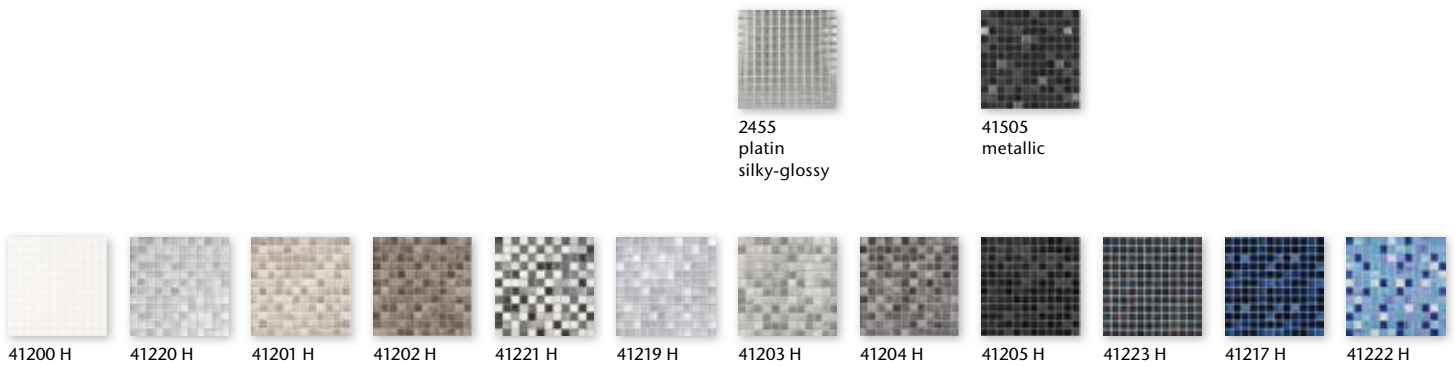

Fresh offers a harmonious range of modern, fresh colors in the popular mosaic formats of 2.5 x 2.5 cm and 5 x 5 cm, with which individual, but at the same time uncomplicated to realize designs are possible. A particularly practical advantage is that R10/B and R11/C slip-resistant mosaics in colors matching the tiles are available.

### With a touch of nostalgia

The Jasba-CLARA collection interprets classic ornamental and geometric tile patterns in a modern and romantic way. Vintage fans love these tiles. Also because they create a soft and distinctive room design in their five delicate tone-in-tone colors and with their two formats. Classic patterns in relief look meet soft cream colors in pink and blue, grey and green. A cosy country house atmosphere is in the air. And the most beautiful sides of the vintage trend. Jasba-CLARA is an eye-catcher in private kitchens, especially when combined with puristic furniture. In the dining area, it immediately creates a homey feeling. In bathrooms or wellness areas, a cocoon of individual security. Especially in wet areas, but also in kitchens, the Hytect properties of the series come in useful. Its surface has an antibacterial effect, prevents the formation of mould and is particularly easy to clean.

Levelling mat Nivella 30 x 60 cm, 12 x 24 in

## Jasba-NIVELLA levelling mat

Jasba-NIVELLA mats solve the problem of levelling height differences between mosaics (6.5 mm) and wall and floor tiles (8 mm). They therefore ensure a consistently even surface conveying a perfect sensation of space. Jasba-NIVELLA is ideal for working with small-format tiles and suitable for use in both indoor and outdoor applications. Another advantage is of an acoustic nature: Jasba-NIVELLA effectively minimizes any hollow-sounding effects. Cut to the required size, the mat is pressed fully into the tile adhesive.

Technical data

Fire class: B2  
 Load resistance: 2 KN/m<sup>2</sup> (category A1-B1)  
 Spot load for tiles in 1 x 1 cm format:  
 not greater than 0,25 KN/cm<sup>2</sup>  
 (approx. 25 kg/cm<sup>2</sup>)

Special conditions for accessories

Levelling mat for commercial and private use in indoor and outdoor applications (walls / floors)

Features:

- Levelling
- Especially under small-format coverings
- No hollow sound
- High tensile bond strength

Product description:

The Jasba-NIVELLA is a special levelling mat which is ideal for combining Jasba mosaics (6.5 mm) with the wall and floor tiles (8 mm) offered. High tensile bond strength as well as bending, tensile and compressive strength are the distinctive performance features of this levelling mat.

Surfaces:

The surfaces on which Jasba-NIVELLA is used must be examined for evenness, loadbearing capacity and surface strength. Differences in floor levels must be eliminated. Adhesion-inhibiting layers must be removed by grinding. Primers co-ordinated to the surface, grout and/or levelling layers must also be used.

Compensation filling and levelling – including for the adjacent coverings – must be performed prior to fitting the levelling mat. Surfaces which are sensitive to moisture must be protected by performing the appropriate sealing measures.

- Cement-based surfaces such as screed or concrete must be at least 28 days old; new screed up to 7 days after accessibility.
- Calcium sulphate screed with residual moisture < 1%
- Poured asphalt screed
- Magnesia/Stonewood screed
- Heated screed
- Dry screed
- Old, firm ceramic coverings
- Old natural stone coverings
- Plasterboard
- Fibre cement boards
- Plaster

Vertical payloads for ceilings to DIN 1055-3 (excerpt)				
Category	Application	Examples	Distributed load q <sub>k</sub> (kN/m <sup>2</sup> )	Point load Q <sub>k</sub> (kN)
A1	Attics	Attic space to clear height of 1.8 m	1.0	1.0
A2	Residential and recreational applications	Rooms with sufficient lateral load distribution such as rooms and corridors in residential buildings, hotel rooms and hospital wards	1.5	–
A3		As for A2 but without sufficient lateral distribution	2.0	1.0
B1	Office and working areas	Corridors in office buildings, office space, doctors' surgeries, wards, recreational rooms incl. corridors, stables	2.0	2.0

Installation:

Apply suitable tile adhesive to the prepared surface in accordance with DIN EN 12004 C2 and DIN EN 12002 S1. Jasba-NIVELLA mats are cut to the required size, fully embedded in the adhesive and laid edge to edge. The tile adhesive is filled consistently in the grooves (mesh structure). The mesh cavities must be 100% filled. Using the corresponding toothed bar, comb out the adhesive and lay the Jasba mosaics. At the earliest after 24 hours, the areas are grouted using a polymer-modified mortar.

Attention:

The correct and therefore successful application of our products is beyond our control. A guarantee can therefore only be given for the quality of our products within the framework of our terms and conditions governing sale and delivery (please refer to [www.jasba.de/impressum.html](http://www.jasba.de/impressum.html)) but not for successful installation thereof. We retain the right to modifications representing technical progress.

## Sometimes luxurious, sometimes casual – always special

Jasba-RONDA is the result of a sophisticated combination of various design and stylistic devices: patina glazes, mesh-like inclusions, historic patterns and intentional omissions. The two colors cement-mix and rust-mix support the effect of a corroded, “lively” surface finish. Available as mosaics in 2.5 x 2.5 cm and 5 x 5 cm and non-slip 5 x 5 cm mosaic (R10/B). All Jasba-RONDA tiles have an easy-clean Hytect surface.

## Zeitgeist meets timeless

The Jasba-SENJA PURE ceramic tile series gives bathrooms and private wellness areas a cosy touch and a warm, lively impression. Its natural colors and finely structured surfaces are trendy and at the same time timelessly beautiful. The result: rooms harmoniously matched to one another in clear vintage style, in pleasantly restrained Nordic Design or in Shabby-Chic-Style. The successful collection has now been extended to include the strong color Shabby-Chic-Brown and large-size natural-white wall tiles – thus offering even more scope for design. Floor tiles are available with a slip-resistant surface, and Jasba-SENJA PURE is easy to clean thanks to its Hytect surface, which makes it hygienic.

## Homage to craftsmanship

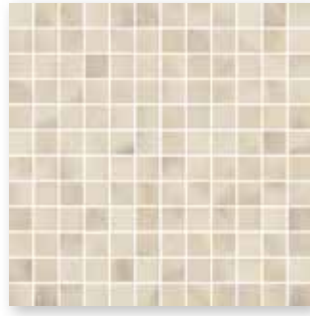

The Karl collection interprets craftsmanship and original glazes in an exceptionally creative manner. Due to the type of glaze and the raw material recipe, different tile patterns are created each time during the firing process, which – laid as surface covering – radiate authentic and elementary appeal: symbolizing the simple life with the focus on the essential. The glazed variant is primarily recommended for wall design; the stone-matt version also for floors thanks to R10/B slip resistance. With the 2.5 x 2.5 cm variant, larger surfaces, columns or other structures can be designed particularly impressively. Like a tailor-made ceramic dress. The Stories series is recommended as suitable floor tile.

## KerAion Special glazes for operating theatres

Ideal for wall coverings in rooms where lasers are used such as e.g. operating theatres. These products perfectly meet the requirements with regard to diffusely reflecting surfaces: incident laser beams are "split up", thus preventing uncontrolled reflection. This is confirmed by the expert opinion of the Laser Medical Centre Berlin and applies to the following types of lasers normally used in medical applications:

- Argon – a typical visible laser
- Nd:YAG – a typical laser in the close-infrared range
- Excimer – a typical UV-laser
- CO<sub>2</sub> – a typical laser in the mid-infrared range

Special advantage of the large model size of 60 x 60 cm: reduced number of joints, therefore easy to clean and hygienic. Perfect complement for the floor: the static electricity conducting panel ELA 10.6 (see page 192), also in model size 60 x 60 cm.

The panels of the series KerAion OP Special Glazes are also available in other sizes (up to the maximum edge length of 120 cm) and glazes. When required, please contact your advisor to customers.

The narrow joints, the large size and the Hytect coating effectively support easy cleaning and a high standard of hygiene.

## Lightness, power and pleasure

Inspired by traditional African art, the Kiano series is both lively and powerful. It is based on a combination of stone and cement characterized by the transformation from calm elements and distinctive changes. The non-slip floor tiles are available in two formats and four colors. Associations with centuries-old cave drawings are intimated by the slightly relief-like "Stroke" wall tile which is also available in oblong format. The "Chess" mosaic sheet in a checker-board pattern is distinctive through its artisanal contours. The "brass" mosaic attributes the African pattern a metallic sheen and rounds off the series.

<sup>4</sup> without Protecta upgrading; with Hytect coating

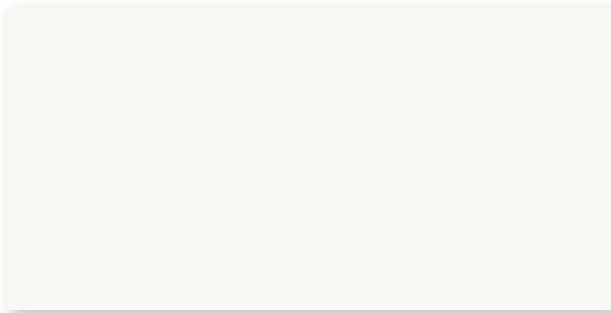

### Elegant and familiar

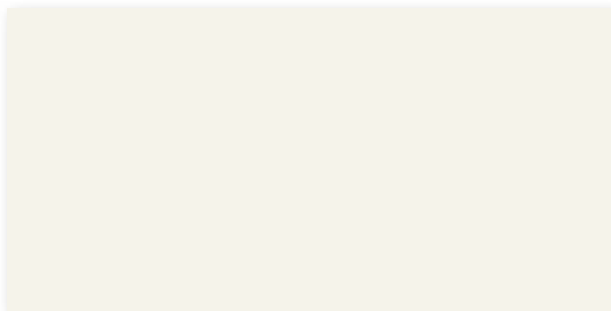

With its classic basic colors, La Casa can be used in different style worlds. All wall tiles are particularly easy to clean thanks to the Hytect surface. With borders and rod mosaics in matching colors, the series offers a small modular system of wall tiles and decorative elements for versatile designs – timeless and discreet.

*Wall tile 30 x 60 cm, 12 x 24 in, white, smooth*

*Wall tile 30 x 60 cm, 12 x 24 in, natural-beige, smooth*

*Wall tile 30 x 60 cm, 12 x 24 in, natural-beige, smooth*

*Wall tile 30 x 60 cm, 12 x 24 in, light-grey, smooth*

*Wall tile 30 x 60 cm, 12 x 24 in, grey, smooth*

## Tiles for living spaces

Tiles for living spaces – private living, gastronomy & hotels or public buildings in which the focus is on well-being. Rooms in which one likes to spend time. LIKE is a tile collection that is made to create a perfect whole in combination with other materials. The look is discreetly lively – fine irregularities give the tiles their unmistakable character and bring out each of the 5 colors perfectly. Whether mosaic or large format, the LIKE series always unfolds its full charm – both in the room and on the terrace.

## Fine and round

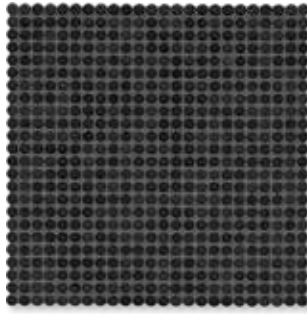

The perfect answer to the trend towards soft, rounded designs is the mosaic Loop. It is available in 15 finely nuanced, high-gloss colors, six of which are also available in a matt, slip-resistant version. This extends the range of applications to showers and other wet areas. In addition to the mosaic with a 2 cm diameter, a 1 cm variant is also available, which conveys a particularly filigree and elegant impression. In contrasting colors, it is also suitable for pictograms, letters, arrows and QR codes. Decorative elements made of square and round mosaic tiles and the Ocean decor with undulating color gradient round off the series.

## Natural design scope

Unique in its ceramic composition and with color nuances between anthracite and white, the series Lounge looks fantastic in any room. The Stone decor with its discreet marble and stone look is the highlight of every room design – on large or small surfaces. The colorful Garden decoration whisks us away to the exotic gardens of this world. All tiles are Hytect-coated and thus easy to clean.

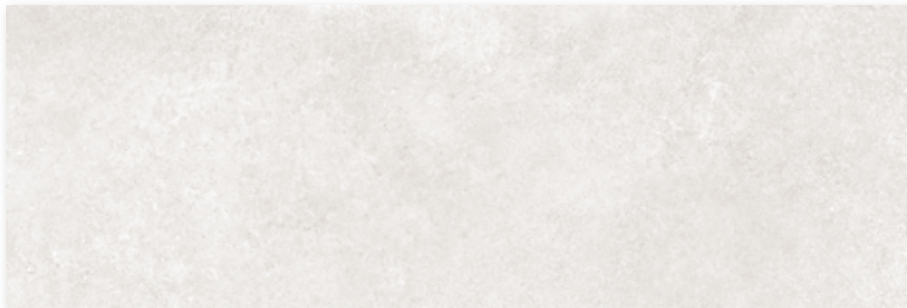

Rendering

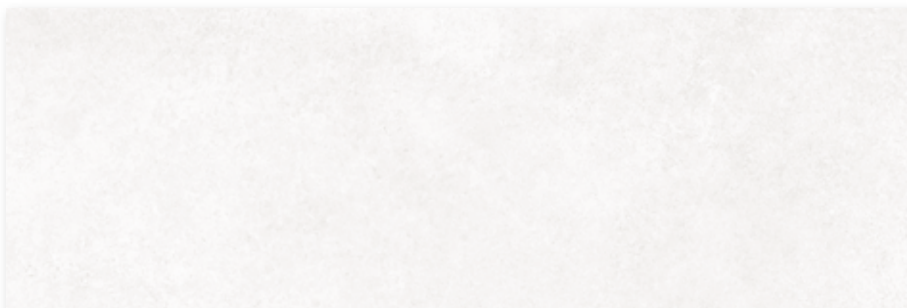

Wall tile 30 x 60 cm, 12 x 24 in, light taupe, structured

Wall tile 30 x 60 cm, 12 x 24 in, grey white, structured

Wall tile 30 x 90 cm, 12 x 36 in, light taupe, structured

Wall tile 30 x 90 cm, 12 x 36 in, grey white, structured

## Decoration elements

*Decorative tile Garden 30 x 60 cm, 12 x 24 in, green mix, structured*

*Decorative tile Stone 30 x 90 cm, 12 x 36 in, grey mix, structured*

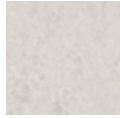

The decoration you have chosen is a high-quality product made of glazed earthenware. The decoration consists of different individual pictures. The connections of the individual pictures are deliberately designed freely and thus do not connect in the continuous laying. The composition of the motifs in the box may vary due to production reasons.

Rendering

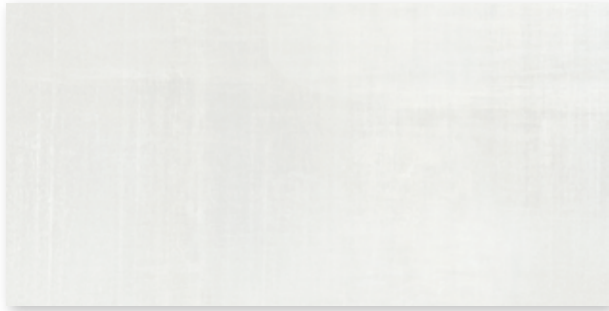

## Natural and casual

The intended used look takes into account natural signs of wear and delicate discolorations. The wall tile is a collage of striped grains and free brush strokes. Overlays and crossings create a non-directional look which unfolds its artistic character especially in the color white – colorful.

Rendering / Architect: STELLWERK architekten, Dresden, Germany

*Wall tile 30 x 60 cm, 12 x 24 in, natural-white, smooth*

## The prince of tides – time for inspiration

Mando lends bathrooms a bright and airy ambience reminiscent of sand, flotsam and wind. Matt or glossy white wall tiles in 35 x 100 cm create a clear framework for the Spirit full decor of the same size – in grey-blue matt or cream-cotto matt. Another visual highlight in matching colors: the Cabana strip decor with a wood mix look in 8.45 x 33 cm. The Walden vintage wood series harmoniously integrates as a floor in this overall idea of authentic naturalness. All Mando tiles are easy to clean thanks to their Hytect surface.

## Possibilities rich in detail

While marble is usually used in large formats, the Marble & More mosaic series captivates with its almost small-scale aesthetics and varied colorfulness. Unlike its natural marble counterpart, this tile is insensitive to aggressive media such as cleaning agents, shampoos and soaps. Slip-resistant variants extend the laying freedom of planners and architects. As Hytect tiles, Marble & More are very easy to clean and they ensure hygiene. In addition, the series is color-coordinated with the Ascona series on the floor and wall.

## Every tile is unique

Natural Ceramics combines creative diversity and traditional craftsmanship in an authentic ceramic product. And as the material is absolutely frost-proof, a uniform, harmonious floor design of indoor and outdoor areas can be realized. The unique play of colors in warm earthy shades offers a great deal of comfort with maximum design freedom. Special pieces for stairs and parapets support the perfect execution of sophisticated room concepts.

Rendering

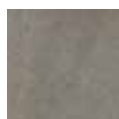

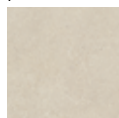

## Endurance test: withstanding any pressure

Floors in supermarkets should be attractive, easy to clean and extremely robust. AGROB BUCHTAL meets these requirements with extra thick tiles in thicknesses of up to 14 mm. With breaking strength values which are considerably higher than required by the relevant standards, the rectified large formats also withstand the loads caused by driving forklift trucks and pallet trucks without any problems. At the same time, extreme robustness is combined with an attractive look: porcelain stoneware surfaces in a wide range of colors offer all the prerequisites for a representative design.

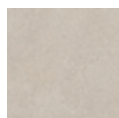

**Design Area Pro**

## Lively and versatile

Thanks to its modular structure in colors and formats, the slip-resistant Nova porcelain stoneware series enables individual solutions in the most diverse areas of application. The look inspired by terrazzo floors comprises eight finely matched color nuances from cream-beige to mid-grey and anthracite-multicolored.

356 OAK

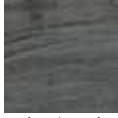

## Easy-care wood look

Oak achieves an elegant and refined wood look – both in the natural and the anthracite variant. The floor series offers 5 different sizes, stair elements, skirtings and a hexagonal floor décor in 30 x 35 cm – all of them with Hytect surface – for plenty of design freedom with a uniform look. A modern touch is provided by three panel formats measuring 30 x 120, 40 x 120 and 60 x 120 cm. These large formats show the grain to its best advantage.

## With a breath of nostalgia

Experiencing original ideas anew, playfully combining motifs indoors and outdoors: with additional patterns and individual decorative elements, the “vintage modular system” of the series PATTERN provides an extensive range of products and perfectly fits into any living style. The Vanda decorative element offers a mix of 12 different floral and geometric motifs. The floral Isola decorative element and the geometric Baleno decorative element are ideal as individual motifs. Thanks to their delicate color compositions, each of the three decorative variants harmonizes with the basic tile in cement-grey. However, they can also be arranged to form larger motifs – or even a ceramic “carpet”.

Rendering / Architect: STELLWERK architekten, Dresden, Germany

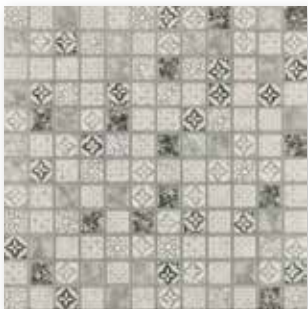

Mosaic 2.5 x 2.5 cm, 1 x 1 in

Mosaic sheet Vola 30 x 30 cm, 12 x 12 in, multicolored, smooth

Mosaic sheet Vola 30 x 30 cm, 12 x 12 in, beige-brown, smooth

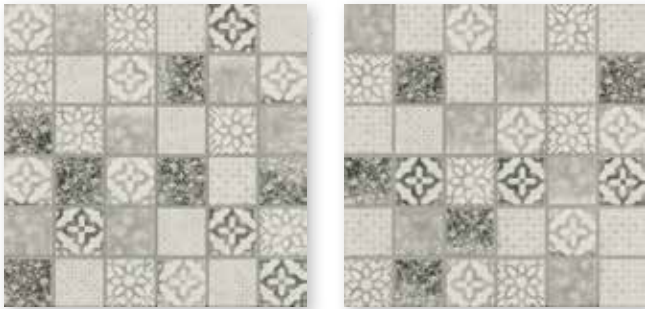

Mosaic sheet Vola 30 x 30 cm, 12 x 12 in, grey, smooth

Mosaic 5 x 5 cm, 2 x 2 in

Mosaic sheet Vola 30 x 30 cm, 12 x 12 in, multicolored, smooth, R10/B

Mosaic sheet Vola 30 x 30 cm, 12 x 12 in, grey, smooth, R10/B

Mosaic sheet Ornamenta 30 x 30 cm, 12 x 12 in, blue, smooth

Mosaic sheet Ornamenta 30 x 30 cm, 12 x 12 in, multicolor, smooth

The Ornamenta decorations are color-coordinated with the decorative elements of the Trio series: Color and Lines (see page 490).

Mosaics glued thermoplastically on back of AGROB BUCHTAL can be used not only in dry zones but also without any problems in underwater areas (e.g. swimming pools/whirlpools) as well as in permanently wet areas.

The articles Vola, Mesh and Ornamenta each depict different motifs. Arrangement and packing are random and arbitrary.

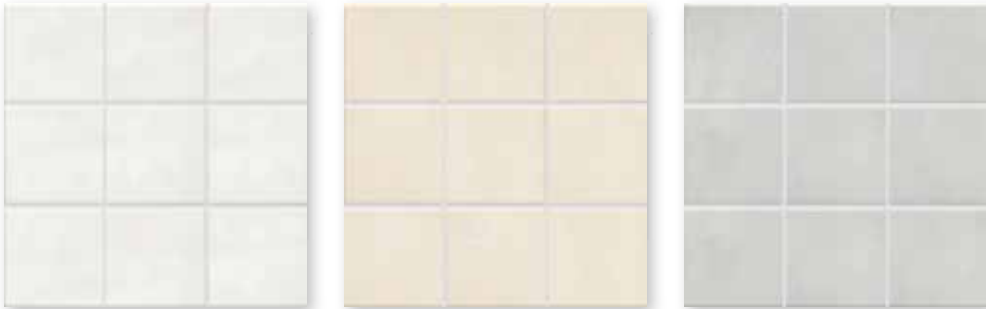

Mosaic 10 x 10 cm, 4 x 4 in

Mosaic sheet Vola 30 x 30 cm, 12 x 12 in, multicolored, smooth

Mosaic sheet Mesh 30 x 30 cm, 12 x 12 in, natural-mix, smooth

Mosaic sheet 30 x 30 cm, 12 x 12 in white, smooth

Mosaic sheet 30 x 30 cm, 12 x 12 in beige, smooth

Mosaic sheet 30 x 30 cm, 12 x 12 in grey, smooth

Mosaics glued thermoplastically on back of AGROB BUCHTAL can be used not only in dry zones but also without any problems in underwater areas (e.g. swimming pools/whirlpools) as well as in permanently wet areas.

Wall and floor tile Ornamenta 15 x 15 cm, 6 x 6 in, blue, smooth

Wall and floor tile Ornamenta 15 x 15 cm, 6 x 6 in, multicolor, smooth

The Ornamenta decorations are color-coordinated with the decorative elements of the Trio series: Color and Lines (see page 490).

The articles Vola, Mesh and Ornamenta each depict different motifs. Arrangement and packing are random and arbitrary.

Wall and floor tile Vola 20 x 20 cm, 8 x 8 in, multicolored, smooth

Wall and floor tile Vola 20 x 20 cm, 8 x 8 in, grey, smooth

The articles Vola and Salina each depict different motifs. Arrangement and packing are random and arbitrary.

Wall and floor tile Salina 20 x 20 cm, 8 x 8 in, multicolored, smooth

Individual motif Nelas 20 x 20 cm, 8 x 8 in, black-white, smooth

Individual motif Mellby 20 x 20 cm, 8 x 8 in, grey, smooth

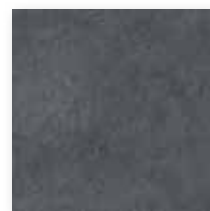

Wall and floor tile 20 x 20 cm, 8 x 8 in, white, smooth

Wall and floor tile 20 x 20 cm, 8 x 8 in, beige, smooth

Wall and floor tile 20 x 20 cm, 8 x 8 in, grey, smooth

Wall and floor tile 20 x 20 cm, 8 x 8 in, anthracite, smooth

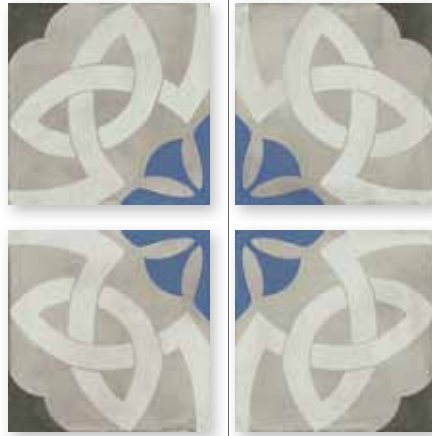

Wall and floor tile

### A quotation from nature

For lovers of a natural look: the strikingly structured surface of the Pizarro series is reminiscent of slate – in a ceramic interpretation. The wall tiles in plain white and delicate grey are a perfect wall cladding for timeless bathrooms in a reduced ambience. For a rhythmic or accentuated look of the wall surface, elegant borders with metallic inlays are available.

Rendering

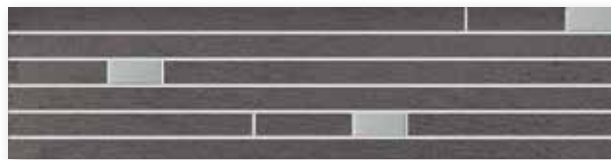

Wall tile 30 x 60 cm, 12 x 24 in, white, structured

## Colorful and flexible

The color range specially developed for Plural comprises 50 colors matched to one another. Whether glazed or unglazed, earthenware, stoneware or porcelain stoneware – the narrow 3 mm joint is just as standard with Plural as the pollutant-reducing Hytect coating and the design in various slip-resistance classes. Thus, Plural can be used in many indoor and outdoor areas: from the facade to the floor, from the underground station to the wellness landscape.

Mosaics glued thermoplastically on back of AGROB BUCHTAL can be used not only in dry zones but also without any problems in underwater areas (e.g. swimming pools/whirlpools) as well as in permanently wet areas.

Do you already know our Mosaic Designer at our website [www.agrob-buchtal.com](http://www.agrob-buchtal.com)?

There, you will have the possibility of designing your individual color gradients, mosaic compositions and the laying of pictures.

Mosaics glued thermoplastically on back of AGROB BUCHTAL can be used not only in dry zones but also without any problems in underwater areas (e.g. swimming pools/whirlpools) as well as in permanently wet areas (e.g. pool surrounds/showers).

Do you already know our Mosaic Designer at our website [www.agrob-buchtal.com](http://www.agrob-buchtal.com)?

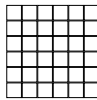

There, you will have the possibility of designing your individual color gradients, mosaic compositions and the laying of pictures.

## Natural and lively

Besides its natural look, Quarzit is impressive because of unusual characteristics, which are based on an innovative glazing process. The glaze, which is enriched with a granulate, is applied and durably bonded to the tile body during firing. The result is a surface vividly nuanced by discreet gloss and mica spots in an authentic stone look. In addition to the aesthetic advantages, there are also practical ones: pleasant haptics is combined with high slip resistance and enormous wear resistance.

<sup>3</sup> On request, also available in a length of 497 mm.

<sup>4</sup> High weight only to carry with two persons.

<sup>5</sup> Minimum order quantity 10 pieces. The price must be calculated individually for orders of less than 10 units.

<sup>6</sup> Short edge rectified

Further details on gutter tiles and grooved tiles in the Pool+Spa delivery programme.

## Elegant and timeless

Structures and colors of various rocks from the Italian coastal region of "Cinque Terre" merge in the Savona floor tile series to create a lively composition of coarsegrained texture and soft layers. A finely dosed granulate application gives the surface a pleasantly stony look and haptics. Mica-like glossy spots underline the natural effect.

## Mix of concrete, ornaments and colors

Even the basic design of the Sento series is convincing with its modern concrete look. And it can be wonderfully combined with the fine floral ornaments of the Blossom decor. Those who want more contrast, simply combine the concrete look with the brightly colored rod mosaic. All tiles of this series – with the exception of the Stripe decor – are Hytect-coated.

## Original and elegant

The porcelain stoneware Sierra series adds originality and naturalness to living areas thanks to its colors and surface look. The color light-beige authentically reflects the characteristics of sandstone and its subtle color layers with typical color variations. In the anthracite variant, block mosaics in various sizes and cutting angles emphasize the masonry character even further. Matching floor tiles in the sizes 5 x 5 cm and 30 x 60 cm are available in the four colors of the series (light-beige, anthracite and light-grey). The floor and stair tiles (30 x 60 cm) are Protecta-upgraded and feature slip resistance R10/A.

## Practical in commercial buildings

With a compact product range, the new Skill floor series offers a practical selection of colors and formats. Fine grains, subtle veinings and soft color transitions with a delicate relief characterize the design. With a material thickness of 9 mm, the porcelain stoneware tiles in the sizes of 30 x 60 cm, 60 x 60 cm and the large format of 60 x 120 cm are perfectly suitable for use in commercial buildings. Two stair tile formats round off the series. All tiles have slip resistance R10/A+B and are particularly easy to clean thanks to the Hytect coating.

## Naturally expressive

Solid Rock – this name alone is a clear statement. And the robust quality of this series is almost set in stone. Solid Rock eliminates the boundaries between inside and outside. Purely aesthetically, because it brings the power of nature into bathrooms, foyers and all other rooms. But there are also unlimited possibilities when it comes to laying. Because interior tiles in combination with Solid Rock patio tiles create seamless transitions between indoors and outdoors. A highlight for hotels and restaurants, but also in private living areas. The lively structure of the tiles accentuates rooms clearly and stringently. The Move wall bond further expands the design freedom for architects and planners. This is due to the different and carefully selected colour shades in which this aesthetically truly stunning tile is available. Solid Rock is Protecta-upgraded and thus resistant to dirt and stains.

## When rooms tell stories

The series Stories is urban to the core: with its cement-like look, timeless grey shades, countless creative options and fascinating opulence. The intentional combination of components of the series reflects the residents' individual preferences: rooms literally tell stories. The floor tiles are convincing thanks to their soft nuances and unadulterated, stone-matt cement characteristics, thus creating an appealingly urban flair. What also makes the series Stories interesting is its two decoration variants: the Tangram cut decor and the Ivy full decor.

<sup>3</sup> without Hytect coating; with Protecta upgrading

<sup>4</sup> Please note: special pallet. No return, no exchange.

<sup>5</sup> High weight only to carry with two persons.

<sup>6</sup> Suitable for the use in areas with stress group 1.

## Cool and urban

Asphalt characterizes the image of urban streets and squares. And it gives the Streetlife floor tile its thoroughly urban look. The typical features such as grainy structures, small unevennesses and cracked textures create a floor covering which is as timeless as it is distinctive and, with a thickness of 10.5 mm, has been specially designed for public applications. Areas of application could be hotels, schools, office buildings and modern shopfitting.

## Fascinating technique and design

With the innovative technique of the bathroom system specialist Gerloff and high-quality porcelain stoneware tiles of AGROB BUCHTAL, a trend-setting novelty was developed: the washbasin and shower floor system SURF® by Gerloff. Thanks to its puristic design, the great variety of materials and the sophisticated drainage technique, SURF® is predestined for the demanding design of modern bathrooms. Whether cement, wood, concrete or terrazzo look – as the washbasins and shower floors can be combined with all tile series and surfaces, the system offers a high degree of creative freedom. If desired, the washbasin and the wall tiles can be combined to form a visual whole, with the washbasin adapting itself to every situation of installation.

Rendering

## The aesthetic tile washbasin

The washbasin is available in the three sizes SMALL (40 x 60 cm), MEDIUM (45 x 80 cm) and LARGE (55 x 120 cm). By the appropriate choice of the surfaces and the combination with matching large-size wall tiles, the washbasin and the wall can be designed as a visual whole.

### Noble and versatile

- » Consistent puristic design
- » Different surfaces
- » Suitable for every situation of installation
- » Low-cost
- » Connection to all commercially available drain valves
- » Easy to clean
- » Jointless
- » Quick, simple installation

#### Washbasin SURF®

<b>small</b>	40 x 60 cm
<b>medium</b>	45 x 80 cm
<b>large</b>	55 x 120 cm

Note: The washbasin is supplied inclusive of the discharge cover, the matching drain outlet "Clou" and the appropriate support. The size and position of the tap hole have to be checked by the customer.

#### Double washbasin SURF®

<b>large</b>	55 x 120 cm
--------------	-------------

Note: The washbasin is supplied inclusive of the discharge cover, the matching drain outlet "Clou" and the appropriate support. The size and position of the tap hole have to be checked by the customer.

#### Washbasin with matching console SURF®

<b>medium</b>	45 x 80 cm
<b>large</b>	55 x 120 cm

Upon request, it is possible to combine the washbasin and the console from different series.

## Ideal tiles for the design shower

The shower floor of the respective series is available in two versions: as SURF® Basic with metal discharge cover or SURF® Slot with the elegant, practically invisible tile discharge cover. The drainage technique is incorporated in the tile completely ready for laying.

## Beautiful and functional

- » Minimalist Design
- » Different surfaces
- » Jointless
- » Easy to clean
- » Syphon screwed to the tile in a watertight manner
- » Low-cost
- » Quick, simple installation

Supplied in the rigid foam block, with sealing material and discharge cover.

## Casual and modern

The look and feel of familiar slate merge in the Timeless series to form a modern surface which exudes timelessness, elegance and coolness. Enabling the range to adapt harmoniously to various style worlds: whether casual, modern or cosy. The highlight of the series is the relief Arita decorative element, developed in collaboration with the designer Fritz Rossmann. In the style of his well-known porcelain bowls, Arita entices you to touch and feel its changing rhythmic notchings – where timelessness meets haptic experience.

## Elementary, modern, representative

With its clear, authentic look and the slip-resistance categories R10/A and R11/B, Trias is almost predestined for modern bathroom design for floors and walls. Numerous format variants are available in zinc-grey, iron ore, sand-yellow, earth-brown or calcite-white: from the decorative 5 cm mosaic to representative tiles. The Protecta-upgraded series Trias is suitable both for wet areas and for all living areas.

## Harmonious style mix

Trio builds a bridge between a craft which has become rare and modern tile production. In the centre of Trio's triad is the floor in a natural cement stone look: clay, natural stone and cement seamlessly layered on top of each other and livened up by coloured small stones. In the decorative tiles, the craftsmanship of terrazzo casting is picked up and interpreted in vivid colours. The variety of forms and colours of the small stones creates a natural, lively overall picture and sets subtle colour contrasts. The glaze colours in the 15 x 15 cm small format form a powerful chord together with the cement stone and terrazzo look of the series. The colour range consists of a clear white and three expressive, slightly tinted mixed colours.

<sup>3</sup> Important: special pallet, no return, no exchange.

## Expressive and versatile

With eight formats, six colors and three slip-resistance categories, the Unique series is suitable for many areas of application. The color spectrum of the Protecta-upgraded porcelain stoneware floor tiles, which ranges from beige to basalt and through to anthracite, the slightly structured, discreet surface as well as the slip-resistance categories R10/A, R10/B and R11/B enable versatile use, also in wet areas.

## Naturalness meets the city

Urban Cotto injects natural elegance into the entire living area. The Protecta-upgraded porcelain stoneware series is convincing thanks to its clear concept: one format in 60 x 60 cm, in classic terra, beige, brown or grey and with R10 slip resistance. For an uncompromising design based on traditional cotto tiles.

## Natural and lively

The Valley porcelain stoneware series was inspired by the panorama of the distant landscape of a valley plain. Its earthy relief and its fine, grainy textures bear witness to this. Each color evokes different associations: of blue or clay slate, river pebbles, sand and earth. The effects of the weather, earth movements, water flows and metallic material deposits also create a lively surface with a typical "mountain-valley" effect. The series is rounded off by an extra thick, frost-resistant patio tile in all four colors, which is also suitable for laying in sand or gravel.

## Powerful, relaxed and timeless

Walden is a classic, natural wood design manufactured in high-quality ceramics. It is a natural product which combines the popularity of authentic wood surfaces with the advantages of ceramic covering materials. The 5 color shades in the classic 20 x 120 cm plank format serve a wide range of different styles and can be combined harmoniously or in contrast with other materials as desired. The slip resistance R10/A+B provides for versatile application possibilities in private and public interiors.

AGROB BUCHTAL offers tiles with overglazed edges in many series. In the case of **split tiles**, overglazed or overglazed rounded edges are available upon request according to the following model number system:

					
Last figure 0 of model no. to be replaced by ...	...1 = Short edge	...2 = Longitudinal edge	...3 = Corner left	...4 = Corner right	overglazed edges
	...5 = Short edge	...6 = Longitudinal edge	...7 = Corner left	...8 = Corner right	overglazed rounded edges (bullnoses)

Example: Standard model no. 18120 = 244 x 119 x 6 mm,  
 model no. 18123 = overglazed corner left

white	0500-N	9003	78

The use of color as an architectural design means has gained increasing importance during the last years. Therefore, we provide you with a list of the relevant AGROB BUCHTAL design series in order to facilitate planning. It classifies the colors according to:

### NCS = Natural Color System

(More detailed information can be obtained from: Skandinavian Color Institute AB, P.O.Box 49022 · S-10028 Stockholm · Phone +46/8/6174700 · Fax +46/8/6174747, Institut für Farbe – Brigitte Hartmann · Rotes Knie 6 · 74389 Cleebrohn Phone 071 35/1 2742 · Fax 071 35/1 2737)

### RAL Color Chart

(More detailed information can be obtained from: RAL – Deutsches Institut für Gütesicherung und Kennzeichnung e.V. · Siegburger Straße 39 · D-53757 St. Augustin Phone +49 (0) 2241/1605-0 · Fax +49 (0) 2241/1605-11)

### Lightness Value:

This figure (standard color value Y) describes the lightness of a color in comparison with an ideally white surface if illuminated under identical light conditions, i. e. same intensity, direction and quality. For an ideal white, which means that all the incident light is reflected, the value Y = 100 applies (black: Y = 0).

Please note that these classifications may only serve as an orientation aid. Original samples will be made available to you upon request.

The difference in lightness of two adjoining colored surfaces is called luminance contrast. By means of this value, one can determine whether a room design is rich in contrast, as it is required, for example, by DIN 32975 "Designing visual information in the public area for accessible use". In the following, you will find the relevant values for selected

series. They result from the respective lightness values, which are indicated as averaged values of individual measurements. We will be pleased to determine values for other products upon request.

Eladuct 10<sup>8</sup>

All references to as well as quotations from product and test standards are to be considered as information which is not binding. The latest versions apply.

**Deutsche Steinzeug tiles present better values than required by the standards.**

In addition, they are construction biologically, ecologically, hygienically and bacteriologically safe; this is guaranteed through the choice of raw materials, method of processing and firing technique.

## Terms and Classification according to DIN EN 14411

All our tiles consist of natural raw materials such as clay, quartz sand and feldspars, which are processed, refined and fired. Depending on the application they are manufactured with a glazed (GL) or unglazed (UGL) surface. They can be classified in accordance with DIN EN 14411 as follows:

### Classification of the ceramic tiles according to their groups of water absorption (E) and their shaping

Shaping	Group I E ≤ 3%	Group II <sub>a</sub> 3% < E ≤ 6%	Group II <sub>b</sub> 6% < E ≤ 10%	Group III E > 10%
<b>A</b> extruded tiles	Group AI <sub>a</sub> E ≤ 0.5% (Annex M)	Group All <sub>a-1</sub> <sup>a)</sup> (Annex B)	Group All <sub>b-1</sub> <sup>a)</sup> (Annex D)	Group All (Annex F)
	Group AI <sub>b</sub> 0.5% < E ≤ 3% (Annex A)	Group All <sub>a-2</sub> <sup>a)</sup> (Annex C)	Group All <sub>b-2</sub> <sup>a)</sup> (Annex E)	
<b>B</b> dry-pressed tiles	Group BI <sub>a</sub> E ≤ 0.5% (Annex G)	Group BII <sub>a</sub> (Annex J)	Group BII <sub>b</sub> (Annex K)	Group BIII <sub>b</sub> (Annex L)
	Group BI <sub>b</sub> 0.5% < E ≤ 3% (Annex H)			
a) The groups All <sub>a</sub> and All <sub>b</sub> are subdivided into two parts (parts 1 and 2) with different product requirements. b) Group BIII essentially applies to glazed tiles. There is a small number of dry-pressed unglazed tiles manufactured with a water absorption of more than 10% to which this product group does not apply.				

Traditionally the following terms are used:

#### Extruded tiles

(marked with A)

Tiles that are cut off with a certain length from a bar formed from the plastic mass by means of an extruder.

#### Dry-pressed tiles

(marked with B)

Tiles that are formed from a finely ground and subsequently granulated mass by pressing under high pressure.

**Split tiles** are frost-resistant, extruded double-tiles which are fired at a temperature of up to max. 1280 °C in upright position.

**Stoneware tiles** are frost-resistant, single extruded vitrified tiles with a firing temperature of appr. 1260 °C.

**KerAion** is the unique extruded ceramic large-size panel from AGROB BUCHTAL.

**Vitrified dry-pressed tiles** are frost-resistant, single dry-pressed tiles with a firing temperature of up to 1200 °C.

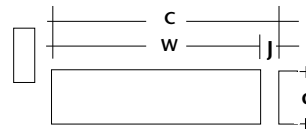

**Porcelain stoneware** stands for especially densely sintered tiles with a water absorption of < 0.5 %.

**Mosaics** are small (porcelain) stoneware tiles stuck onto sheets.

**Earthenware tiles** are non-frost-resistant, single dry-pressed tiles with a firing temperature of up to appr. 1100 °C.

**The water absorption E** in weight-% is determined in accordance with DIN EN ISO 10545-3.

#### Description of dimensions

Coordinating dimension (C) in cm = Work size (W) + joint (J)  
 Work size (W) in mm = Dimensions of the visible surfaces and thickness (d)

## Dimensions and Surfaces

### 1-5. Dimensions, DIN EN ISO 10545-2

All dimensions are determined in accordance with the standard.

Permissible length and width tolerances corresponding to the product standards						
DIN EN 14411	Group AI <sub>a</sub> / AI <sub>b</sub> (25x12.5 cm)		Group All <sub>a</sub> (25x12.5 cm)		Group BI <sub>a</sub> / BI <sub>b</sub> (30x30 cm)	Group BIII (10x10 cm)
	„Nature“	„Precision“	„Nature“	„Precision“		
Deviation from the work size	± 2%, max. 4 mm	± 1%, max. 2 mm	± 2%, max. 4 mm	± 1.25%, max. 2 mm	± 0.6%, max. 2 mm	± 0.2%, max. 2 mm
Deviation from the average side length	± 1.5%	± 1.0%	± 1.5%	± 1.0%	± 0.5%	± 0.5%

The work sizes of our **special pieces** are given according to visual sides.

### 6. Surface Quality, DIN EN ISO 10545-2

The surfaces of 1 m<sup>2</sup> or 30 pieces are tested at 300 lux for visible defects at a distance of 1 m.

### 7. Color Deviations, DIN EN ISO 10545-16

Glazed mono-colored products with values of Δ E<sub>cmc</sub> < 0.75 are considered as identical in color; the value of 1.0 applies to unglazed mono-colored products.

#### 7.1. Color Shade Grading

The color shade code is stamped on the box. Only identical color shades will result in a uniform surface look. In the case of rustic split tiles greater color deviations are normal. During laying, tiles from different boxes should be mixed.

### 8. Size Grading

The production sizes vary for technical reasons. The production size is coded and stamped on the box. Only boxes with the same coding should be laid together. According to VOB, the differences are evened out in the joints.

All references to as well as quotations from product and test standards are to be considered as information which is not binding. The latest versions apply.

# Physical Properties

## 1. Water Absorption, DIN EN ISO 10545-3

The **water absorption (E)** gives the weight increase as compared to the dry weight of samples saturated with water under vacuum.

### 1.1 Apparent Density, DIN EN ISO 10545-3

It gives the ratio between mass and external volume.

## 2. Modulus of Rupture, DIN EN ISO 10545-4

The breaking strength **F** is determined on samples by means of the tree-point load in **N**. From this, the modulus of rupture and the breaking load are calculated according to the following formula.

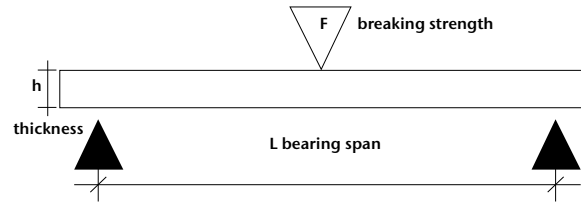

### Modulus of Rupture

$$R = \frac{3 \cdot F \cdot L}{2 \cdot b \cdot h^2}$$

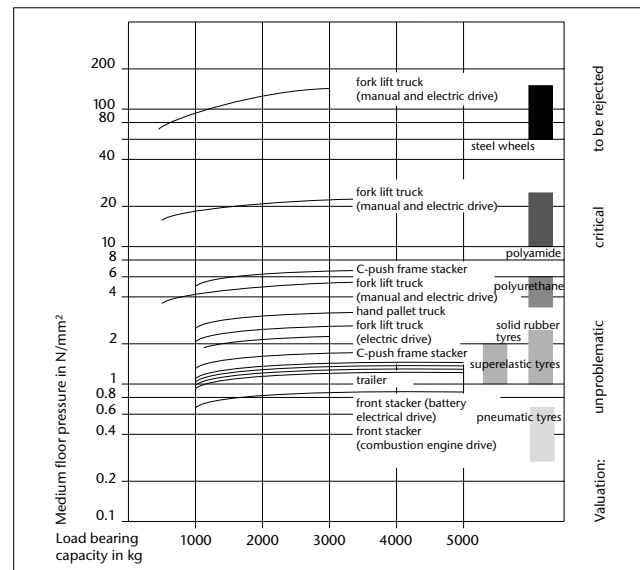

**F** = breaking strength in N  
**L** = bearing span in mm  
**b** = width in mm  
**h** = thickness in mm  
**R** = modulus of rupture

### Breaking Load

$$S = \frac{F \cdot L}{b}$$

Possible Applications	Stress Group
Breaking strength under 1,500 N Housing construction and floor coverings subject to comparable mechanical stress, e.g. hotel bathrooms, rooms in the health service sector	1
Breaking strength 1,500 – 3,000 N Administration, trade and industry (practicable with vehicles with pneumatic tyres), e.g. canteen kitchens, canteens, traffic zones, car exhibition and maintenance areas, sales rooms, always without industrial truck traffic Floor pressures up to 2 N/mm <sup>2</sup>	2
Breaking strength 3,000 – 5,000 N Trade and industry (industrial truck traffic with superelastic, solid rubber and vulkollan tyres), e.g. in food retailing and wholesaling, non-food retailing and wholesaling, shopping malls Floor pressures 2 to 6 N/mm <sup>2</sup>	3
Breaking strength 5,000 – 8,000 N Trade and industry; areas of application as in group 3, but practicable with polyamide rollers Floor pressures 6 to 20 N/mm <sup>2</sup>	4
Breaking strength above 8,000 N Trade and industry; heavy-duty areas with industrial truck traffic with polyamide rollers; runners of metal parts, such as e.g. in factory buildings, assembly halls and storerooms, repair workshops for machines and heavy equipment Floor pressures > 20 N/mm <sup>2</sup>	5

### Floor pressures in N/mm<sup>2</sup> of industrial truck wheels according to a FMPA test in Stuttgart

The table illustrates the floor loads and indicates the effect of the different wheel types: steel wheels should be rejected and polyamide (Nylon and Perlon) is not advisable. Softer tyres (≤ 75 Shore-A-Hardness) as well as larger wheel diameters and wider supporting surfaces are especially advantageous.

### Important note:

The “application possibilities” are of course only recommendations, as the method and quality of laying are decisive factors. Our recommendations are based on conventional, professional laying. With increasing mechanical load as well as harder tyres a thicker tile is required.

All references to as well as quotations from product and test standards are to be considered as information which is not binding. The latest versions apply.

### Mechanical Strength

Deutsche Steinzeug offers tiles in thicknesses from 5 up to 20 mm for extreme loads in industrial and commercial areas.

The breaking load values of our products partly are by far better than the values required by DIN EN 14411 (the relevant test certificates will be made available on request).

The calculated breaking load indicates the suitability for floors subject to mechanical loads. The stress itself is caused by bending rather than by pressure. The “extra strong” tiles from our programme with their high pressure, breaking and bending strength values are the ideal covering for floors subject to heavy loads. They withstand the wheels of industrial trucks, fork lift trucks and platform lift-trucks with their high floor pressure. They are especially suitable as floor coverings for industrial logistics, hyper- and supermarkets.

### 3. Compressive Strength

The compressive strength of tiles is not standardized. In the case of vitrified dry-pressed tiles it reaches values of up to 150 N/mm<sup>2</sup>. The following conversion table shows the importance of a perfect and professional embedding of the tiles on site. The relatively low values for cement and thin-bed mortar can only be compensated by special and professional laying (mortar composition, water/cement value and manual or mechanical compression).

### 4. Resistance to Shock, DIN EN ISO 10545-5

Rebound measurement with 5 samples.

### 5. Resistance to Deep Abrasion, DIN EN ISO 10545-6

With regard to the deep abrasion on unglazed tiles, the abrasion is determined by means of fusion corundum and a rubbing plate. The lower the value, the higher the wear resistance of the material.

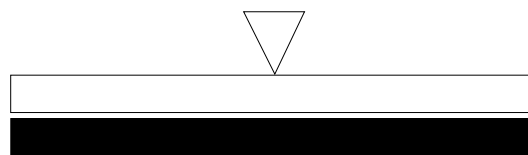

### 6. Glaze Abrasion, DIN EN ISO 10545-7

The abrasion class of glazed tiles is established in the wet test. Artificial abrasion is produced with the help of aluminium oxide grains, steel balls and the addition of water in an eccentrically revolving system. The number of revolutions at which a visible change of the test surface occurs results in the following classification:

#### Resistance to Surface Abrasion

Class	Revolutions
0	100
1	150
2	600
3	750/1500
4	2100/6000/12000
5	>12000*

\* Must pass the stain test according to DIN EN ISO 10545-14.

Vitrified material has a compressive strength approx. 10 - 20 times higher than cement mortar, cast plaster floors and reinforced concrete.

### Conversion table for different materials

Types of material	N/mm <sup>2</sup>	N/cm <sup>2</sup>	kN/cm <sup>2</sup>
Vitrified dry-pressed tiles	100 – 150	10,000 – 15,000	10 – 15
Extruded split tiles	180 – 250	18,000 – 25,000	18 – 25
Cement mortar Gr. III	10	1,000	1
High-grade cement mortar	20	2,000	2
Thin-bed mortar	15 – 30	1,500 – 3,000	1.5 – 3
Epoxy resins	60 – 75	6,000 – 7,500	6 – 7.5
Cement screed CT, C12 (ZE 12)	12	1,200	1.2
CT, C20 (ZE 20)	20	2,000	2
CT, C30 (ZE 30)	30	3,000	3
Mechanically resistant floor 65	65	6,500	6.5
Reinforced concrete C 20/25 (B 25)	25	2,500	2.5
C 30/37 (B 35)	35	3,500	3.5

### Class 0

The use of glazed tiles of this class for floor coverings is not recommended.

### Class 1

Floor coverings in areas mainly walked on in soft footwear or barefoot and not exposed to abrasive dirt (e.g. bathrooms and bedrooms without direct access from outside).

### Class 2

Floor coverings in areas occasionally walked on with soft or normal footwear and exposed to only little abrasive dirt (e.g. rooms in living areas of houses, except kitchens, entrances and similar heavily frequented rooms). This does not apply to special footwear such as e.g. hobnailed boots.

### Class 3

Floor coverings in areas frequently walked on with normal shoes and exposed to little abrasive dirt (e.g. kitchen-cum-living-rooms, halls, corridors, balconies, loggias and terraces). This does not apply to special footwear such as e.g. hobnailed boots.

### Class 4

Floor coverings walked on regularly and exposed to little abrasive dirt, so that they are subject to greater stress as in the case of class 3 (e.g. commercial kitchens, hotels, exhibition and sales rooms).

### Class 5

Floor coverings subject to heavy pedestrian traffic over long periods of time and exposed to little abrasive dirt, so that they are subject to the most extreme stress under which glazed tiles can be applicable (e.g. public areas such as shopping centres, entrance halls of airports, hotel foyers, public footpaths and industrial applications).

Every floor covering is subject to wear. This depends on the area of application and the frequency of use, the kind and degree of dirt as well as the hardness and resistance to wear of the covering material. While unglazed vitrified floor tiles can be used practically anywhere, glazed floor tiles have to be categorized according to stress groups. Scrapers, mats and the like help to remove dirt and abrasives and to protect glazed floor coverings. Something of this kind has to be provided especially in rooms with direct access from outside or from the garden.

### Extreme Stress

For such areas we recommend the use of integrally colored, unglazed tiles, which are available in a wide range of colors and sizes. Examples: floors subject to high traffic loads, e.g. in supermarkets, hotels, schools, administrative buildings, railway stations, hospitals, passageways, etc., taking into account the mechanical load.

### 7. Coefficient of Expansion, DIN EN ISO 10545-8

The coefficient of expansion is ascertained between room temperature and 100°C ermittelt. The measured values are at around  $6.0 \times 10^{-6}$  m/(mK) in the case of vitrified materials and at around  $8.0 \times 10^{-6}$  m/(mK) in the case of porcelain stoneware. At 8 m length and 50° temperature difference the result is a change in length of approx. 2.4 mm in the case of vitrified materials (in the case of screed/concrete 4.6 mm and steel 5.6 mm).

### 8. Thermal Shock Resistance, DIN EN ISO 10545-9

The thermal shock resistance is tested between 15° and 145°C.

### 9. Moisture Expansion, DIN EN ISO 10545-10

The moisture expansion is determined between tempered and water-saturated samples.

### 10. Resistance to Glaze Cracking, DIN EN ISO 10545-11

This test takes place in the autoclave at 500 KPa with subsequent color control.

Glazes with hair cracks/crazes are marked as such and require the wetting of the covering prior to pointing to avoid deposits of fine particles of the pointing mortar in the hair cracks. Colored pointing compounds are not suitable in the case of these glazes. The glaze surfaces must not be marked with felt-tip pen and the like.

### 11. Thermal Conductivity etc.

Thermal conductivity, heat radiation and storage capacity as well as the thermal resistance are not standardized. Vitrified material produces the following approximate values:

Thermal conductivity:	1 W/mK	Heat storage capacity:	0.8 kJ/kgK
Heat radiation:	5.3 W/m <sup>2</sup> K <sup>4</sup>	Thermal resistance:	0.01 m <sup>2</sup> K/W

### 12. Electrical Leakage Resistance

With a volume resistance of  $>10^{10}$  Ohm (DIN EN 1081), our ceramics is insulating in dry condition. With the series Eladuct and KerAion ELA 10.6, however, we offer ceramics for floors capable of discharging static electricity. The glaze of ELA 10.6 has a surface resistance of approx.  $10^6$  Ohm according to DIN EN 1081. The discharge of static electricity is effected from the glaze via conductive joints and tile adhesive into copper strips to be connected to earth, which are laid on the base to be tiled. In the case of Eladuct, the complete tile body is capable of discharging static electricity. The volume resistance according to DIN EN 1081 is approx.  $10^8$  Ohm. Here, conductive joints are not required; apart from that, the base has to be carried out as described for ELA 10.6.

### 13. Steam Diffusion Resistance

According to DIN EN ISO 12572 the steam diffusion resistance is approx.  $\mu$  120,000 in the case of vitrified material/split tiles and  $\mu$  100,000 in the case of earthenware (excluding joints).

### 14. Resistance to Frost, DIN EN ISO 10545-12

The test for frost resistance is carried out on 10 samples or  $>0.25$  m<sup>2</sup> samples. After water saturation under vacuum the samples are checked for defects after 100 frost-thaw alternations.

The resistance to frost of an outdoor flooring, however, does not only depend on the quality of the ceramic tiles used. **Professional construction and laying are essential.** For this, please refer to our specifications and the notice of the umbrella organization of the German building and construction industry "Outdoor Tiled and Paved Coverings".

### 15. Light and Color Fastness

Both glazed and unglazed ceramics are light- and color-fast according to DIN 51094.

### 16. Luminance

The lightness value of a tile describes the brightness of the surface as perceived by the human eye. The measuring value  $Y = 100$  corresponds to the brightness of an absolutely white surface, and  $Y = 0$  to that of an absolutely black surface.

The lightness value is determined for mono-colored tiles.

### 17. Behaviour in Fire

Ceramic tiles are classified A 1 according to EN ISO 13501-1 and DIN EN 14411. Therefore, they are generally non-combustible and thus fire-resistant. Also in the case of fire they do not release any toxic emissions.

## Chemical Properties

---

### 1. Resistance to Chemicals, DIN EN ISO 10545-13

#### Resistance to Household Chemicals and Bath Water Additives

- Household chemicals
  - Ammonium chloride solution 100 g/l
- Bath salts
  - Sodium hypochlorite solution 20 mg/l

#### Classes

A/B/C\*

#### Resistance to Acids and Alkalis

- Low concentration (L)
  - a) Hydrochloric acid solution 3% (V/V)
  - b) Citric acid solution 100 g/l
  - c) Potassium hydroxide solution 30 g/l
- High concentration (H)
  - a) Hydrochloric acid solution 18% (V/V)
  - b) Lactic acid solution 5% (V/V)
  - c) Potassium hydroxide solution 100 g/l

#### Classes

LA/LB/LC or HA/HB/HC\*

#### Acid Protection and Apparatus Engineering

The resistance for acid protection engineering DIN EN 993-16 or chemical apparatus engineering DIN 28062 is subject to individual tests.

\* Class A shows the highest resistance to chemicals, which decreases more and more towards C.

### 2. Stain Resistance, DIN EN ISO 10545-14

#### Stain Forming Substances

- Stain forming substances, leaving traces
  - Green stain forming substances in oil
  - Red stain forming substances in oil
- Chemical stain forming substances
  - Iodine, 13 g/l in alcohol
- Stain forming substances, forming a film
  - Olive oil

#### Cleaning (within the framework of the test)

- Cleaning agent
  - Hot water (+55 °C)
  - Weak cleaning agent
  - Strong cleaning agent
- Solvent
  - Hydrochloric acid solution 3% (V/V)
  - Potassium hydroxide 200 g/l
  - Acetone

#### Classes

Cl. 5 / Cl. 4 / Cl. 3 / Cl. 2 / Cl. 1\*

### 3. Lead and Cadmium Delivery

The glazed surfaces are exposed to a 4 percent acetic acid solution. Then, the quantity of the delivered lead and cadmium is determined.

\* Class 5 shows the highest stain resistance, which decreases more and more towards 1.

## Surface Coatings and Upgradings

### Hytect

Hytect is a highly effective and durable coating of tiles and panels of Deutsche Steinzeug.

The coating baked onto the surface on the base of titanium dioxide uses the principle of the photocatalysis.

It offers the user the following advantages:

#### A) Hytect decomposes bacteria and germs

The surface is activated by sunlight or artificial lighting. Activated oxygen forms, which decomposes microorganisms.

#### B) Hytect eliminates disagreeable odours

Disagreeable or even unhealthy odours in the air are also eliminated by Hytect.

#### C) Hytect reduces the cleaning efforts

The hydrophilic surface makes it possible for water to get under the dirt. In this way the quantity of cleaning agents is considerably reduced, which means a contribution to environmental protection and the saving of time for manual works at the same time.

Hytect surfaces are odourless, non-poisonous, meet the requirements for food and are completely harmless for persons suffering from allergies.

Laying and pointing are carried out by the usual techniques. The conventional agents (without hydrofluoric acid and its compounds) are applicable for cleaning. All additives forming a film, leaving fat on the surface or impregnating are excluded, which impair the surface activation by light.

Renowned institutes in Germany and abroad have confirmed us the corresponding effects of Hytect.

### Protecta Surface Upgrading

#### Better Beats Good ...

Unglazed vitrified tiles are hard-wearing and resistant by nature. Thanks to the Protecta surface upgrading, the stain and dirt resistance could be improved considerably: during the firing process, the coating applied in-plant is ceramically bonded to the biscuit and closes the existing "micropores" quite natural for unglazed ceramics. In this way, the penetration of substances forming stains is prevented. Thus, an impregnation is no longer required and may possibly even have a negative effect in the case of slip-resistant tiles with Protecta surface upgrading, as the impregnating agent can not penetrate the tile but remains on the surface as lubricating film.

Products with Protecta surface upgrading are marked with this symbol in the corresponding series:

### Hygiene

Glazed tiles and tiles with Protecta surface upgrading of Deutsche Steinzeug ensure the best possible hygiene conditions. Thanks to the closed surface, they offer no possibility for germs to proliferate. Tests of institutes for hygiene confirm the suitability for the covering of drinking water reservoirs. Hyper-sensitive people such as those suffering from allergies make the best experiences with tiles.

### Cleaning

On principle, claddings and coverings must be protected by appropriate measures against heavy soiling which may be caused in particular by subsequent construction works (painting etc.).

Our tiles can generally be cleaned with water and a neutral or alkaline cleaning agent.

In the case of hard water, the sporadic use of acid cleaning agents is required. In the case of stains, cleaning depends on the type of stains and has to be carried out with suitable chemicals.

In the case of a higher concentration of the cleaning agent used, subsequent wiping with clear water is required. Rinsing with clear water is absolutely necessary when carrying out a basic cleaning. Cleaning agents containing maintenance additives are not recommended by us. They usually reduce the slip resistance and cause a negative visual appearance of the floor covering by forming layers! Important: the use of cleaning machines with pads containing abrasive grain has a polishing effect by which the slip resistance of the tiles is considerably reduced. We therefore expressly disapprove of such methods. Hydrofluoric acid or its compounds attack the ceramics and cause irreversible damage!

You will find detailed cleaning instructions for ceramic tiles on the Internet at [www.agrob-buchtal.de](http://www.agrob-buchtal.de)

- ➔ Service
- ➔ Architects & Planners / Dealers / Tilers
- ➔ Cleaning instruction.

### Impregnation

Unglazed stoneware without Protecta surface upgrading or Hytect coating should be impregnated in order to prevent the penetration of colored liquids, fats and oils and to facilitate cleaning.

The impregnating agent must be applied on the clean and dry floor; excess material must be removed immediately.

# Slip Resistance

## 1. Coefficient of Friction/Slip Resistance

Workshop rules as well as accident prevention regulations require floors to be smooth, slip-resistant and easy to clean. Special protective measures against slipping are necessary where there is a risk as a result of the use of water, oil, slush, grease or waste. This should be taken into consideration when choosing the surface material. This clear requirement is based on investigations carried out by the insurance companies, which proved that slipping is the primary cause of accidents.

### 1.1. Industrial Areas

Competent authority:

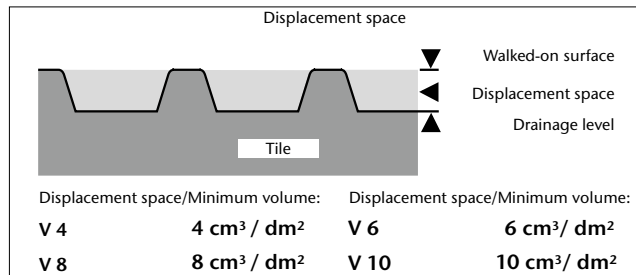

Deutsche Gesetzliche Unfallversicherung,  
Mittelstraße 51, 10117 Berlin-Mitte, phone: +49 (0)30 28876-3800,  
fax: - 3808, www.dguv.de, info@dguv.de

Test standards: DIN EN 16165 and DIN 51133

Guideline: ASR A 1.5 - Floors

Code of practice: DGUV regulation 108-003 "Floors in work rooms and work areas with high risk of slipping" (previous BGR 181)

Test procedure: Inclined plane, safety footwear worn, test medium oil. The surface finish can be smooth, fine-rough, rough or profiled.

The displacement space (V4-V10) is the open space between the upper walked-on surface and the drainage level of profiled surfaces.

## Valuation Groups

In a detailed table (see next page) the required valuation groups are assigned to work areas where there is a high risk of slipping. Information is available from Deutsche Gesetzliche Unfallversicherung and AGROB BUCHTAL.

### Test on "inclined plane"

Valuation groups	Angle of inclination	Industrial + commercial areas
R9	> 6° - 10° low static friction	
R10	> 10° - 19° normal static friction	
R11	> 19° - 27° increased static friction	
R12	> 27° - 35° high static friction	
R13	> 35° very high static friction	

The indicated angles of inclination exclusively serve for the assignment of the valuation groups and can not be equated with the angles of inclination of slopes/ramps.

Slip-resistant tiles are marked with the logo "GRIP" in the corresponding series:

**Legal Basis**

Workshop rules as well as accident prevention regulations require floors to be smooth, slip-resistant and easy to clean.  
The brochure “Technische Regel für Arbeitsstätten” ASR. A 1.5 – Floors (Code of practice for work areas) contains detailed requirements.

9.8.1 Washing-up rooms for 9.1, 9.4, 9.5 R12 V4

9.8.2 Washing-up rooms for 9.2 R11

9.8.3 Washing-up rooms for 9.3 R12

9.9 Dining rooms, guest rooms, canteens including serving counters R9

9.10 Counter area, bar area R10

**10 Cold stores, deep freeze stores**

10.1 for unpacked goods R12

10.2 for packed goods R11

**11 Sales outlets, shops**

11.1 Reception of goods, meat R11

11.1.1 for unpacked goods R11

11.1.2 for packed goods R10

11.2 Reception of goods, fish R11

11.3 Serving counters for meat and sausage R11

11.3.1 for unpacked goods (e.g. loose in transport boxes) R11

11.3.2 for packed goods R10

11.4 Serving counters for bread, cakes and pastries, unpacked goods R10

11.5 Serving counters for dairy products and delicatessen, unpacked goods R10

11.6 Serving counters for fish R12

11.6.1 for unpacked goods R12

11.6.2 for packed goods R11

11.7 Serving counters, except for nos. 11.3 to 11.6 R9

11.8 Meat preparation rooms R12 V8

11.8.1 for meat preparation, except for no. 5 R11

11.8.2 for meat processing, except for no. 5 R11

11.9 Florists shops R11

11.10 Sales areas with ovens R11

11.10.1 for the production of bread, cakes and pastries R10

11.10.2 for the warming up of prefabricated bread, cakes and pastries R12

11.11 Sales areas with chip pans or grills R9

11.12 Shops, customer rooms R10

11.13 Preparation areas for food for self-service shops (except for meat, fish and sausage) R10

11.14 Cash register areas, packing areas R9

11.15 Outdoor sales areas R11 (or R10 V4)

**12 Health service rooms**

12.1 Disinfection rooms (wet) R11

12.2 Pre-cleaning areas of sterilization R10

12.3 Faeces disposal rooms, discharge rooms, unclean nursing work rooms R10

12.4 Pathological facilities R10

12.5 Rooms for medical baths, hydrotherapy, fango preparation R11

12.6 Washrooms of operating theatres, plastering rooms R10

12.7 Sanitary rooms, ward bathrooms R10

12.8 Rooms for medical diagnosis and therapy, massage rooms R9

12.9 Operating theatres R9

12.10 Wards with hospital rooms and corridors R9

12.11 Medical practices, day clinics R9

12.12 Pharmacies R9

12.13 Laboratories R9

12.14 Hairdressing salons R9

**13 Laundry**

13.1 Rooms with continuous-flow washing machines or with spin-drier R9

13.2 Rooms with washing machines at which the clothes are taken out dripping wet R11

13.3 Ironing rooms R9

**14 Fodder concentrate production**

14.1 Dried fodder production R11

14.2 Fodder concentrate production using fat and water R11 V4

**15 Leather production, textiles**

15.1 Wet areas in tanneries R13

15.2 Rooms with fleshing machines R13 V10

15.3 Areas where leather scraps accumulate R13 V10

15.4 Rooms for making leather impermeable by means of grease R12

15.5 Dye mills for textiles R11

**16 Paint shops**

16.1 Wet grinding areas R12 V10

16.2 Powder coating R11

16.3 Painting R10

**17 Ceramics industry**

17.1 Wet grinding mills (processing of ceramic raw materials) R11

17.2 Mixers; handling of materials like tar, pitch, graphite and synthetic resins R11 V6

17.3 Presses (shaping); handling of materials like tar, pitch, graphite and synthetic resins R11 V6

17.4 Moulding, pressure die casting areas R12

17.5 Glazing areas R12

No responsibility is taken for the correctness of the information.

\*) For floors in wet areas walked on barefoot, see DGUV information "Floor coverings in wet barefoot areas" (DGUV information 207-006).

\*\*) Entrance areas according to number 0.1 are all areas with direct access from outside and in which moisture from outside can be brought (also see section 6 para. 3, utilization of products absorbing dirt and moisture). For adjoining areas or other rooms with large surfaces, section 4 para. 10 has to be observed.

\*\*\*) Stairs and ramps according to numbers 0.3 and 0.5 are those possibly exposed to moisture brought in from outside. For adjoining areas, section 4 para. 10 has to be observed.

\*\*\*\*) If the same floor covering was laid in all areas, the displacement space can be lowered down to V4 after a risk assessment (taking into consideration the cleaning method, the working processes and the quantity of slippery substances on the floor).

\*\*\*\*\*) The pedestrian areas which are not subject to a risk of slipping because of weather influences such as driving rain or moisture brought in.

Floors in rooms must not present any irregularities, cavities or dangerous slopes; stumbling must be impossible on these floors. They must be secured against shifting or tilting (e.g. in the case of covers), load-bearing and slip-resistant.

Floors are to be designed without inclination. Exception: functional inclinations outside of permanently installed workplaces, e.g. for the drainage of liquids or for bridging differences in height, e.g. with walkable sloping ramps.

In areas which must be continuously frequented in the scope of their normal utilization, the slip resistances of the different floor surfaces must not differ from each other to such an extent that there may be a risk of stumbling and slipping.

This may be the case if adjoining floor surfaces differ with regard to slip resistance: 1. by more than one R-group in the case of two adjoining areas.

2. by more than two R-groups if the transition to a different slip resistance is clearly visible or is to be expected (e.g. in the case of door passages).

If there is a risk of stumbling or slipping due to different slip resistances, appropriate measures have to be taken, such as transition zones which are at least 1.5 m long in the direction of walking.

Note: It is recommended to design the slip resistance of a floor within a working area as uniformly as possible, e.g. by making sure that other surface qualities within the floor covering, such as covers, markings or films glued on the floor, do not differ from each other by more than one R-group.

Entrances of buildings have to be designed in such a way that dirt and moisture brought in do not cause a risk of slipping. A sufficiently large roofing above entrances of buildings is an appropriate measure for this.

Inside the building, this can be achieved by providing clean-off zones in the form of mats absorbing the dirt and the moisture, which are specially designed for the expected pedestrian traffic with regard to their length, width and the material used and are at least 1.5 m long in the direction of walking over the whole width of the passage.

Clean-off zones must be secured against shifting and must not cause a risk of slipping, e.g. by being flush with the directly adjoining floor covering. Depending on the degree of soiling, clean-off zones must be cleaned or replaced in such a way that their functionality is maintained.

Depending on the operational exposure to slippery substances to be expected, floors in working rooms and areas must be provided with a discharge facility, if required.

The surfaces adjoining discharge openings as well as drain channels should have a slope of at least 2 per cent in order to facilitate the draining of fluid liquids. These areas should preferably be located outside of traffic routes. The discharge of liquids via traffic routes should be avoided, if possible.

Floor surfaces which normally are wet and have to be walked on barefoot, e.g. in swimming pools as well as sanitary rooms such as washing and changing rooms, must be suitable for ensuring safe walking.

## 1.2. Barefoot areas

Competent authority:

Deutsche Gesetzliche Unfallversicherung, Mittelstraße 51, 10117 Berlin-Mitte, tel.: +49 (0)30 28876-3800, fax: - 3808, www.dguv.de, info@dguv.de, www.unfallkassen.de.

Floors in wet barefoot areas, e. g. swimming pools, hospitals as well as dressing rooms, washrooms and showers in sports and work facilities.

Test standard: DIN EN 16165.

Code of practice: DGUV information 207-006 "Floor coverings in wet barefoot areas" (previous GUV-I 8527).

Testing method: Inclined plane, walked on barefoot, wetting agent solution as test medium.

The surfaces are smooth, micro-rough or slightly profiled. "Nonslip" glazes with their micro-rough surfaces have proved to be excellent in practice.

The various areas are assigned to the valuation groups. Information can be obtained from Deutsche Gesetzliche Unfallversicherung and AGROB BUCHTAL.

### Valuation group A

- Barefoot passages and sanitary areas (nearly dry)
- Individual and common dressing rooms
- Pool floors in non-swimmer areas if the water depth is more than 80 cm in the entire area
- Sauna and relaxation areas (nearly dry)

### Valuation group B

- Barefoot passages and sanitary areas, if not classified in group A
- Showers
- Steam baths
- Area of disinfecting spray facilities
- Pool surrounds
- Pool floors in non-swimmer areas if the water depth is less than 80 cm in certain areas
- Non-swimmer sections of wave-action pools
- Movable floors
- Paddling pools
- Ladders and stairs outside the pool area, if not classified in group C
- Accessible surfaces of diving platforms and diving boards, if not classified in group C
- Sauna and relaxation areas, if not classified in group A

### Valuation group C

- Ladders and stairs leading into the water
- Stairs up to diving facilities and water slides
- Surfaces of diving platforms and diving boards over the length reserved for the diver (the slip-resistant surface of the diving platforms and diving boards must cover the front edge where the hands and the toes of the divers grip)
- Walk-through pools
- Inclined pool edge designs
- Kneipp basins, water-treading basins
- Ramps in the pool surround area with an inclination > 6 %
- Starting blocks

Walkable seating areas such as e.g. stands and pedestals near the pool into which moisture can be brought must be treated like floor coverings. If barefoot areas are regularly also walked on with footwear, the requirements according to ASR A1.5/1,2 must be observed in addition.

## Test on "inclined plane"

Valuation groups	Angle of inclination	Barefoot area
A	$\geq 12^\circ$	
B	$\geq 18^\circ$	
C	$\geq 24^\circ$	

The indicated angles of inclination exclusively serve for the assignment of the valuation groups and can not be equated with the angles of inclination of slopes/ramps.

## 1.3. Measurement of sliding friction

Competent authority:

Deutsche Gesetzliche Unfallversicherung, Mittelstraße 51, 10117 Berlin-Mitte, tel.: +49 (0)30 28876-3800, fax: - 3808, www.dguv.de, info@dguv.de, www.unfallkassen.de.

Test standard: DIN 51131

Code of practice: DGUV information 208-041 "Assessment of the risk of slipping under operating conditions" (previous GUV-I 8687).

This test is not a type examination and thus is neither suitable for the choice of floor coverings at the planning stage nor for classification in a slip-resistance valuation group. The method can be applied, e.g. for assessing the success of cleaning measures or in the event of planned changes of utilisation.

For the choice of a floor covering, DGUV information 108-003 (previous BGR 181) and DGUV information 207-006 (previous GUV-I 8527) respectively must be applied exclusively!

## 1.4. Private areas

With regard to slip resistance, ceramic floor coverings in private areas are not subject to standard regulations. Independent of that, however, we recommend that you choose slip-resistant tiles according to your personal safety requirements.

## Color Shade Variation

---

“Color shade variation” refers to the variations in color between the tiles of a certain color, i.e. the degree of shading. Our products are classified into 4 shading coefficients.

**V0** = No variation / no play of colors  
**V1** = Low variation / low play of colors  
**V2** = Medium variation / medium play of colors  
**V3** = High variation / high play of colors  
**V4** = Strong variation / strong play of colors

## Mosaics glued thermoplastically on back: Permanently safe also in wet areas

---

The thermoplastic glueing of mosaics of the brands AGROB BUCHTAL and Jasba is also perfectly suitable for permanently wet and underwater areas. Analyses of independent institutes have proved that no microbiological infestation at the glass fibre net occurs under normal hygienic conditions. With the values  $>0.5\text{N/mm}^2$ , the bonding behaviour after dry and wet storage is better than the values required according to DIN EN 12004. Thus, the thermoplastic glueing on back can be recommended not only for dry areas but also for underwater areas (swimming

pools and whirlpools) as well as for permanently wet areas such as showers and pool surrounds. In addition, the glueing on back facilitates laying and leads to considerable time saving compared to the film on the face side required so far. The glass fibre net on the back largely prevents the penetration of tile adhesive in the joints. The time-consuming removal of the film and possible residues on the tile surface is no longer necessary, and the cladding of columns and curvatures is significantly simplified.

**Quality Controls**  
 Quality controls are carried out by:  
 – manufacturers themselves with strict sorting  
 – controls and special tests by the Deutsche Steinzeug laboratories  
 – individual and batch testing by external material  
 testing institutions in Germany and abroad

## Certificates

The characteristics and the quality of our products are constantly tested by acknowledged material testing institutions. The corresponding test certificates are available.

\* We will be pleased to make a survey of the certified individual products available to you on request.

## Shower Tub System – Area Pro/Plural non-slip/Plural unglazed/Basis 3

The shower tub system consists of special tiles for realizing a shower tub integrated in the tile covering.

The shower tub system is a registered design. It meets the requirements of DIN 18040 “Barrier-free building” and DIN 18025 “Barrier-free living”.

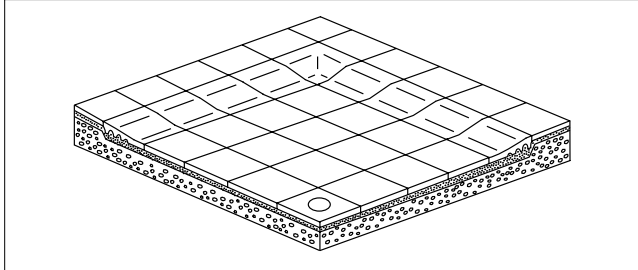

In Germany, the 10 mm lip means that it is possible to take full advantage of various housing grants.

The 100 mm modular dimension inclusive of a 3 mm wide joint guarantees perfectly hygienic tile coverings with a narrow joint width and accurately sized tiles.

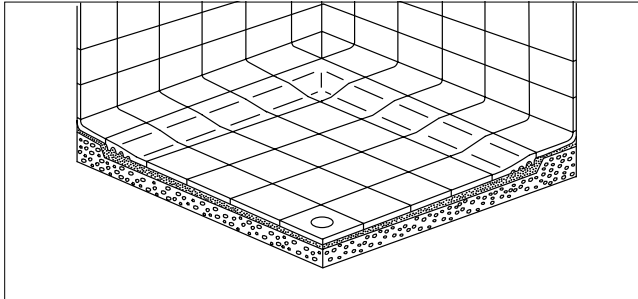

As with all slip-resistant surfaces of Plural non-slip/Plural unglazed, the series Basis 3, the surfaces of both the glazed and the ceramically upgraded unglazed tiles are very easy to clean.

The shower tub system is predestined for wet areas in hospitals, sanatoriums, rehabilitation centres, old people’s and nursing homes, but also for showers in commercial areas, swimming pool, sauna and sports facilities, hotel and private bathrooms.

1. The shower tub is a module with the necessary slope that can be integrated in the joint grid of the tile covering as required.

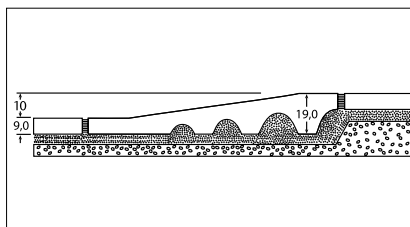

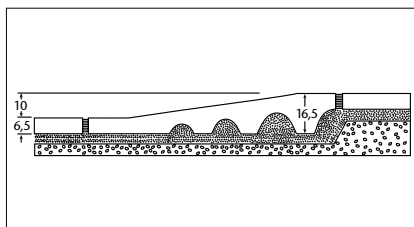

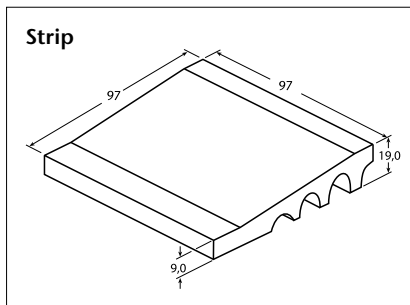

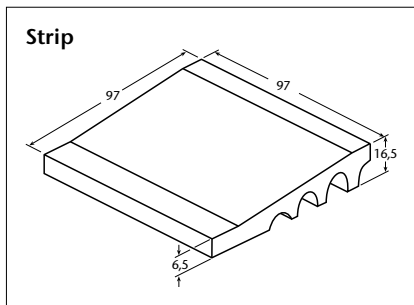

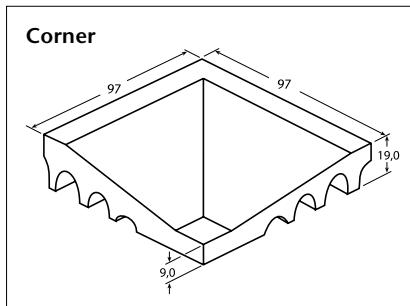

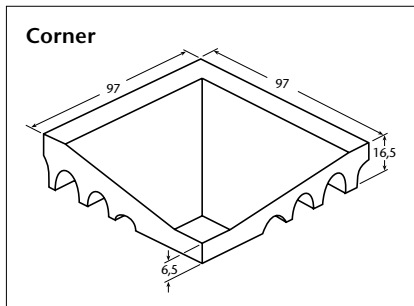

2. In combination with the cove skirting laid horizontally, a rounded transition between floor and wall covering is possible.

**Area Pro, Plural non-slip, Plural unglazed**

**Basis 3 Softcorn**

All references to as well as quotations from product and test standards are to be considered as information which is not binding. The latest versions apply.

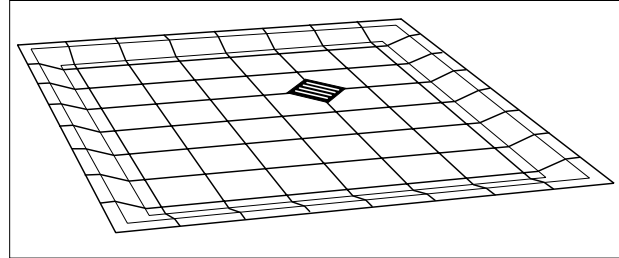

## The Shower Tub System of the Series Chroma / Chroma unglazed – Quantum

This shower tub system consists of only two components: the strip and the one-piece corner belonging to it.

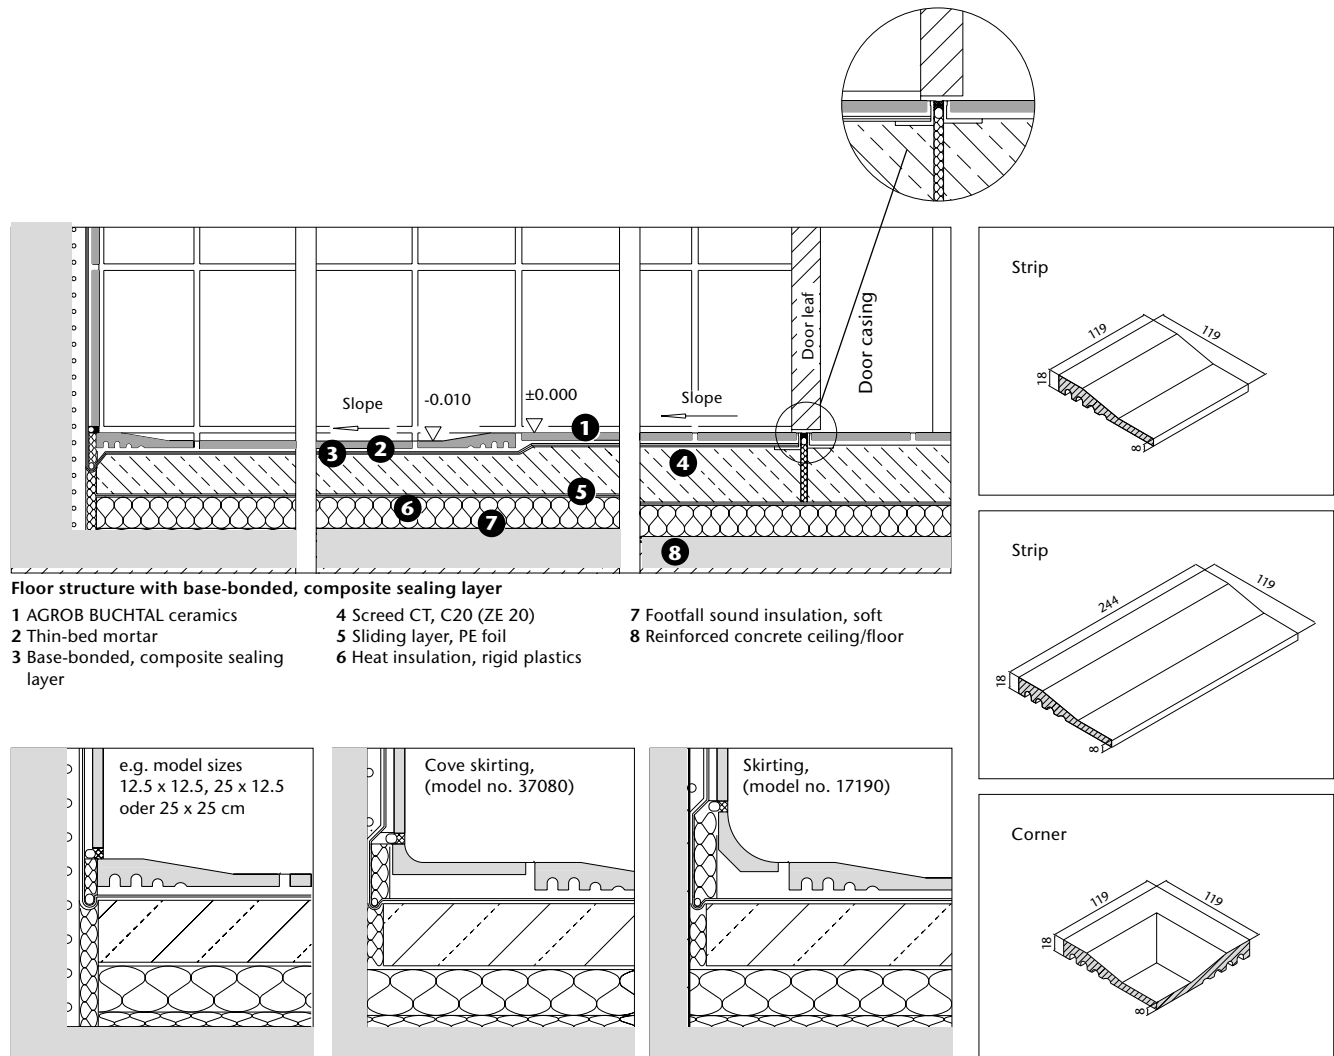

A peculiarity of the system is the special form of the slope which provides a difference in height of 10 mm. The edge of the shower tub designed in this manner is easy to pass on foot and with a wheel-chair. The relevant requirements (DIN 18040 or 18025) with regard to barrier-free construction taking into account the needs of senior and handicapped persons are effectively supported in this way.

Thanks to the “integrated slope” the time-consuming execution of the edge of the shower tub on site is no longer required, and together with the even lower side facilitating laying the processing of these tiles is absolutely simple:

The shower tub system is perfectly completed by the series Chroma / Chroma unglazed – Quantum.

The shower tub system is based on a grid size of 12.5 x 12.5 cm. This permits a very variable dimensioning of the shower tub independent of standard dimensions and a harmonious integration in the shower installation or sanitary block.

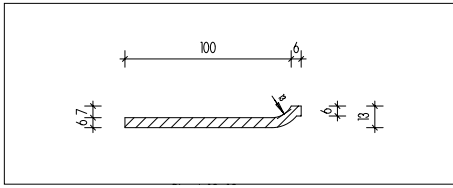

### Wall connection variants

The shower tub systems of AGROB BUCHTAL are laid on a continuous screed and therefore do not require a high-maintenance movement joint between shower tub and adjoining areas.

All references to as well as quotations from product and test standards are to be considered as information which is not binding. The latest versions apply.

## Cove Skirting

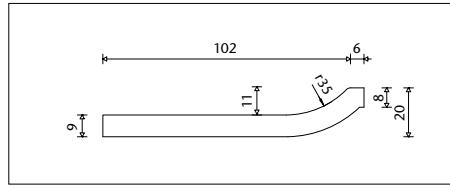

### Cove Skirting 10 x 10 cm

Fitting to:

**Area Pro**, smooth, 10 x 10 cm, unglazed  
**Plural/Plural non-slip**, smooth and slip-resistant, 10 x 10 cm  
**Basis 2**, smooth, 10 x 10 cm, glazed  
**Basis 3**, smooth, 10 x 10 cm, unglazed  
**Plural unglazed**, smooth, 10 x 10 cm

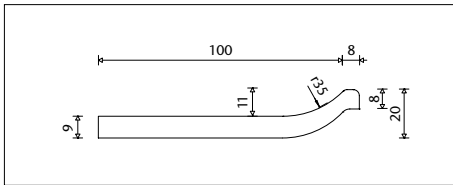

### Cove Skirting 10 x 15, 10 x 20, 10 x 30 and 10 x 60 cm

Fitting to:

**Emotion GRIP**, smooth or Softcorn, 10 x 20, 10 x 30 cm, unglazed  
**Basis 3**, smooth, 10 x 15, 10 x 20 cm, unglazed  
**Basis Pro**, smooth, 10 x 30 cm, unglazed  
**Area Pro**, smooth, 10 x 20, 10 x 30 und 10 x 60 cm, unglazed

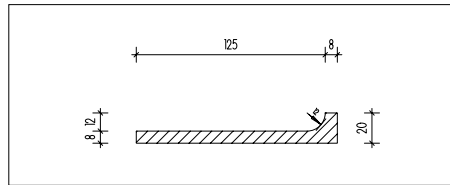

### Cove Skirting 10 x 25, 10 x 50 and 10 x 60 cm

Fitting to:

**Ascona**, structured 10 x 25, 10 x 50, 10 x 60 cm glazed  
**Nova**, smooth 10 x 60 cm glazed  
**Quarzit**, structured 10 x 60 cm glazed

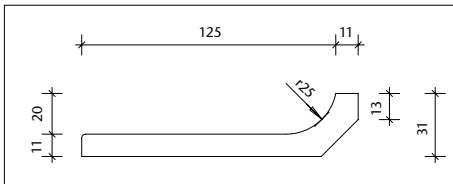

### Cove Skirting 12.5 x 25 cm

Fitting to:

**Chroma unglazed**, smooth, 12.5 x 25 cm, unglazed

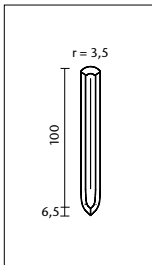

### Cove Skirting 12.5 x 25 cm

Fitting to:

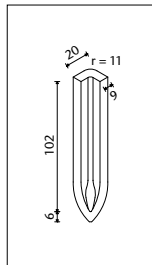

**Ferrum**, smooth, 12.5 x 25 cm, unglazed

### Internal Corner

Fitting to  
cove skirting:

**Plural non-slip**,  
10 x 10 cm, glazed

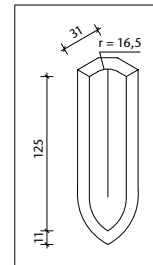

Fitting to  
cove skirting:

**Area Pro**,  
10 x 10, 10 x 20, 10 x 30,  
10 x 60 cm, unglazed

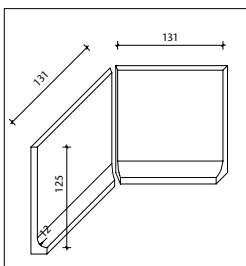

**Emotion GRIP**,  
10 x 20 and 10 x 30 cm,  
unglazed

**Basis 3**,  
10 x 20 cm, unglazed

Fitting to  
cove skirting:

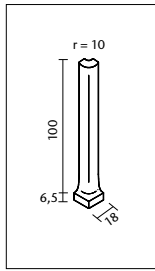

**Ferrum**,  
25 x 12.5 cm,  
unglazed

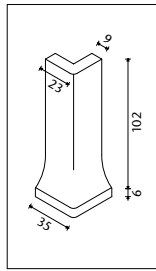

Fitting to  
cove skirting:

**Chroma unglazed**,  
12.5 x 25 cm, unglazed

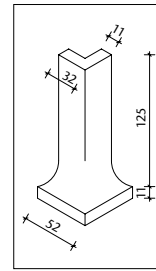

**External corner**

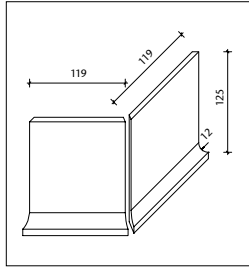

Fitting to  
cove skirting:  
**Plural non-slip,**  
10 x 10 cm, glazed

Fitting to  
cove skirting:  
**Area Pro,**  
10 x 10, 10 x 20, 10 x 30,  
10 x 60 cm, unglazed  
**Emotion GRIP,**  
10 x 20 und 10 x 30 cm,  
unglazed  
**Basis 3,**  
10 x 20 cm, unglazed

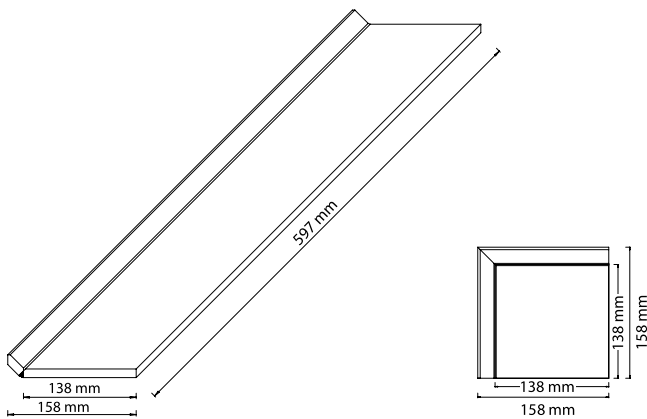

Fitting to  
cove skirting:  
**Ferrum,**  
25 x 12.5 cm,  
unglazed

Fitting to  
cove skirting:  
**Chroma unglazed,**  
12.5 x 25 cm, unglazed

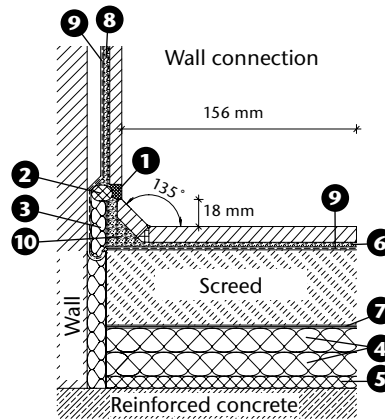

**Cove skirtings, cut/glued 15 x 60 cm and internal corners 15 x 15 cm**

Details: Can be manufactured from any tiles/panels. The look and the haptics correspond to those of the adjoining surface, i.e. both the same structure and the same color are guaranteed. Minimum order quantity for the skirtings: 50 pieces; corner: 50 pieces.

Cove skirting

Corner

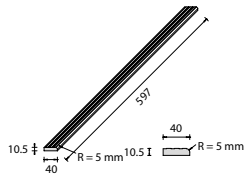

Scale 1:5

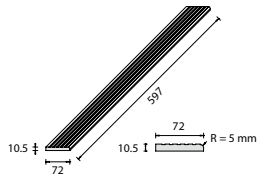

- 1 UW Silicone
- 2 Closed-cell PE foam cord or separating foil
- 3 Water-resistant elastic filling material
- 4 Heat insulation, rigid foam
- 5 Footfall sound insulation, soft
- 6 Mortar / adhesive
- 7 Sliding layer, PE foil
- 8 Thin-bed laying on rendering
- 9 Base-bonded sealing layer
- 10 Solid backfill

Patio tile step with nosing

### 1. Construction Products Regulation (CPR)

The CPR distinguishes itself from the previous Construction Products Directive (CPD) above all by the Declaration of Performance, CE marking as well as assessment and verification of the constancy of performance of the product concerned.

Construction products brought into circulation after 1 July 2013 must comply with the CPR. "Bringing into circulation" means that a construction product is made available on the European market for the first time by the manufacturer. We would like to point out that the term of "provision" is delineated from that; it means the passing on of a construction product brought into circulation in the supply chain, e.g. from the specialist tile trade to end consumers.

Essential characteristics of a construction product – here ceramic tiles – are defined in Annex ZA of the harmonised standard DIN EN 14411.

### 2. CE marking

With the CE marking, the manufacturer indicates that it assumes responsibility for the conformity of the construction product with the performance stated in the Declaration of Performance as well as compliance with all relevant European legal regulations.

Furthermore, it is responsible for making sure that the CE marking is applied to the actual construction product, to a label or on the packaging. The CE marking is the sole conformity identification for all essential characteristics of a construction product. Additional marks may only be used for aspects which – in our case – are not regulated by DIN EN 14411.

### 3. Declaration of Performance

As of 1 July 2013, every manufacturer is obliged to establish a Declaration of Performance for each of its construction products. It thereby assumes responsibility for the conformity of the construction product with the declared performance. The Declaration of Performance replaces the former Declaration of Conformity.

The technical documentation of the manufacturer serves as basis for the Declaration of Performance. Among other things, it includes the results of the in-plant production controls such as e.g. initial tests.

The Declaration of Performance has to be provided with an arbitrary reference number by the manufacturer to which the CE marking refers, thus permitting unambiguous identification of the construction product.

The Declaration of Performance can be made available in printed or electronic form (e.g. by e-mail, CD or USB stick).

In addition, the Declarations of Performance for the construction products of AGROB BUCHTAL GmbH are to be found at [www.agrob-buchtal.de/leistungserklaerung](http://www.agrob-buchtal.de/leistungserklaerung). Alternatively, you can scan this QR code:

Project: Bildungspark Schweizerischer Plattenverband / Location: Dagmersellen, Switzerland / Architect: Amberg Architekten AG, Sursee, Switzerland / Series: Craft / Photo: Adriano Faragulo

Project: Horner Bad / Location: Bremen, Germany / Architect: janßen bär partnerschaft mbB, Bad Zwischenahn /  
Series: Pool edge system Finland, Swimming pool special programme, Emotion, Plural unglazed / Photo: Jochen Stüber

The Pool + Spa programme of delivery contains all information about swimming pool ceramics.

**Easy to find**

Each individual series is always represented as follows:

- Color chart
- Short description
- Product specifications

- 1 **Series name;** sort of material (see page 543) and relevant product standard (see page 544)
- 2 **Schematic arrangement of the models** from left to right: Standard models from small to large: in the case of extruded split tiles, at first rectangular and then square models from small to large, fittings/special pieces

3 **Peculiarities** of the model

4 **Model number** (only in the case of extruded split tiles)

5 **Nominal dimensions** = work size + recommended joint width in centimetres and inches  
**Work size** = only material dimensions without joint

6 **Surface quality**

7 **Logistic product specifications**

8 **Product standard**

9 **Slip-resistance classification:**  
 Barefoot areas/public and industrial areas (see pages 11 and 550 and the following)

10 **Stress groups 1-5;** orientation help for the industrial and commercial sector (see page 545 and the following)

11 **Article number**

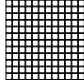

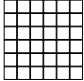

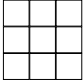

12 **Abrasion**  
 In the case of glazed materials according to stress groups 1 - 5; (see page 546)

13 **Designation and/or number of color**

14 **Price group** (pricing unit in brackets)

15 **Color Shade Variation**  
 ("Color shade variation" refers to the variations in color between the tiles of a certain color, i.e. the degree of shading. Our products are classified into 4 shading coefficients.)

- V0** No variation / no play of colors
- V1** Low variation / low play of colors
- V2** Medium variation / medium play of colors
- V3** High variation / high play of colors
- V4** Strong variation / strong play of colors

**The following symbols are used:**

-  Hytect surface (for description, refer to pages 10 and 549)
-  Protecta surface upgrading (for description, refer to page 549)
-  Novelties
-  no shodfoot traffic
-  Rectified
-  Conically rectified
-  Rectified wall tiles with rounded, bevelled edges
-  Make-to-order production: return and/or cancellation of ordered products not possible
-  Orientation aid for the blind analogue to the requirements of DIN 32984
-  Frost-resistant
-  **R9** Slip-resistant
-  **B** Slip-resistant / Barefoot areas
-  Made in Germany
-  Glued thermoplastically
-  also available in other colors
-  6 mm tile
