

archgola®

Outside is better.

Outside is better.

Kiwis love being outside.
The forecast often has other ideas.

Archgola® has a simple mission:
make it easier to enjoy life outdoors,
whatever the weather.

Throwing shade since 1998

Our journey began with a simple belief: that "Outside is better", and every Kiwi home deserves a functional, beautiful space to enjoy it, come rain or shine.

For over 25 years, Archgola® has helped Kiwis make the most of their outdoor spaces with custom-made canopies designed specifically for New Zealand's unique weather and lifestyle. From small beginnings in 1998, we have grown to become the leading supplier of outdoor shelters, trusted by more than 15,000 New Zealanders to transform their homes and extend their living spaces.

The best shade since trees.

We've been perfecting the art of quality shade for decades, so you can trust our canopies to stand the test of time.

ARCHGOLA.CO.NZ

Measured up and made to last.

At Archgola®, we believe creating your ideal outdoor space should be simple. Our straightforward process, guided by your local expert, ensures you get a quality result with no stress and no surprises.

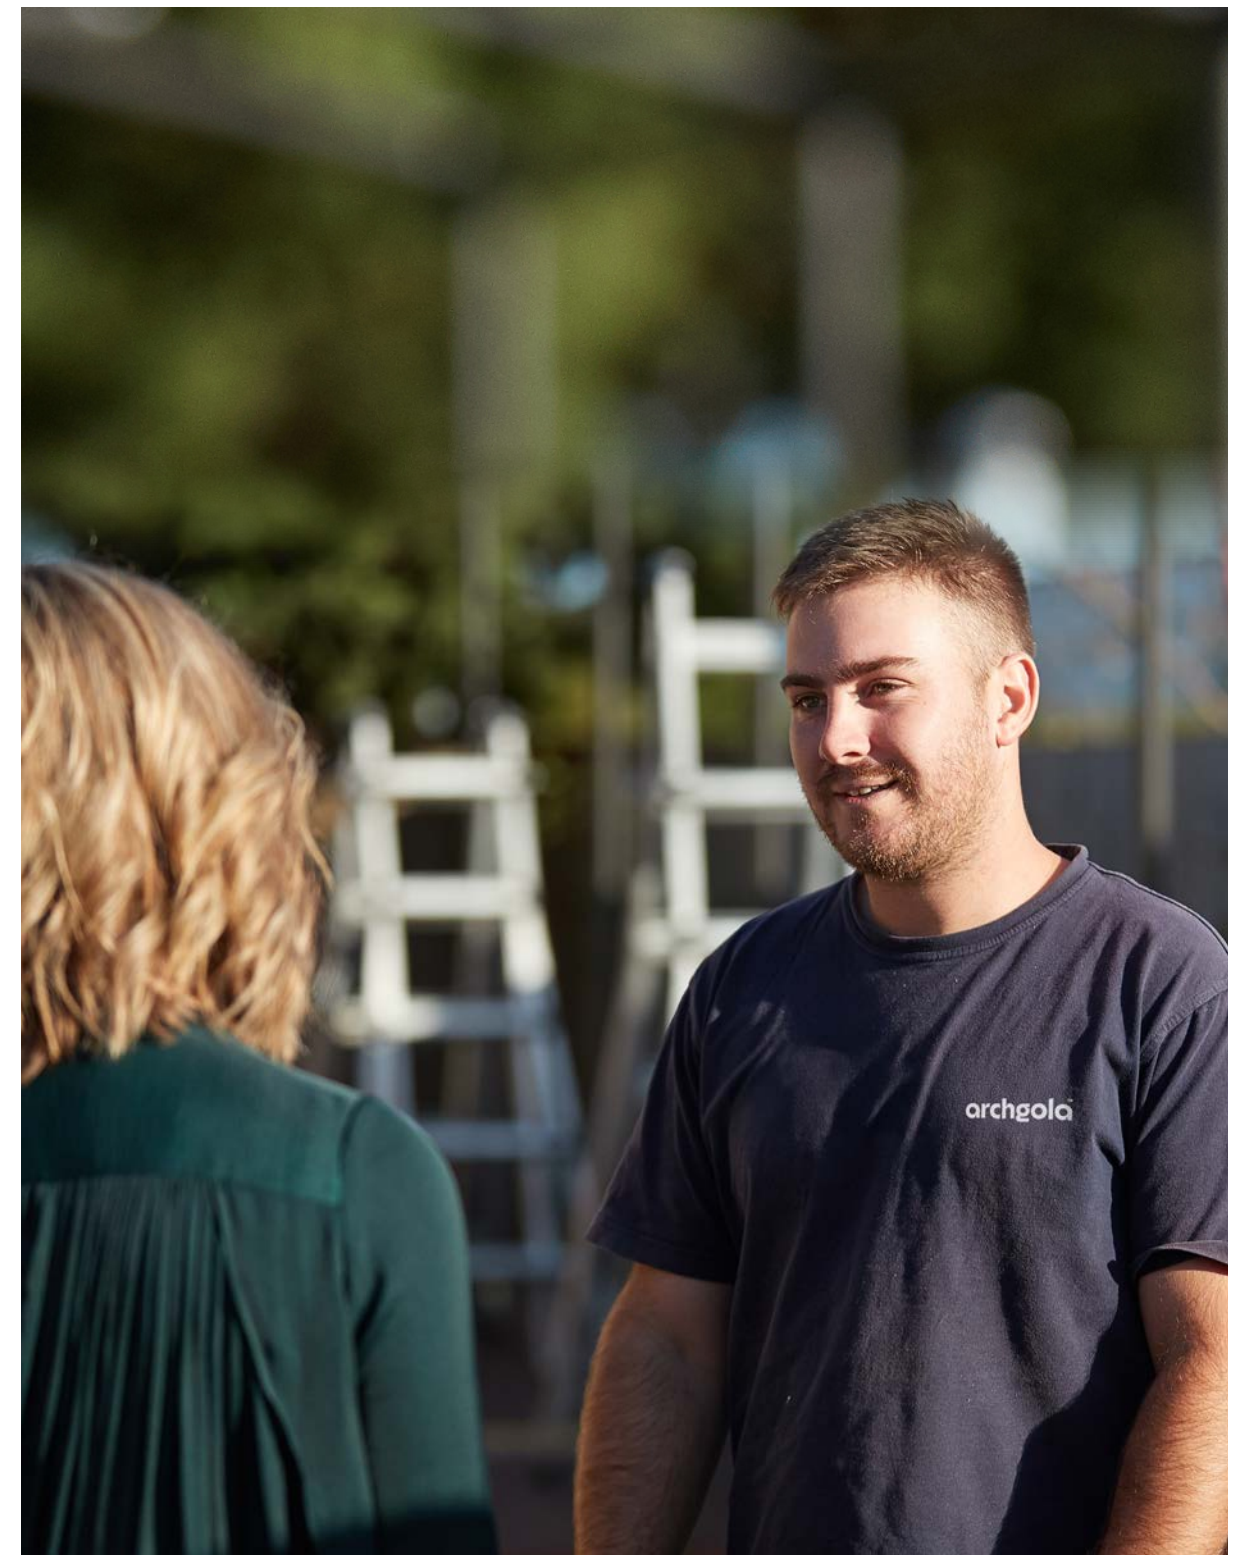

- ① **Free no-obligation on-site consultation.**

It all starts with a friendly conversation. Your local Archgola expert will visit your home at a time that suits you for a free, no-obligation consultation. We'll listen to your needs, discuss your vision, assess your space, and answer all your initial questions, offering personalised advice right from the start.
- ② **Custom designed concept & personalised quote.**

Based on our consultation, your expert will develop a custom design concept for your Archgola canopy or outdoor blinds. You'll receive a detailed proposal and a fixed price—so you know exactly what to expect, with no hidden surprises. We'll refine the design with you until it's perfect.
- ③ **NZ manufacturing & professional installation.**

Once you're happy to proceed, we confirm your order. Your custom Archgola solution is then manufactured with precision right here in New Zealand, using high-quality materials to ensure durability and a flawless finish. Installation typically only takes one day, and we make sure we keep you informed on timelines.
- ④ **Welcome to better outdoor living!**

With your stunning new Archgola installed, we'll do a final walkthrough with you. We'll provide simple care and maintenance tips, along with your comprehensive warranty details. And remember, your local expert is always here to help with any future questions or support you may need.

Workmanship Guaranteed.

With every canopy and outdoor blind we install, we've got you covered. Archgola provides a comprehensive warranty package, so you can have complete peace of mind knowing your new outdoor space is built to last.

Help is just up the road.

We're a team of locals, so you'll
always have a familiar face and a
helping hand just around the corner.

ARCHGOLA.CO.NZ

We've got you covered.

Our nationwide network of qualified Archgola® specialists deliver expert shade solutions and professional installation across New Zealand.

These passionate individuals operate their own Archgola licenses, providing you with truly personalised service from your first chat through to the final installation and beyond.

This means you get the accountability and care of a local business, powered by the quality and innovation of a leading national brand.

Our experts offer:

- Personalised on-site consultation
- In-depth product design knowledge
- Professional installation
- Expert guidance, every step
- Accessible maintenance & care support

Engineered for strength.

Our design criteria meets New Zealand building codes and are certified by an independent structural engineer.

Crack a cold one.

Custom-designed canopies & blinds to help you make the most of your outdoor living, all year round.

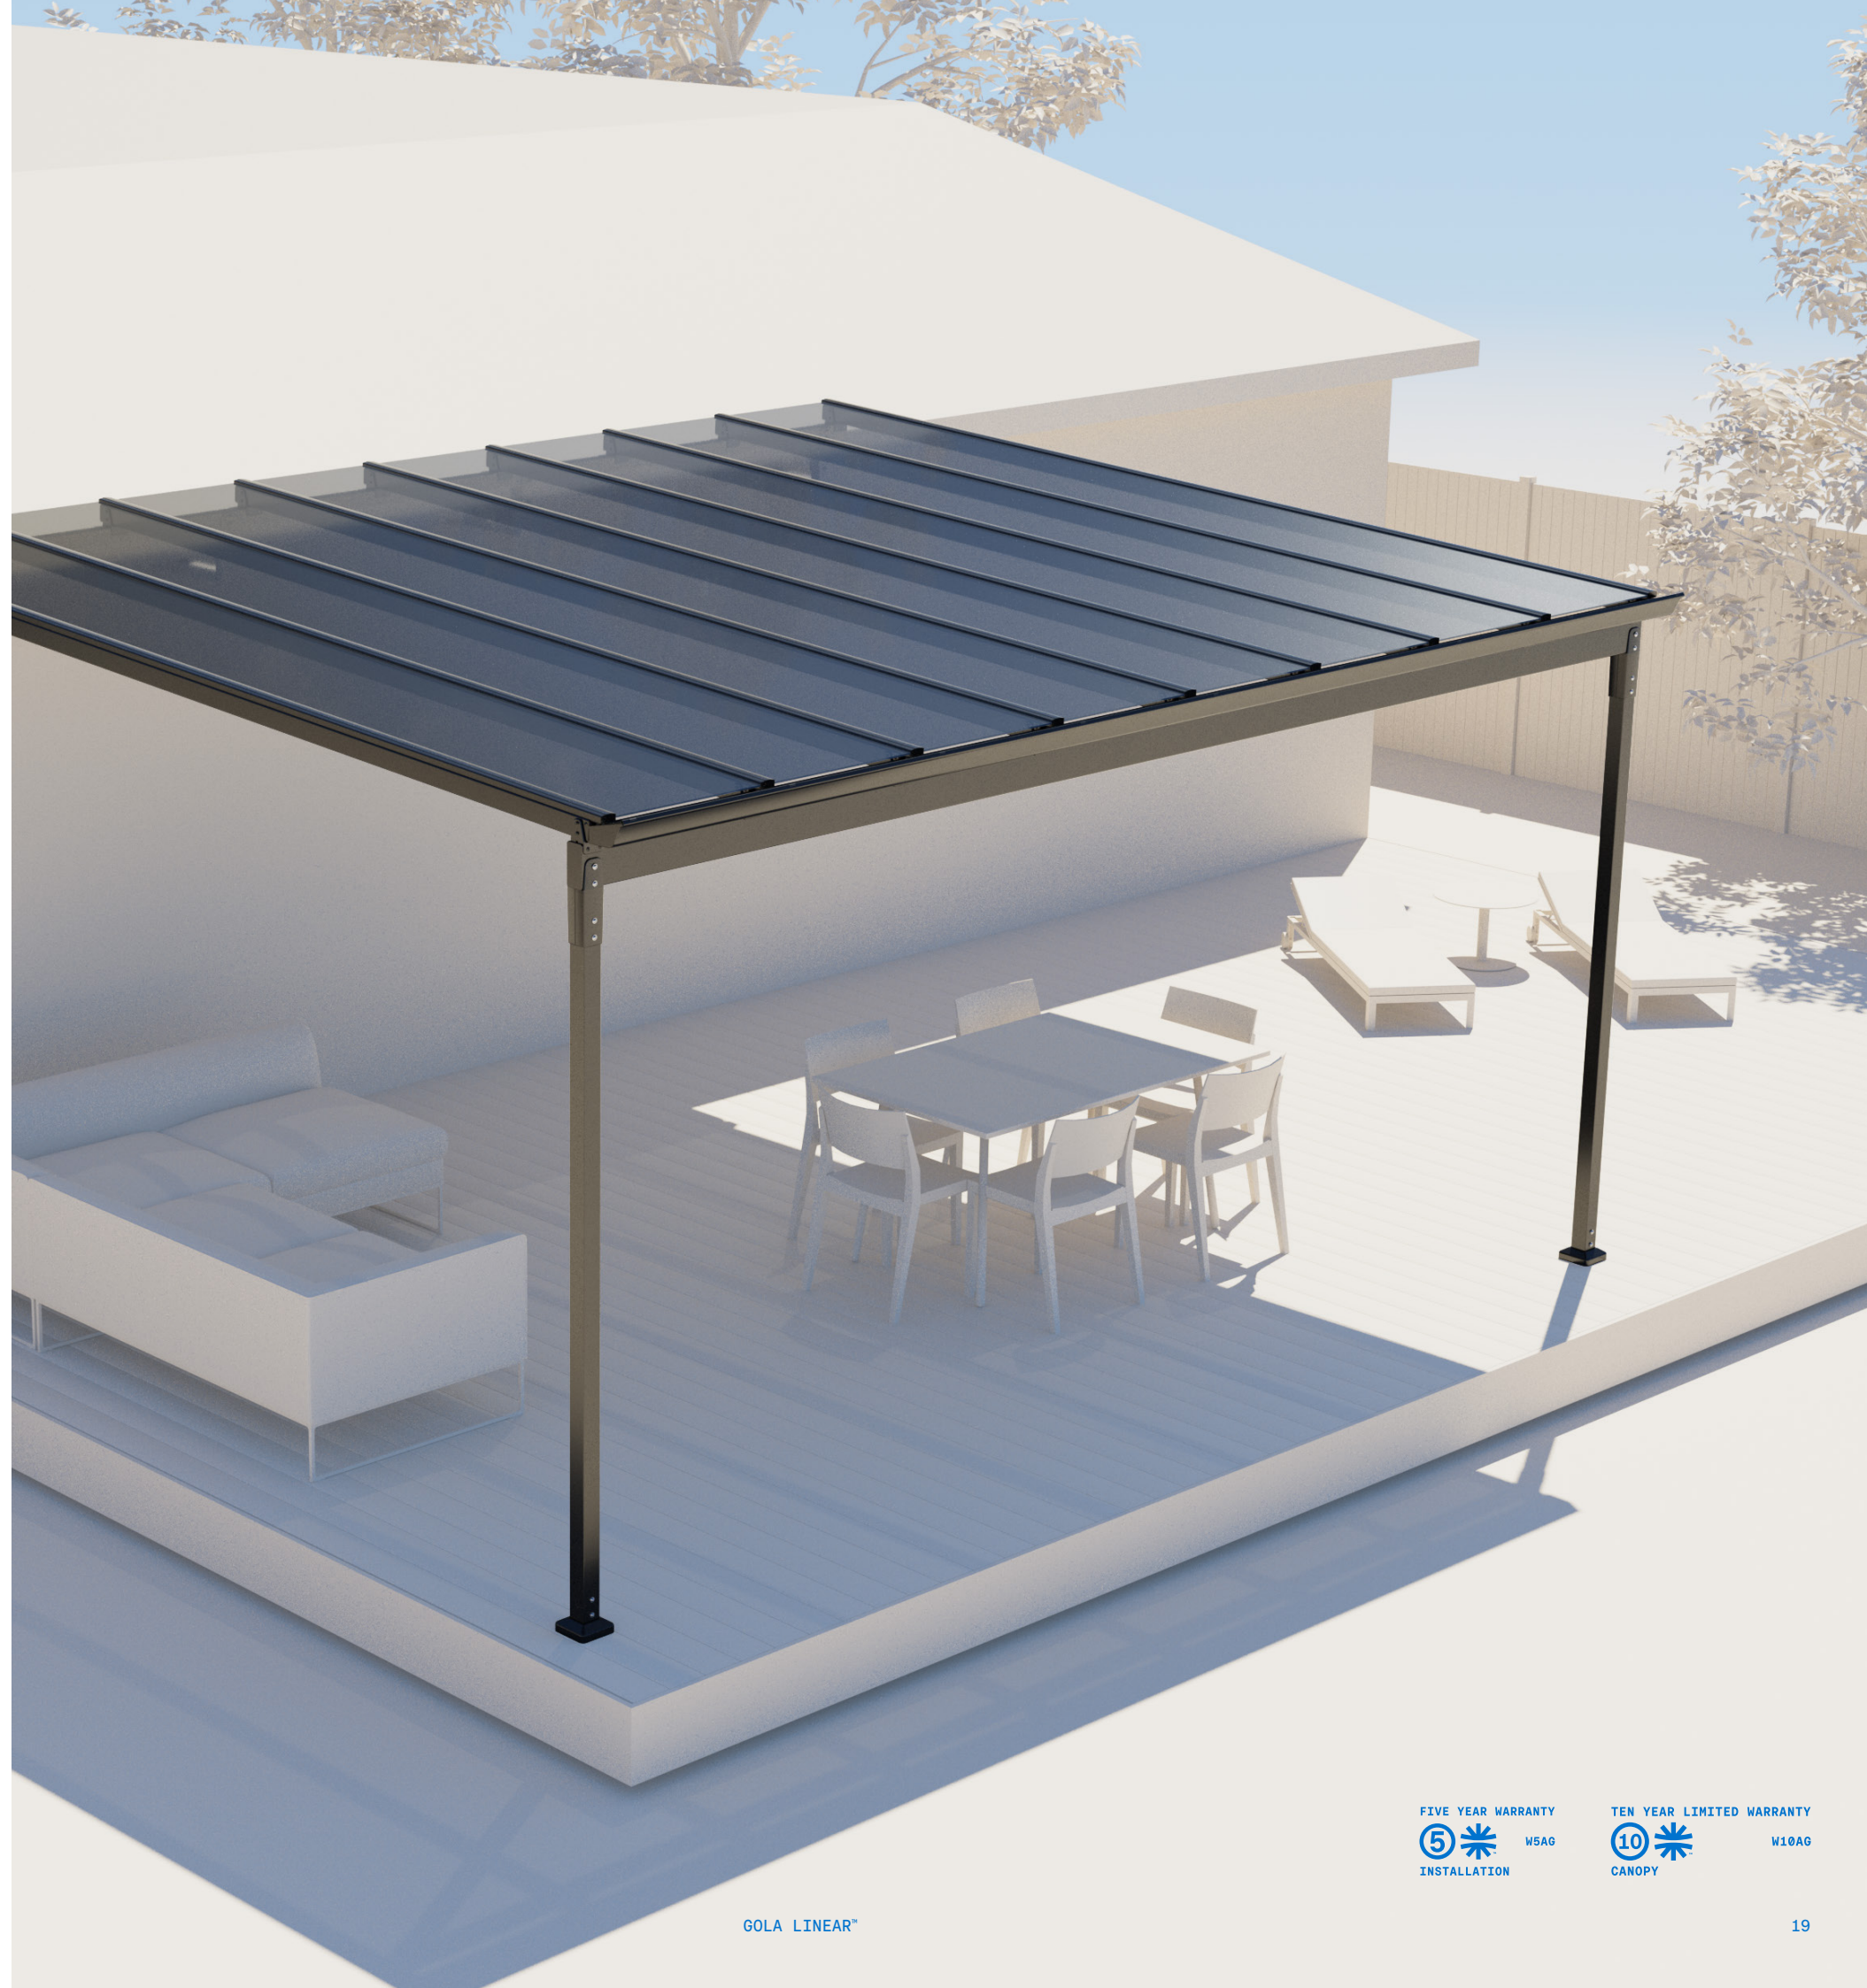

ARCHGOLA.CO.NZ

Gola Linear™

- ✓ Modern look
- ✓ Sleek lines
- ✓ Fewer posts

Designed with a modern, sleek look to perfectly complement the clean lines of contemporary NZ architecture.

Intelligent engineering allows for wider spans with fewer posts, creating expansive, open-air spaces with fantastic indoor-outdoor flow and uninterrupted views.

Modern Look.

Clean, minimalist lines for a sharp, contemporary finish. Linear's flat roof profile integrates neatly with today's architecture and makes the most of that indoor—outdoor connection.

Made for modern living.

Sleek lines.

Strong, high-quality aluminium and pre-galvanised NZ steel combine for a refined frame that's as sturdy as it is sleek.

Fewer posts.

Engineered for generous spans with fewer interruptions, giving you more open space underneath and better views out.

Sleek simplicity.

Gable.

Classic pitched roof design for extra height and light.

Alcove.

Attaches to three sides to neatly cover U-shaped spaces.

Rectangle.

Attaches neatly along one side of your home. Simple.

A profile that fits.

The Gola Linear™ offers two roof profile options to get that perfect look and feel for your place, adapting seamlessly to your home's unique architectural profile.

STRAIGHT

The standard profile provides a sophisticated, minimalist look that is both timeless and contemporary.

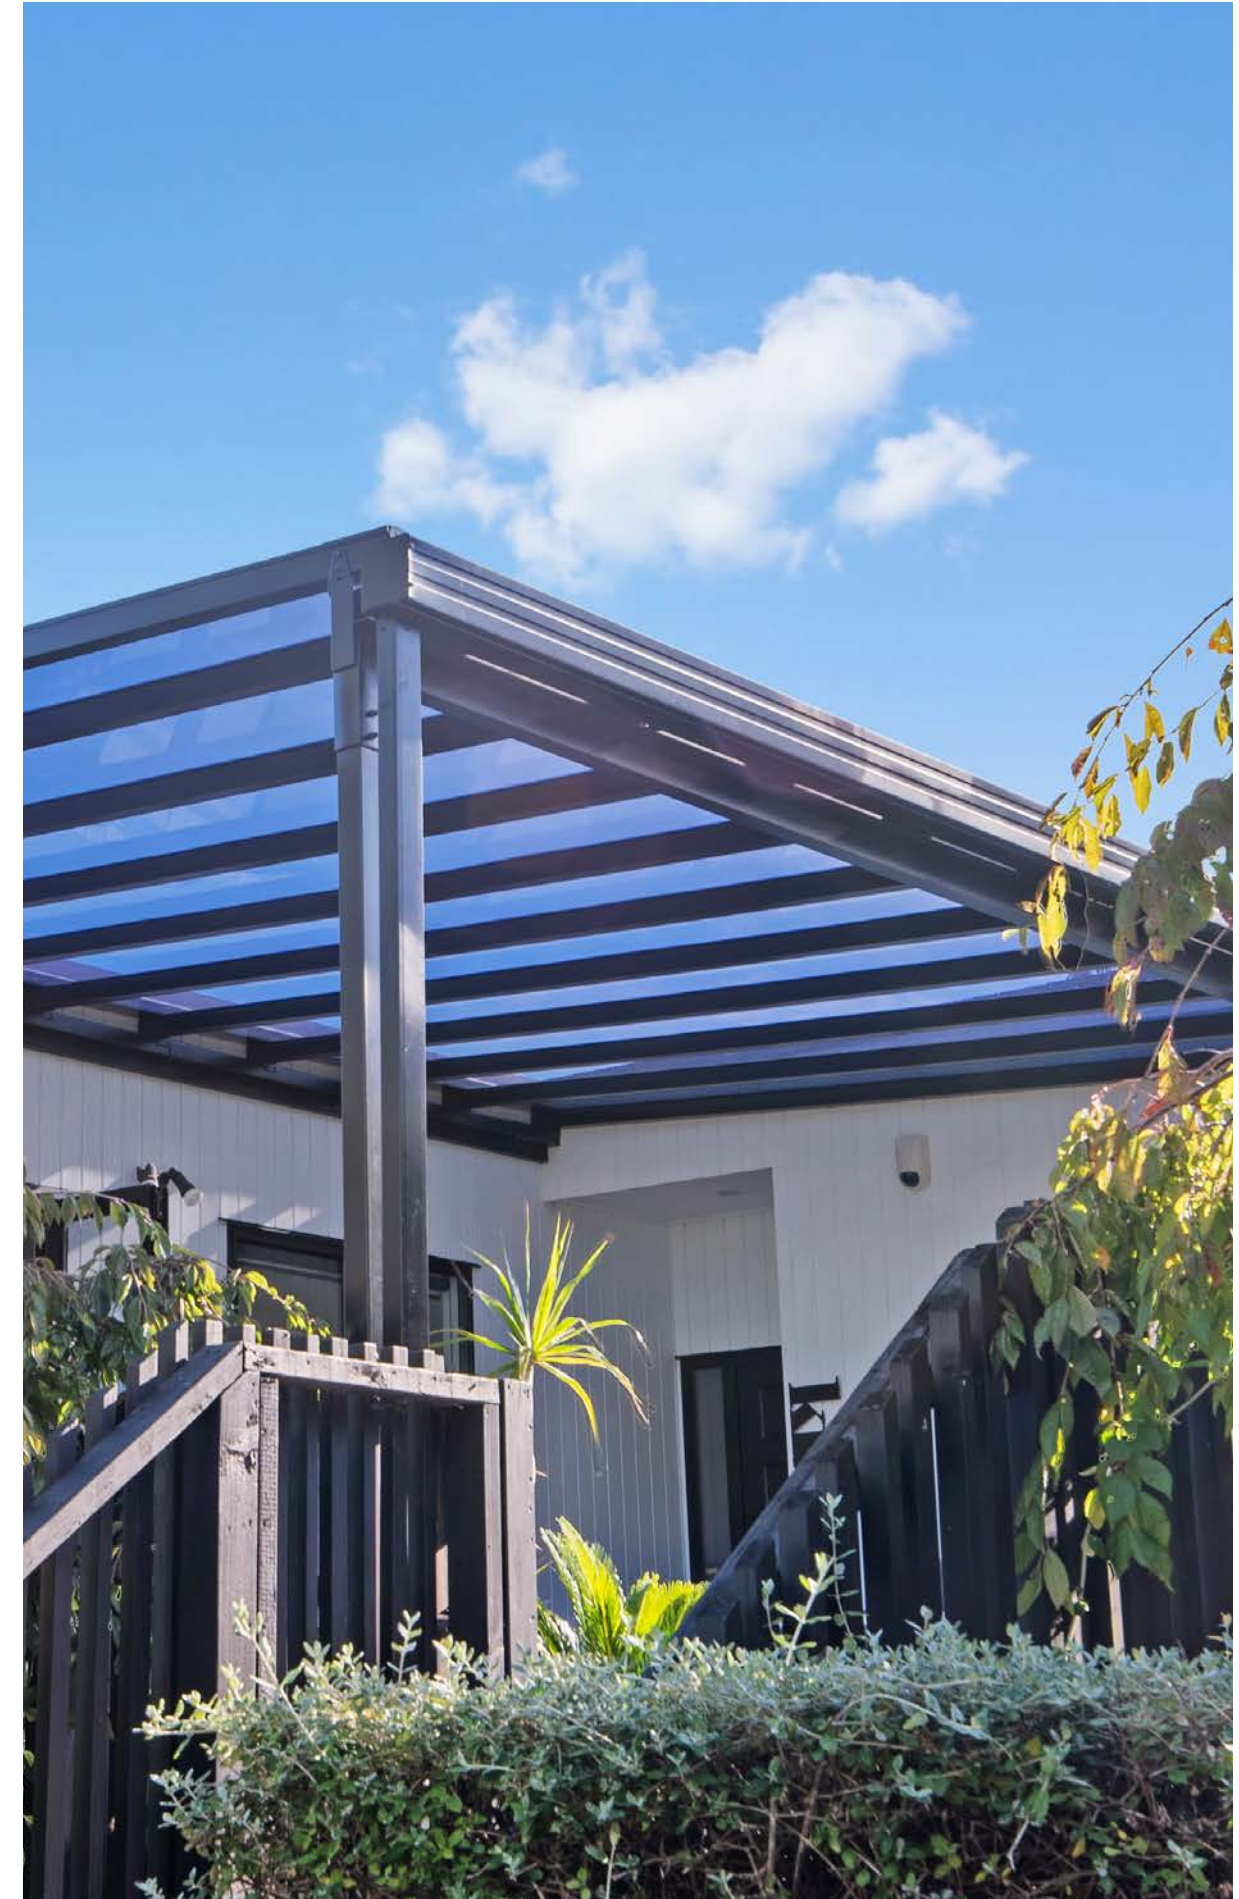

CANTILEVERED

To increase the depth of shade, the roofline can be extended past the outside beam and posts, creating a 'floating' overhang for a distinctive architectural statement.

CANTILEVERED ROOF

STRAIGHT ROOF

Strong, clear and protective.

We use high-quality, 5mm thick polycarbonate roofing. This premium material offers superior strength and optical clarity, creating a light and airy feel while providing essential protection.

99.9% UV PROTECTION

The polycarbonate roofing blocks virtually all harmful UV rays, ensuring your family and your outdoor furniture are protected all year round.

SUPERIOR IMPACT RESISTANCE

With impact resistance 250 times greater than glass, the roofing is incredibly tough and durable, designed to withstand NZ's harsh weather, including hail.

BRONZE

OPAL

BLUE/GREY

Clean lines, clear skies.

The Linear is available in three stylish tints, allowing you to control the ambiance, light, and heat in your outdoor space.

Linear canopies are installed with a high-quality 5mm polycarbonate roofing which is 600mm wide and available in three tints (see table), giving you a range of options to choose from.

	TRANSPARENT OR TRANSLUCENT	HEAT 'REFLECTIVE' PROPERTIES	UV PROTECTION
Bronze	TRANSPARENT	NIL	99%
Opal	TRANSLUCENT	NIL	99.9%
Blue/Grey	TRANSPARENT	MAX 15°C HEAT REDUCTION	99.5%

Looks right. Fits right.

The Linear frame combines the best of both worlds: strength and endurance.

Strong, corrosion-resistant aluminium forms the beams and rafters, with the core strength coming from posts made of high-quality, pre-galvanised New Zealand steel. This makes for a lightweight yet incredibly strong structure.

Beam Options.

135MM BEAM

Choose a 135mm beam for a subtle, streamlined look that is still incredibly strong. The narrow beam provides a sleek slimline look.

200MM BEAM

A 200mm beam provides a more substantial look while maintaining that robust Archgola quality. It's a good choice if you want to make a statement, or if you have a larger canopy.

Colour Options.

We use the Dulux powder coat range for its proven durability and extensive colour selection. We can match your frame to your home's joinery for a truly integrated look.

When your local installer comes over to quote, they'll show you our colour swatches so you can pick the right shade for your Archgola® while you're outside in the natural light.

Fixing Options.

FACE FIXING

Face fixing involves attaching the canopy directly to the building's facade. This fixing type is dependent on the building's strength to support the weight of the canopy. Alternatively, we may recommend a free-standing solution.

SOFFIT FIXING

Soffit fixing involves attaching brackets to the underside of the building's soffit, which is the horizontal surface beneath the eaves of a roof.

Clean lines, clear skies.

The kind of design that blends seamlessly with your home's architecture, creating a natural extension of your living space.

ARCHGOLA.CO.NZ

Gola Classic™

- ✓ Flexible shapes
- ✓ Modular system
- ✓ Custom fit

Our most adaptable canopy, the Classic works with your home's architecture and the shape of your outdoor space to create a custom fit. From neat corners to huge spans, it's designed to look right at home and make the most of your place.

Wider Spans.

Our unique structure is engineered for reach, giving Classic the ability to cover wide areas and create more usable space underneath. Big decks welcome.

Made for your space.

Flexible Shapes.

Curves, angles, L-shapes or straight runs—Classic adapts to tricky footprints and rooflines. It can tuck around corners, cover a deck or spa, shelter an entranceway, or stand alone over a carport or storage area.

Modular System.

Built from our own clever modular components, we can size it up (or down), add bays, and integrate extras like blinds or screens. The result is a tidy, purpose-built solution that goes up quick and can take whatever the weather throws at it.

Design Flexibility.

Gable.

Classic pitched roof design for extra height and light.

Alcove.

Attaches to three sides to neatly cover U-shaped spaces.

Rectangle.

Attaches neatly along one side of your home. Simple.

Corner.

Wraps in an L shape around internal or external corners.

Shade that fits.

The Gola Classic™ offers a range of rooflines designed to fit your unique style. Choose from a variety of silhouettes, each crafted to provide a wider and more comfortable space, seamlessly blending with your outdoor area.

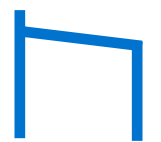

ARCHED

Our classic arched shape is where it all began. The super strong, traditional Archgola® look suits most house styles, enhancing the front porch or the back deck.

CANTILEVERED

To increase the depth of shade needed in sunny spots, our cantilevered roofline has an additional overhang, which can be included with either the straight or classic arch shape.

STRAIGHT

For a contemporary look to suit modern homes, without compromising on quality, our straight roof line provides a stylish flat design finish.

BULL - NOSE

A fusion between style and functionality, our bull-nose roofline is straight with a slight arch at the end.

STRAIGHT ROOF

CANTILEVERED ROOF

ARCHED ROOF

Engineered for all seasons.

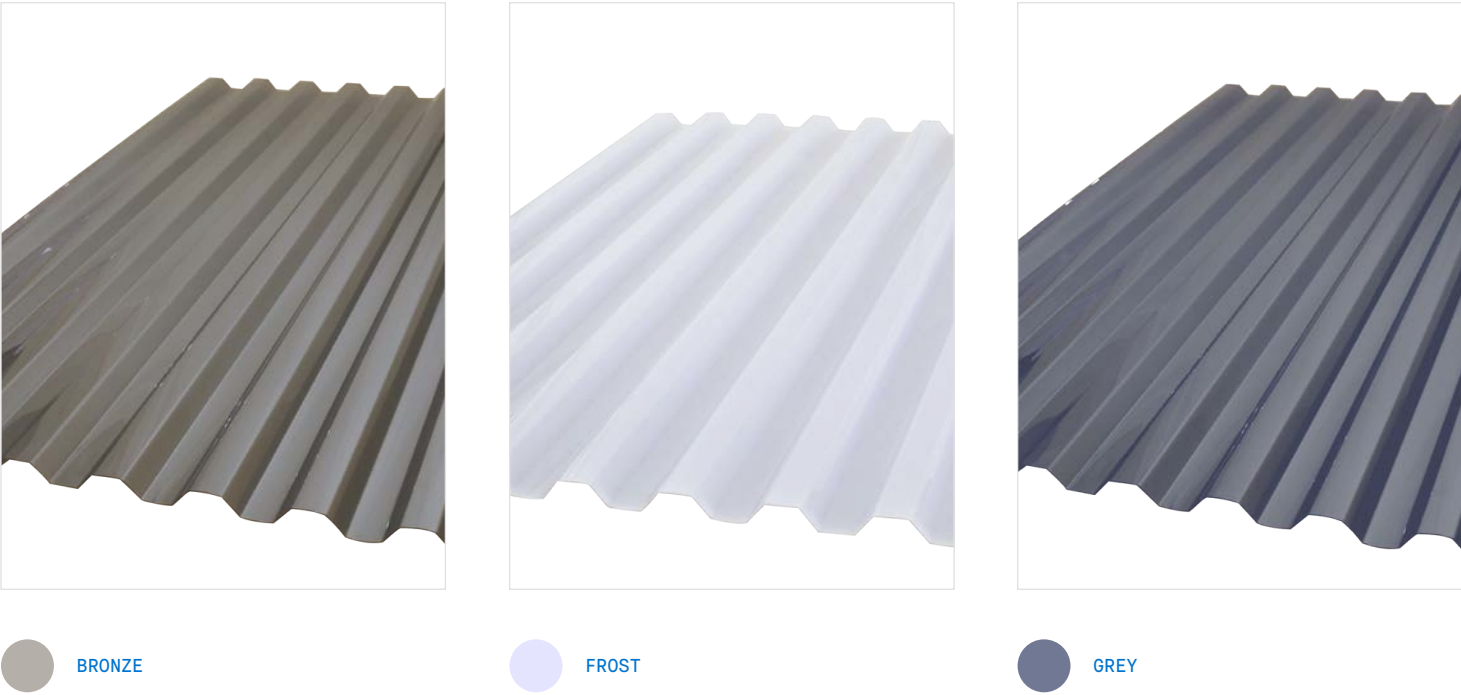

Archgola® provides year-round protection from New Zealand's harsh summer sun and unpredictable winter weather. For us, quality is everything, which is why we use polycarbonate Laserlite® Greca roofing on the Classic range.

Laserlite® protects you from harmful UV rays, only transmitting beneficial radiation. It also blocks ultraviolet rays and resists rain, hail and extreme temperatures. Available in five different tints, allowing for varying degrees of light to filter through.

Advanced Weatherguard™ Technology is a special protective material that extends the life of the sheet up to 50%*, maintains sheet colour and clarity up to 50% longer*, provides 99.9% protection from UV rates up to 50% longer* and resists 25% larger hailstones*.

*As compared to some other polycarbonate corrugated sheet products Lifetime Platinum Warranty: Laserlite® comes with a 30 year loss of light transmission warranty and a 16 year weather breakage warranty.

Easy on the eyes.

The Classic is available in five different tints, allowing you to control the amount of light and heat.

Special properties in the sheet reflect the warming effect of the sun's rays. This offers up to 50% better heat reduction than standard polycarbonate sheet* and reduced glare for ultimate comfort.

	LIGHT TRANSMISSION	HEAT REDUCTION	LASERLITE®
Clear	93%	0%	2000
Bronze	38%	33%	2000
Grey	19%	47%	2000
Frost	47%	63%	3000
Platinum	18%	69%	3000

*Heat reduction performance varies based on the tint colour selected.

Custom designed and built to last.

Our Classic canopy is built to last. It's structurally engineered to handle whatever New Zealand weather throws at it, giving you a solid, permanent outdoor space you can enjoy for years to come.

Slim Profile.

The Classic's unique fittings maximise strength while maintaining an attractive finish. Its slim profile posts and purlins allows the canopy framing to almost disappear.

Strengthened.

For complete peace of mind, additional support is added for extra large canopies and those in high wind zones to ensure structural integrity, no matter what the forecast brings.

Colour Options.

We use the Dulux powder coat range for its big selection, proven durability and excellent long term colour retention. Whilst it's quite common to match your framing to the joinery or cladding of your home, whatever you have in mind—if you can imagine it, we can match it.

 DULUX POWDER COAT

Fixing Options.

FACE FIXING

Face fixing involves attaching the canopy directly to the building's facade. This fixing type is dependent on the building's strength to support the weight of the canopy. Alternatively, we may recommend a free standing solution.

SOFFIT FIXING

Soffit fixing involves attaching brackets to the underside of the building's soffit, which is the horizontal surface beneath the eaves of a roof.

Made for your place.

Because no two homes are the same, every Archgola® is custom-designed and built for a perfect fit.

ARCHGOLA.CO.NZ

Outdoor Blinds

Our outdoor blinds are the perfect solution for creating a comfortable, all-season outdoor room. They extend your Archgola's usability year-round, so you can enjoy your outdoor space no matter the weather.

Life happens outside, and our blinds are designed to enhance your outdoor living experience.

Your candles are safe now.

Archgola® offers two versatile outdoor blind systems. Both options are durable, custom-fit, and protect you from the weather all year round.

All blinds come in a wide range of materials and colours to give you the flexibility to match your existing interior design, ensuring a stylish extension of your home.

Ezi Guide™ Blinds.

The EziGuide system uses a winding handle to operate and are our exclusive, robust solution for creating the ultimate all-season outdoor room—offering reliable protection from wind and rain, while eliminating gaps to prevent draughts.

Spring Assisted Blinds.

These blinds create a tight weather seal without zips or cords, using a smooth spring-balanced system that keeps the blinds in place at any height—making it simple to transform your deck, patio, or balcony into a year-round all-weather room.

Fuss-free Ezi Guide™ Blinds.

The Archgola EziGuide Blinds use a simple winding handle to operate and are our exclusive, robust solution for creating the ultimate all-season outdoor room—offering reliable protection from wind and rain, while eliminating gaps to prevent draughts.

They are available in a range of mesh colours or clear PVC, allowing you to control the elements while maintaining your connection to the outdoors.

Key Features.

- ① Slimline robust gearbox with a winding handle.
- ② Aluminium channels position blinds perfectly.
- ③ Once wound down and tensioned, gaps are eliminated to prevent draughts.
- ④ Unique locking system with stainless fittings.

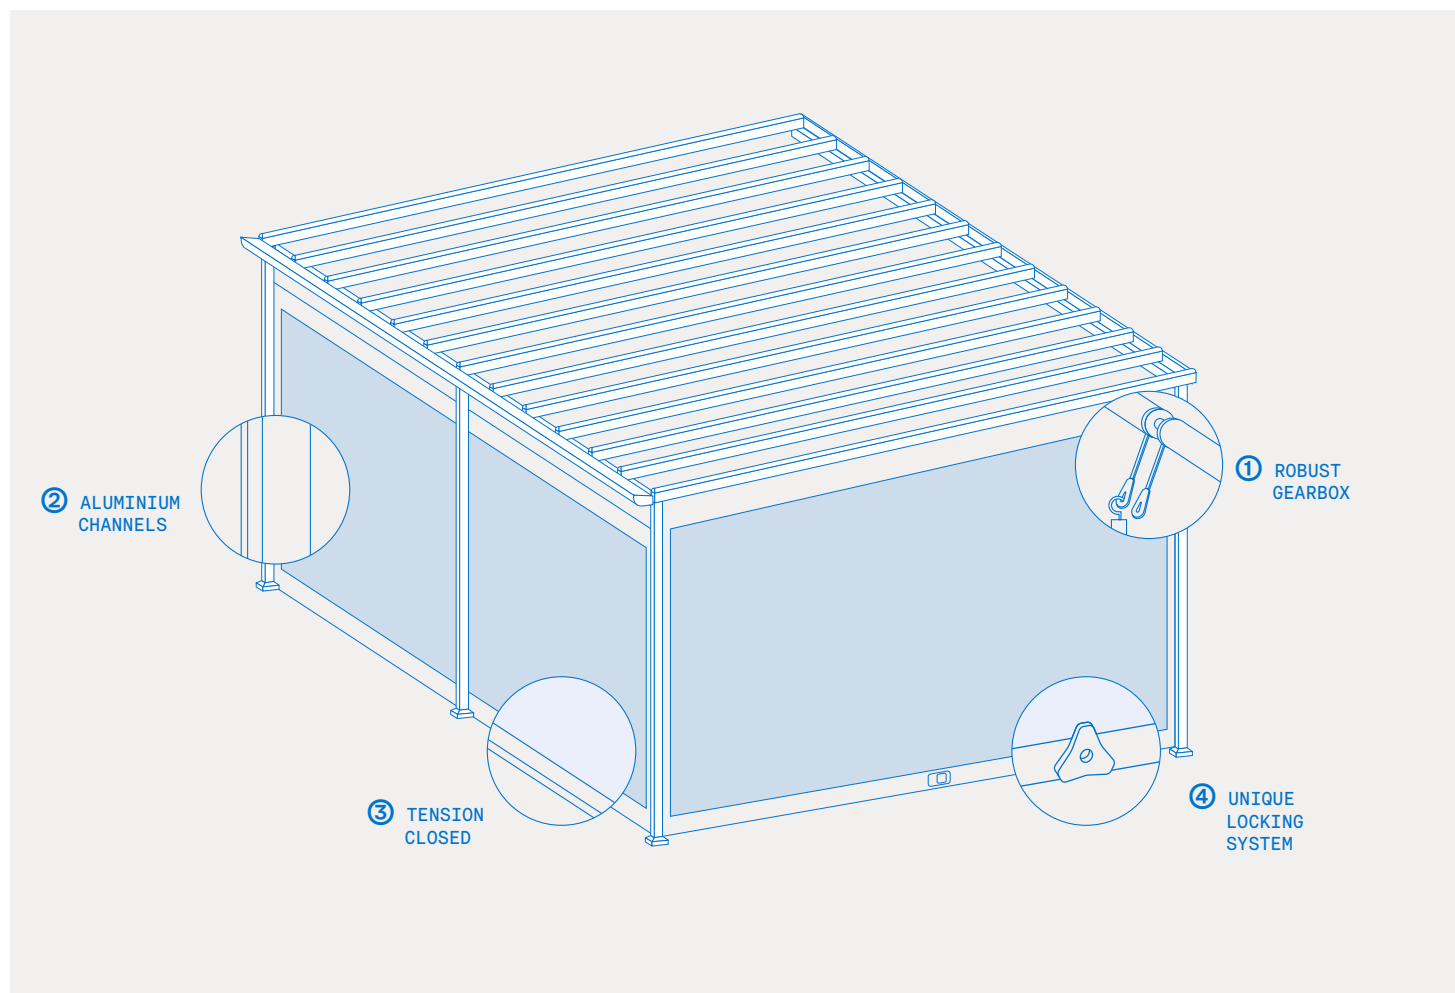

Designed to Disappear.

This system features aluminium side channels that guide the blind, creating a secure, gap-free seal. At the base, a unique locking system tensions the blind, keeping it tight and secure against the weather.

Simplicity is key.

The EziGuide™ Blind is operated smoothly with a robust gearbox and crank handle, allowing you to easily wind the blind up or down to any desired height.

Fabric Options.

CLEAR PVC

Keep your view and stay cosy with our durable, double-strength clear PVC. Perfect for blocking wind and rain while letting the light in.

MESH

Enjoy privacy and shade without feeling closed in. Our high quality mesh fabric in 5% open weave, is a popular choice for promoting airflow and partial light filtration, while maintaining your privacy.

Effortless Spring Assisted Blinds.

These outdoor blinds create a tight weather seal without zips or cords, using a smooth spring-balanced system that keeps the blinds in place at any height—making it simple to transform your deck, patio, or balcony into a year-round all-weather room.

The blinds can be easily retro-fitted to your existing canopy for a custom-fit, seamless integration to your outdoor space.

Key Features.

- ① Spring assisted roller system designed for carefree blind operation.
- ② Balanced bottom bar, customised to your blind dimensions to keep the fabric in tension and positioned at your chosen height.
- ③ Internalised guided retention system for consistent performance—concealed vertical weld seams for a clean look and protection from the elements.
- ④ Rubber all weather/insect strip to protect the bottom of blinds and managing uneven ground.

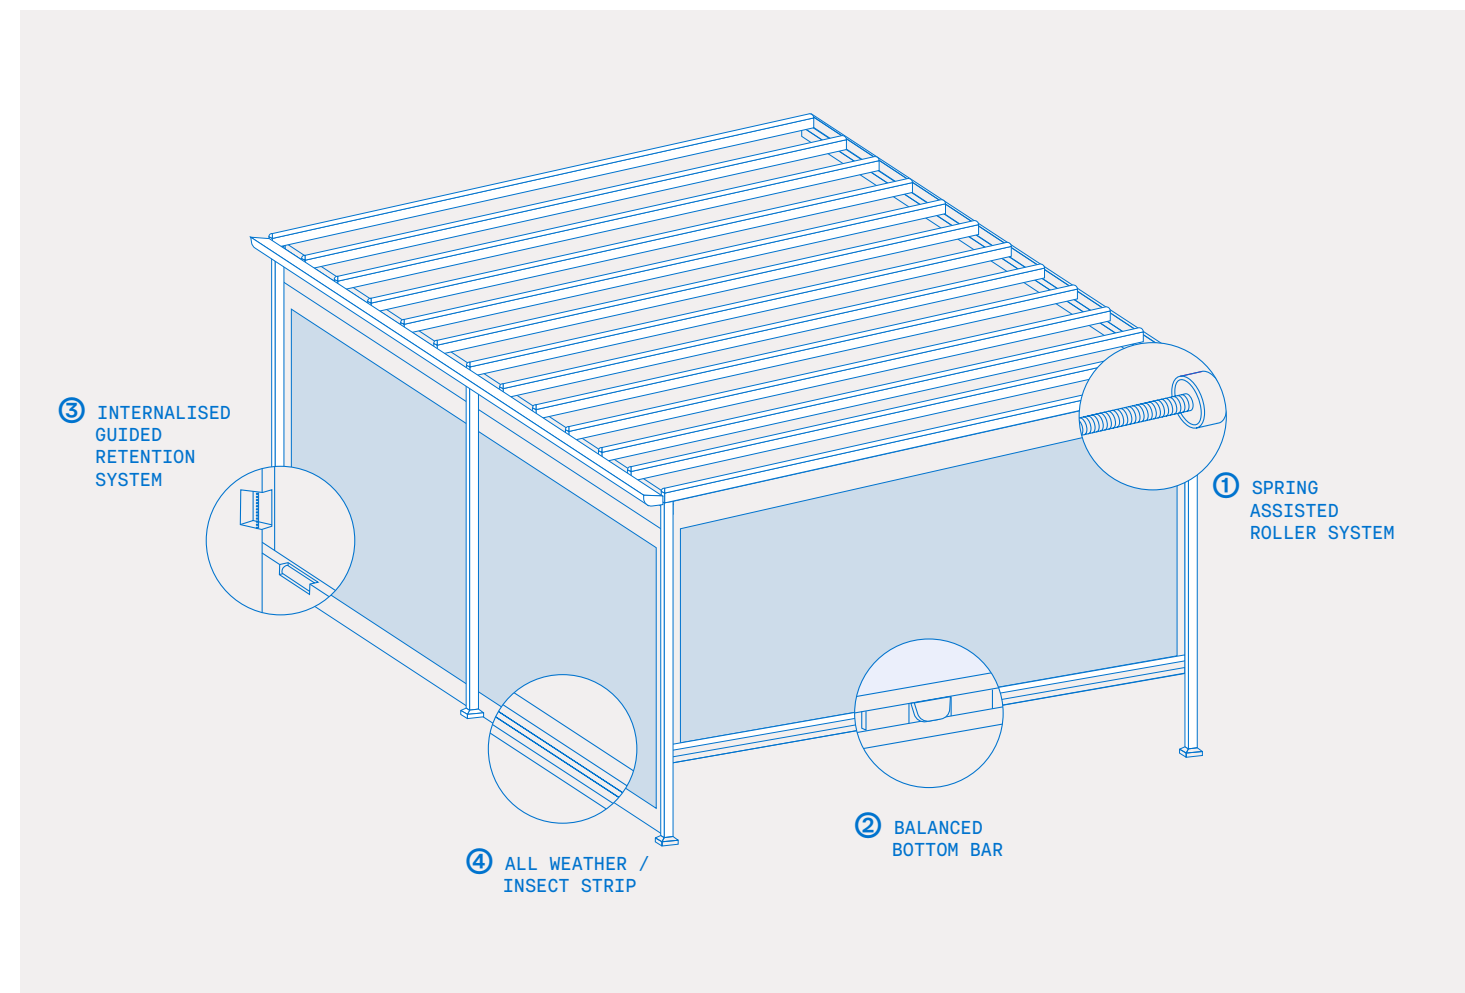

At a touch.

The track system allows for one-handed operation of the blinds and lets you lock them securely in place with a single, simple action, making it quick and convenient to operate.

Your choice of opening.

The spring-assisted mechanism allows you to set the blind opening at any height, and it will stay exactly where you leave it, giving you complete control over your privacy and shade.

Fabric Options.

CLEAR PVC

For complete protection from wind and rain without sacrificing your view. The durable, clear PVC creates a waterproof barrier, keeping your outdoor space cosy and dry in any weather.

MESH

Enjoy privacy and shade without feeling closed in. Our high quality mesh fabric in 5% open weave, is a popular choice for promoting airflow and partial light filtration, while maintaining your privacy.

Archgola Warranty.
