MASTERPIECES

Aurora

THE AETHER

Versatile, functional art, combined with the contemporary style of the fireplace.

The Aether suspended fireplace is available as wood burning, hybrid or bioethanol fuel.

Dimensions, Weights & Specifications

Firebox diameter	900mm
Firebox weight	55kg
Flue diameter	165mm
Flue weight	12kg/m
Standard bracket weight	23kg
Grate weight	22kg
Finished in heat resistant paint to	600°C

THE HEARTH

Offers a modern expression of beauty and simplicity.

The Hearth suspended fireplace is available as wood burning, hybrid or bioethanol fuel.

Dimensions, Weights & Specifications

Firebox diameter	900mm
Firebox weight	55kg
Flue diameter	165mm
Flue weight	12kg/m
Standard bracket weight	23kg
Grate weight	12kg
Finished in heat resistant paint to	600°C

THE MARINO

The luminous depth of this marine grade stainless steel fireplace is so alluring with its luxurious functionality. Combining not only excellent heat performance, but also precision for optimal control where the heat is directed into the room.

Suitable as an indoor or outdoor fireplace.

Dimensions, Weights & Specifications

Firebox diameter	900mm
Firebox weight	55kg
Flue diameter	165mm
Flue weight	12kg/m
Standard bracket weight	23kg
Grate weight	22kg
Finished in heat resistant paint to	600°C

THE ELEMENTAL

The Elemental bioethanol fireplace is dramatically suspended with its square flue emerging from the ceiling transforming its aesthetic appeal in any space.

Suitable as an indoor or outdoor fireplace.

Bioethanol fuelled only.

Dimensions, Weights & Specifications

Firebox length	950mm
Firebox weight	80kg
Firebox width	360mm
Firebox height	500mm
Standard bracket weight	20kg
Grate weight	12kg
Finished in heat resistant paint to	600°C

THE MILAI

The Milai contemporary and environmentally friendly bioethanol fireplace is not only elegant with its pedestal stand, it creates harmony with refined, and almost minimalist look, with the 360 degree rotation, to warm any area in the living room, or outside patio.

Suitable as an indoor or outdoor fireplace. Bioethanol fuelled only.

Dimensions, Weights & Specifications

Firebox diameter	900mm
Firebox weight	55kg
Firebox height	875mm
Pedestal stand diameter	750mm
Grate weight	12kg
Finished in heat resistant paint to	600°C

THE ZENTAI

The beautifully hand crafted Zentai has been designed to excite and captivate, while creating a grand presence in any living space. Enhancing the ambience and warmth with functional style and a centre piece to be admired.

Suitable as an indoor or outdoor fireplace. Bioethanol fuelled only.

Dimensions, Weights & Specifications

Base diameter	900mm
Base weight	37kg
Hood height	1250mm
Hood weight	55kg
Grate weight	15kg
Finished in heat resistant paint to	600°C

THE EVOLVE

The NEW Evolve is elegant and seamlessly refined with its slim silhouette.

The Evolve is an ideal solution for apartments, living areas with limited spaces. Breathtakingly sophisticated with its proportional dimensions, featuring a pivoting 360 degree firebox, warming any space beautifully.

The Evolve was created to make life simple, creating sustainable luxury, ensuring premium warmth and comfort with the AB8 burner that has a superior heat output of 6KW.

Suitable as an indoor or outdoor fireplace. Bioethanol fuelled only.

Dimensions, Weights & Specifications

Firebox length	640mm
Firebox weight	18kg
Firebox width	300 x 300mm
Flue weight	28kg per/m
Flue diameter	300 x 300mm
Bracket weight	34kg
Heat Output	6kw
Finished in heat resistant paint to	600°C

Aurora suspended Fires are the exclusive manufacturers of suspended fireplaces in Australia.

We are dedicated to:

- 🔥 SUPPORTING AUSTRALIAN INDUSTRY
- 🔥 HIGH QUALITY AUSTRALIAN MADE PRODUCTS
- 🔥 EXCEPTIONAL CUSTOMER SERVICE

CLEAN HEAT BIO ETHANOL IS THE FUEL OF THE FUTURE, TODAY.

- 🔥 BIOETHANOL IS AN ECO FRIENDLY FUEL THAT BURNS CLEAN AND HAS A MINIMAL CARBON FOOTPRINT.
- 🔥 UNLIKE FOSSIL FUELS, BIOETHANOL ISN'T A FINITE FUEL SOURCE, WHICH MEANS IT'S RENEWABLE.
- 🔥 THE FACT THAT NO FLUE OR CHIMNEY IS NEEDED MEANS MOST OF THE HEAT GENERATED STAYS IN THE ROOM.
- 🔥 BIOETHANOL CONVERTS INTO A FINE WATER VAPOUR WHEN BURNED. IT IS THEREFORE VERY CLEAN.

HOW DOES IT WORK?

The Aether or the Hearth are fitted with either a XS340 EcoSmart grate insert & stainless steel burner or an EcoSmart XL500 burner which both use bioethanol fuel. The burner comes fitted with a grate designed for our fireboxes.

The flue terminates in your ceiling with the suspension bracket. As bioethanol gives off nothing but water vapours there is no need for an external flue. The flue is therefore capped inside the suspension bracket so there is no heat transference into the roof space.

Spark guard

(included with each wood fireplace purchase)

- 🔥 Aether and Hearth spark guards
- 🔥 Removable heat proof handles
- 🔥 Colour matched to your fire

AURORA SUSPENDED FIRES

Australia's premium suspended fireplace. It is completely revolutionary, a combination of a unique fireplace and an art piece, in a perfect balance.

HOW DO WE WORK?

It all starts here...

Aurora Fires are securely connected in the roof space on a stainless steel ceiling bracket which is custom made to fit the pitch of the customer's ceiling.

A stainless steel ball bearing system connects the firebox to the lower flue, enabling the fire to be rotated around 360°. This unique feature allows the fire to be easily directed to face any part of the room.

Aurora Suspended Fireplaces are open fireplaces, available as wood burning, bioethanol or a wood/bioethanol hybrid and come in a range of sleek finishes.
