The Company's Mission

To Fulfil our Pledge : Create a reputation based on trust, reliability and quality.

We believe in the value of customer service through a combined team effort in the quality of our delivery process – from initial contact, solution discussion, prompt estimation, efficient project organisation and quality workmanship, through to after service care.

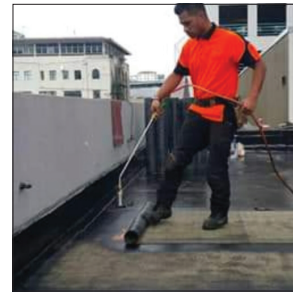

We are committed to providing trained staff members and credible applications.

Superior Waterproofing 2000 Ltd cover **all aspects of your waterproofing requirements** with simple waterproofing solutions for

- New build**
- Retro fit**
- Programmed Maintenance**
- Inspections**

waterproof the superior way

DECKS - Trafficable membrane systems, PVC, Butynol, Fibreglass, Under Tile/ Timber floating decks, TPO, Torch on.

ROOFS - All are applicators of all main suppliers, we can lay any specified membrane application or recommend solutions for the situation.

BASEMENTS - We are damp proofing experts when it comes to leaky concrete walls or rising damp floors, applications installed from the inside maybe your only cost effective option.

TANKING - For full encapsulation going under the floor slab and connecting to tilt slab panels or concrete block walls, we can help through value engineering planning and process to ensure the sequence of events is correct to achieve 100% watertight below ground Tanking.

QUICK 2 SEAL - For existing membrane roofs or deck membrane areas covered with floating decks, internal gutters, we specialise in rejuvenating or laying over these areas without the need of the traditional process to remove cladding, skylights, vents, we can save this cost and the waste of removal using Quick 2 Seal.

Waterproof the superior way
