

Commercial & Education Shade Solutions

Your Outdoor Shelter Project Partner.

Archgola offers nationwide partnerships providing end to end solutions for outdoor shelter requirements in commercial and education settings.

We have a proven track record of successful project implementation for over 25 years.

FULL SERVICE

From designing a solution that is compliant through to installation and maintenance.

COUNCIL CONSENT PROCESS SUPPORT

We offer application processing and followup, through to final sign off.

OVER 25 YRS EXPERIENCE

We have decades of experience in manufacturing school and commercial canopies specifically to suit the site.

INSTALLATION

Guaranteed workmanship, installed in compliance with Health and Safety regulations, able to work with the school calendar.

ENGINEERING COMPLIANCE

Our customised design has engineering certification, meets Building Code NZ3604 (ILI) and aligns with AS/NZ1170 Structural Design Standards. This means canopies can be designed for all wind zones.

NATIONAL NETWORK

Spread across 27 Archgola regions, we can cover the country.

WE OFFER A HASSLE FREE FIVE STEP END TO END SOLUTION

ARCHGOLA.CO.NZ
0508 272 446

Complete project delivery, nationwide expertise.

Every project follows a proven five-step process, managed by experienced local teams.

① Project Clarity

Archgola's modular, highly versatile design system allows us to create canopies for any environment - freestanding, attached, rectangular, square or L shaped. We can shape a solution that meets both the practical demands and aesthetic goals of your site.

We work with local authorities, education providers and industry groups to ensure every design aligns with building codes, environmental conditions and project requirements.

② Engineering Design and Durability

Roofing
Archgola canopies are designed to be as watertight as possible, incorporating flashings and guttering. Roofing options include polycarbonate, webglass and Colorsteel – tailored to your desired light transmission and trafficability requirements.

Enclosing the space
Commercial grade outdoor blinds provide additional weather protection. We offer durable mesh or clear PVC providing a long-lasting solution that is perfect for commercial applications.

③ Custom Manufacturing

Frames are precision-built from locally sourced galvanised steel and aluminium.

Our premium powder-coating system provides extra protection against the elements, enhancing longevity, and delivers an attractive finish. You can select from a range of colours for visibility or design impact.

④ Professional Installation

Our nationwide network of licensed installers and supply partners delivers consistent quality across New Zealand. Long-term relationships with skilled professionals ensures every project is completed to the highest standard.

⑤ Handover

After installation, you receive full warranty and care information, ensuring your Archgola continues to perform at its best for years to come.

Our simple process.

Free no-obligation on-site consultation, to discuss your project and complete a site measure.

Custom concept and quote will be provided. Engineering drawings can be provided if required for consent process. We can liaise with local Council and other parties to start the consent process.

Confirm you wish to proceed. Manufacturing will commence, following payment of deposit and confirmation of powder coat colour, roofing type and tint.

Professional Installation, by your experienced Archgola team, adhering to all Health and Safety requirements. Small projects are typically within a day; larger projects take 2-7 days to complete. The site will be left clean and tidy and ready to use. Timeframe of installation can be aligned with the best solution for each client.

Archgola warranty.

THE FRAME

All Archgola™ canopies have been designed by a certified structural engineer. Providing the ongoing Archgola™ product care guidelines are strictly adhered to, all materials used in the construction of the canopies carry a ten-year warranty limited warranty.

We use the highest quality materials, so you can be assured that the structure is built to last. This is backed by warranties on workmanship, frame and roofing materials. (Provided care guidelines are adhered to).

If you look after your Archgola™ it will look as good after five years, as it did the day it was installed. Archgola™ canopies exposed to sea spray require higher levels of maintenance to honour this warranty. Please discuss this with your local installer.

INSTALLATION WARRANTY

All products installed by Archgola™ or an authorised installer carry a five year workmanship warranty from the date of invoice.

ROOFING

Laserlite™ Roofing comes with two warranties. A 25 year warranty against loss of light and transmission and a 15 year warranty against hail breakage.

Webglas GC glass reinforced composite sheeting over a period of 20 years (pro-rata cover) for the following:

- The product will not allow water penetration through the actual sheet.
- The product will not de-laminate or allow protrusion of reinforcing fibres through the surface of the sheet.
- The product will remain structurally sound and shatter resistant under normal conditions.

This includes a loss of tensile strength of up to 25% deterioration.

ARCHGOLA™ OUTDOOR BLINDS

Archgola™ Outdoor Blinds come with a five year limited warranty from the date of invoice on blinds and the gear box. Plus a five year warranty on aluminum channel and powder coating.

Installation

5 Years
Applies to all Archgola products installed by an authorised installer.

Outdoor Blinds

5 Years
Limited warranty applies to Archgola outdoor blind products.

Canopy

10 Years
Limited warranty applies to all Archgola canopy products.

Roofing Hail Breakage

15 Years
Applies to both polycarbonate Laserlite® Greca roofing and 5mm polycarbonate roofing.

Roofing Light Loss

25 Years
Applies to both polycarbonate Laserlite® Greca roofing and 5mm polycarbonate roofing.

Roofing Structural Integrity

20 Years
Applies to Webglas roofing products.

ALL WARRANTIES REQUIRE COMPLIANCE WITH CLEANING AND WASHING MAINTENANCE.

Shade that fits.

Canopies can be freestanding or adjoined to a building structure.

ARCHED

Arched rooflines offer a wider span with fewer posts as well as extra height. This is the strongest design solution for high wind zones.

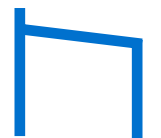

GULLWING

Gullwing Rooflines are a Double Arch. They can be used to span between two buildings.

CANTILEVERED

Cantilevered rooflines provide extra protection in spaces where the canopy needs to exceed the frame position.

STRAIGHT

Straight rooflines provide a modern look to suit box style buildings. There is a 5% gradient for water flow.

Unlimited design options.

Not all spaces require just a rectangle covering. We are able to design a solution that meets the needs of the project plus makes the most of the space available.

The modular system of the Archgola design offers a solution for all spaces and roof angles.

GullWing.

Double arch provides greater coverage for large spaces.

Verandah.

Covered verandahs provide reliable protection for walkways and versatile multipurpose spaces.

Free Standing.

Great option for bike shelters, play areas and more.

Roofing material options.

Roof finish options include a variation of translucent polycarbonate, webglass and colorsteel roofing.

Laserlite™

Laserlite™ Polycarbonate Sheet is an outstanding translucent roofing material offering superior physical properties. Its approximately 250 times stronger than standard glass. Select from five options of tints to achieve the best light and heat transfer result for your space.

Compliance with the New Zealand Building Code

Complies with NZ Standards AS/NZS 1080.2:1989, AS/NZS 4256.3:1994, AS/NZS 1562.3:1996, AS4040.1:1992.

Fire Retardant Properties

Complies with AS/NZS 54356.3:1994 part 2, SL GROUP 3 Fire Retardant.

Webglass

As the industry standard for trafficable fibreglass panels, 'Webglas GC' provides the strongest support for foot traffic of any fibreglass building panel designed for profiled roofing. The additional woven reinforcing provided by the heavy woven mat construction eliminates the need to install wire mesh below the sheet.

Colorsteel®

If you have existing Colorsteel® roofing, you may choose to match this on your canopy. This is an option for straight roof structures only. It's designed for both moderate inland conditions and severe coastal environments.

Commercial grade outdoor blinds.

Retractable outdoor blinds extend the use of the canopy, providing weather protection from wind, rain or low sun.

Our custom-made outdoor blinds use quality Clear PVC or Mesh fabric designed to look great and withstand New Zealand conditions.

Aluminium channels position the blinds perfectly. Once down and tensioned gaps are eliminated to prevent unwanted draughts.

Archgola outdoor blinds have stainless steel fittings and a unique locking system, providing you with quality in both appearance and performance.

Key Features.

- ① Spring assisted roller system designed for carefree blind operation.
- ② Balanced bottom bar, customised to your blind dimensions to keep the fabric in tension and positioned at your chosen height.
- ③ Internalised guided retention system for consistent performance—concealed vertical weld seams for a clean look and protection from the elements.
- ④ Rubber all weather/insect strip to protect the bottom of blinds and managing uneven ground.

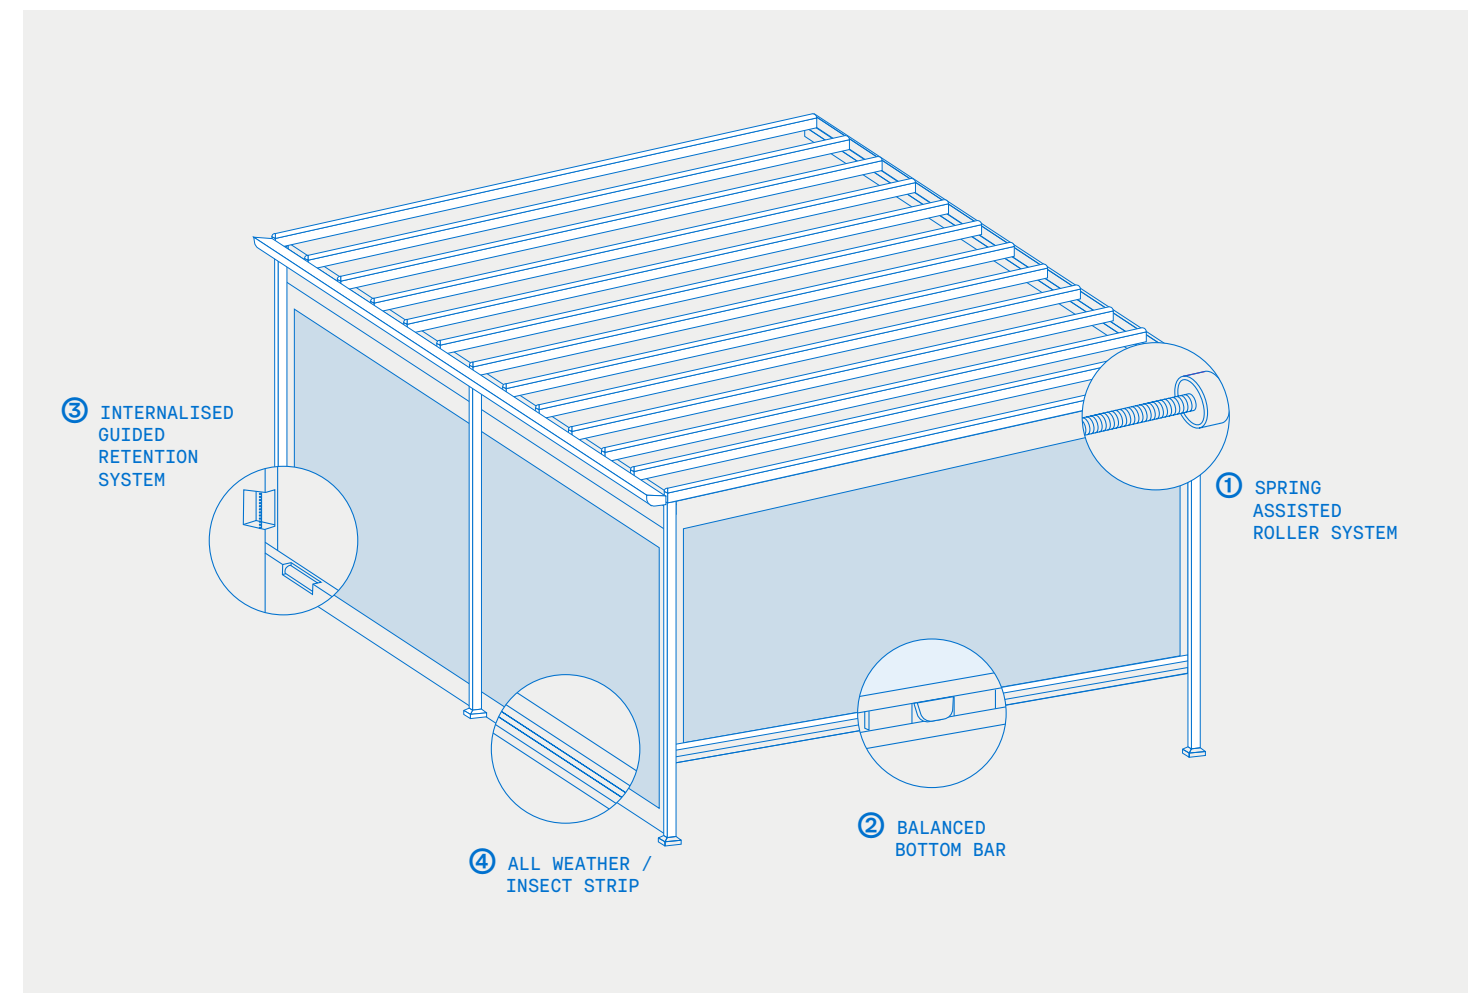

Designed to Disappear.

This system features aluminium side channels that guide the blind, creating a secure, gap-free seal. At the base, a unique locking system tensions the blind, keeping it tight and secure against the weather.

Simplicity is Key.

The EziGuide™ Blind is operated smoothly with a robust gearbox and crank handle, allowing you to easily wind the blind up or down to any desired height.

Fabric Options.

CLEAR PVC

Keep the view and create an all-weather space with our durable, double-strength clear PVC. Perfect for blocking wind and rain while letting the light in.

MESH

Without closing in a space, Mesh blinds provide protection from wind and sun. Our high quality mesh fabric is 5% weave, a popular choice for promoting airflow and partial light filtration.

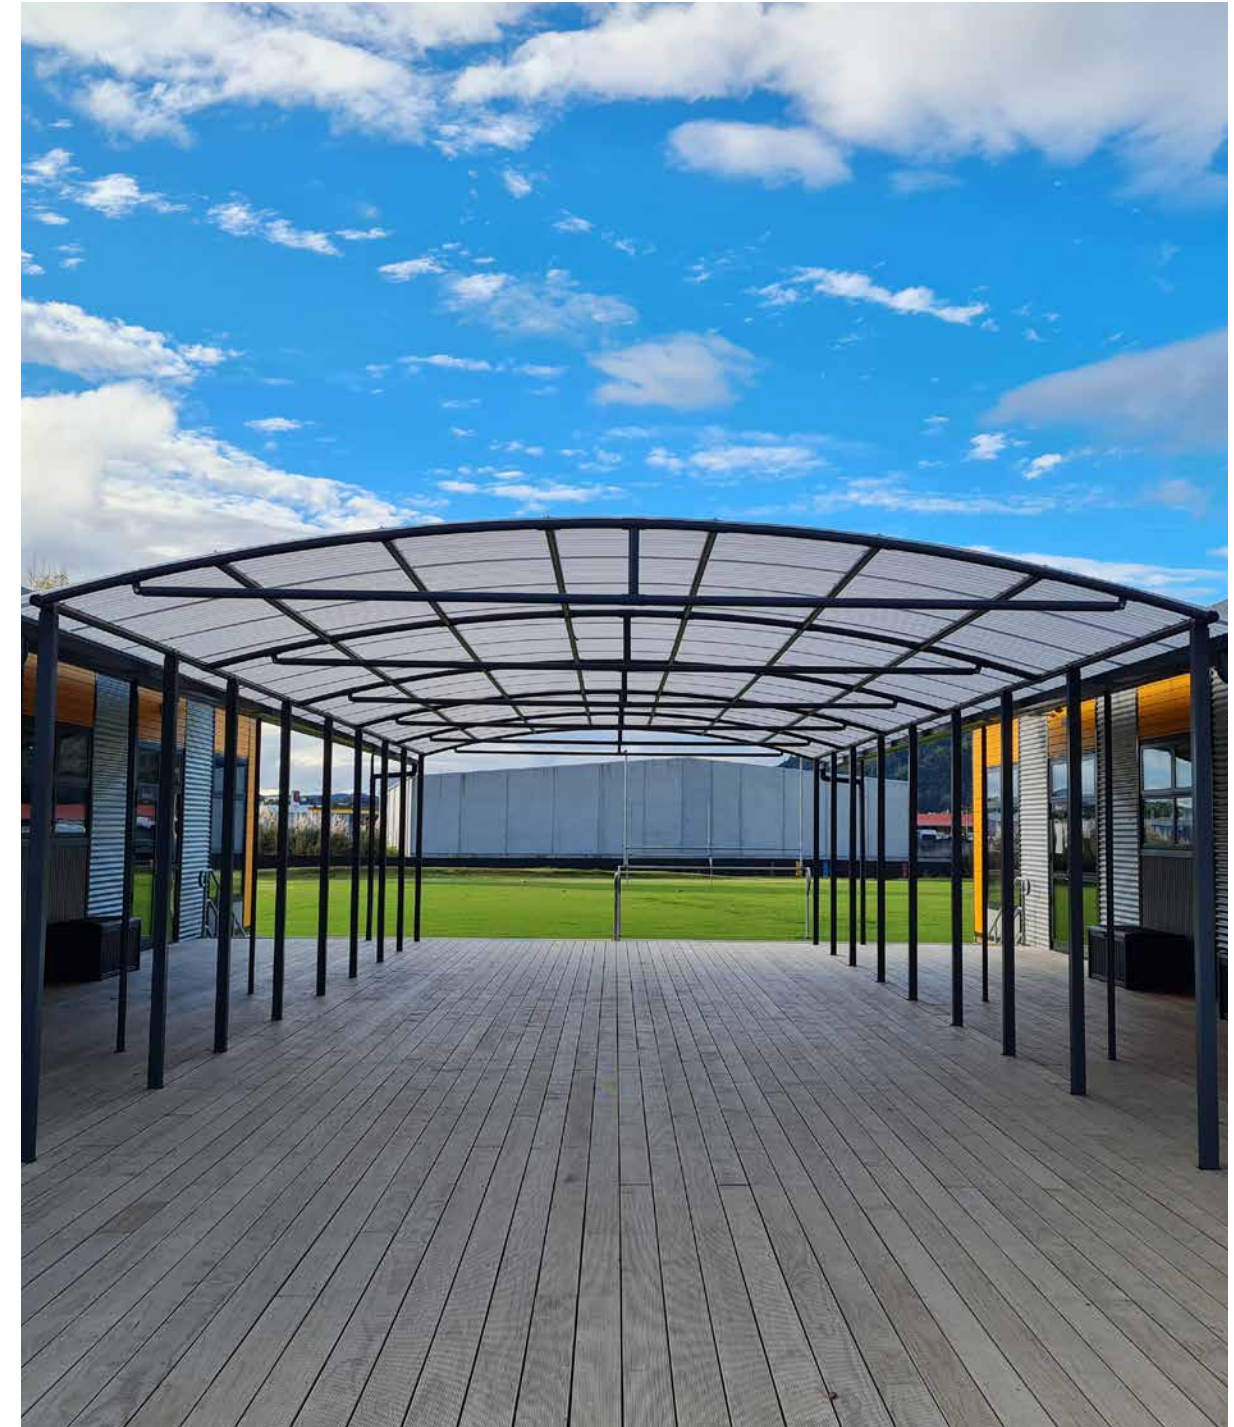

Solutions for Schools.

Archgola™ has an unbeatable reputation for offering a quality all-inclusive package. Our full-service offer includes arranging council consents, certified engineered designs through to installing a cost effective, long lasting and high quality solution for shade and shelter. We have experience in school installations and can meet the specific requirements of the Ministry of Education design standards for shade structures.

Engineering and design drawings are created to assist with the consent process and MOE requirements.

Trafficable roofing is used for all MOE canopies and meets roofing installation requirements.

Verandas are a 5YA priority 3 project if they are a part of creating an outdoor learning area. Including Archgola™ outdoor curtains ensures this criteria is met.

EXAMPLES OF ARCHGOLA™ USE IN SCHOOLS:

- INDOOR OUTDOOR LEARNING AREAS
- COVERING VERANDAS
- OUTDOOR PLAY AREAS (SANDPITS, PLAYGROUNDS, LUNCH AREAS)
- SCHOOL ENTRANCEWAY
- BIKE STAND COVER

Solutions for Sports Venues and Clubs.

Archgola™ provides custom-designed, slimline canopies – freestanding or attached – to enhance functionality across sports venues and clubs. Create covered stadium seating, shelter clubroom deck areas for comfortable spectator viewing, and protect entrances and walkways for safe, all-weather access. Canopies can also cover storage and equipment areas, extending asset life. Our full-service approach includes design, engineering, consents, and installation, delivering compliant, durable solutions that improve usability, safety, and year-round enjoyment for members and visitors.

EXAMPLES OF ARCHGOLA™ USE IN SPORTS FACILITIES:

- STADIUM COVERING
- CLUBROOM DECK AREAS
- ENTRANCE AND WALKWAYS
- STORAGE AND EQUIPMENT AREAS

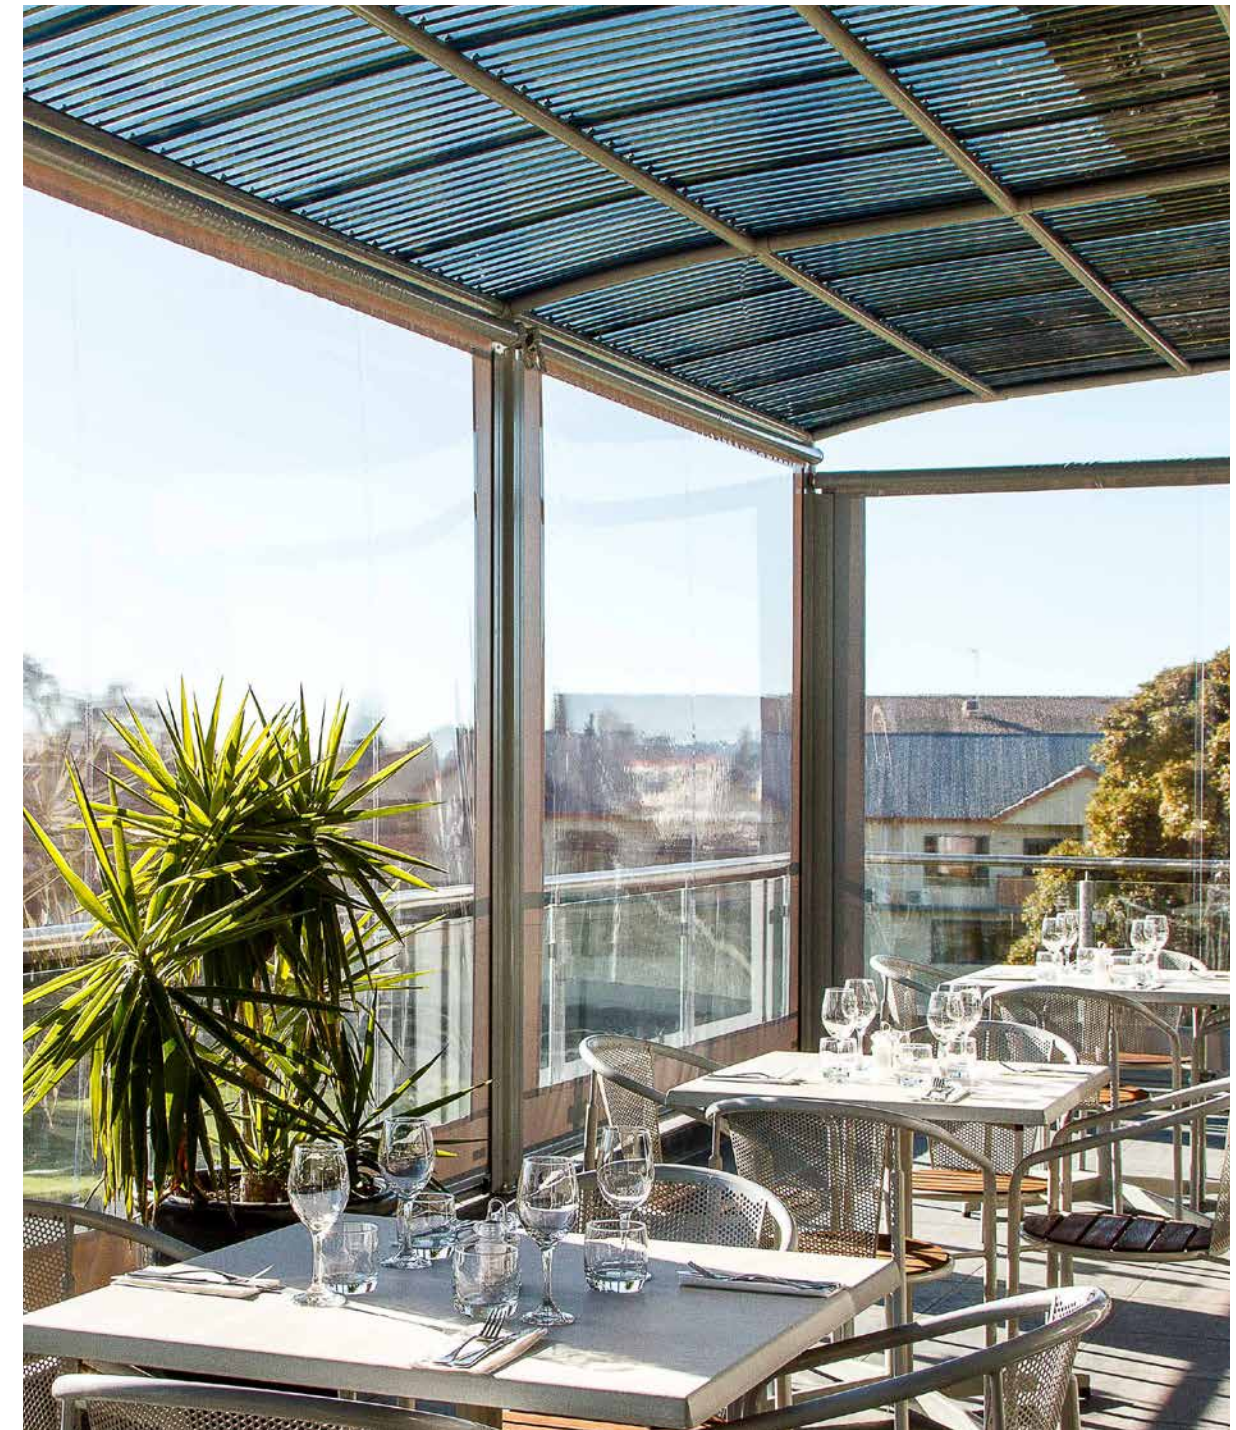

Solutions for Hospitality.

Archgola™ delivers custom-designed, slimline canopies – freestanding or attached – that maximise usable space for guests while enhancing the look of your venue. Create covered deck areas for extended outdoor dining, protect serving zones from sun and rain, and add outdoor blinds to transform spaces into comfortable, all-weather environments. Our complete end-to-end service includes design, engineering, consents, and installation, ensuring compliance, minimal disruption to your business, and a high-quality, durable finish that supports year-round hospitality operations.

EXAMPLES OF ARCHGOLA™ USE IN HOSPITALITY:

- COVERED DECK AREA FOR CUSTOMERS
- COVERED SERVING AREA
- ADDITION OF CURTAINS TO EXISTING STRUCTURES

Solutions for Light Commercial.

Archgola™ designs custom, slimline canopies – freestanding or attached – to improve functionality across light commercial sites. Provide weather protection for dispatch and loading areas, create covered storage zones, and enhance staff lunch and recreation spaces. Canopies also add shelter and a professional finish to customer entrances. With a complete end-to-end service covering design, engineering, consents, and installation, Archgola delivers compliant, durable solutions that support daily operations and improve comfort, safety, and usability year-round.

EXAMPLE OF ARCHGOLA™ USE IN LIGHT COMMERCIAL:

- DISPATCH AREAS EX WAREHOUSE
- STORAGE AREA ON SIDE OF WAREHOUSE OR PLANT
- STAFF RECREATION AREA
- CUSTOMER ENTRANCE

We've Got You Covered.

Expert installation by licensed local professionals guarantees a seamless setup. Help is never far away with installers in 27 regions across the country.
