CONCRETE

EXPOSED AGGREGATE CONCRETE

NATURAL STRENGTH & STYLE

ABOUT US

Atlas Concrete is your complete concrete supplier. Having operated their own quarries and sand sources for many years, they understand the importance of preserving the environment that surrounds such operations – ensuring it is maintained, regenerated and natural.

Driven today by the Collie family just as it was in the 1940's, Atlas Concrete is a down-to-earth local supplier. It has built its business and reputation on relationships and maintaining a consistent and reliable supply of concrete to Auckland's ongoing growth.

DECORATIVE MIXES

Choose Atlas pebble and chip decorative mixes for driveways, patios and paths or for a polished finish to home flooring.

Atlas source decorative products from rivers and quarries around New Zealand. Whether specifying concrete for a driveway, commercial property or an entertainment area, these products are designed to give a natural look and texture to compliment any situation. Atlas has the aggregate, oxide colours and finishes to make your next project something special.

You have the flexibility to choose different aggregate and oxide colours to achieve a unique look for your property. Call in to any of our branches and we will help you to pick the right aggregate and oxide colours to compliment the colours and style of your property.

DESIGN SOLUTIONS

Atlas design, supply and construct raft floor slabs and tilt slabs.

Raft slabs are now a well-established and proven type of concrete floor slab. Each raft slab is engineer designed to suit onsite conditions. They offer considerable benefits over conventional/block base type slabs at significant cost savings, reduced construction time, increased strength and superior insulation.

Pre-cast Concrete, otherwise known as Tilt Slabs, come in a variety of finishes and textures, shapes and sizes to meet the precise requirements of each new construction. The panels represent speedy engineered solutions, which enable the construction of larger residential and industrial buildings to be completed faster and more cost effectively than conventional methods.

READY MIXES

Atlas Ready-Mix is standard mix concrete made when required and shipped to sites by concrete truck. It fits most applications such as foundations, flooring and driveways, paths and retaining walls to name just a few.

Ready-Mix is made to specific requirements, often containing additives for colour, waterproofing, hardening or mixes that allow pumping to sites with difficult access. It is the preferred mixing concept as a more consistent and precise product is produced.

PRODUCTS INCLUDE

- Standard Mixes
- Pump Mixes
- Kerbmix
- Spraymix

BUILDING PRODUCTS

Atlas supply a wide range of quality building products to suit the scale of your next project, from steel rods and mesh to blocks and cement.

We stock a full range of tools and hardware products for the concrete industry which we can arrange to accompany any Ready-Mix order.

PRODUCTS INCLUDE

- Steel Rods
- Steel Mesh
- Blocks
- Cement Products
- Hardware

QUARRY PRODUCTS

One of the core products in the Atlas stock range is sand. In fact we have been selling sand to industrial and domestic buyers since 1946.

We have a number of quarry products available to satisfy the demands of your building project.

PRODUCTS INCLUDE

- Sand
- Scoria
- Builders Mix
- Basecourse/Hardfill
- Crushed Concrete/ Recycled Concrete
