CLASSIC D HANDLES

Our range of solid Brass D Pulls encompass both the familiar, and a twist on the original. Available in several sizes, pulls come in both the recognisable tubular shape or with a contemporary square edge.

Brass D Pulls are a hardware classic. The “little black dress” of the door handle world, every great supplier has their own reworking of this icon. Our own solid brass series includes both the classic round, offset, and a more contemporary square version with a wide range of robust 316 stainless steel fixings that are as useful in a high rise as they are in your home.

D PULLS

KIWI PROPERTY TRUST

AUCKLAND, NEW ZEALAND

Brass D Pulls are a hardware classic. The LBD (little black dress) of the door handle world, every great supplier has their own reworking of this icon. Our own solid brass series includes both the classic round, offset, and a more contemporary square version with a wide range of robust 316 stainless steel fixings that are as useful in a high rise as they are in your home.

When Kiwi Property, New Zealand's largest listed property company, needed a workplace showcasing their property expertise, they called on architects Warren and Mahoney to provide a "design for a 'new' New Zealand". The project used our HB2240 D Pull handles in Polished Brass to build on the moody tones of the space which won the 2018 Designers Institute of New Zealand Best Awards — Gold Pin, Office and Workplace Environments.

At the more private end of the spectrum, a private home in the iconic 'The Pines' apartment complex was imagined by the team at Schwarz Design and is a beautiful example of where hardware adds the finishing touch to great design. Using the HB2235 and HB2240 pulls in their different lengths provides interest and the Aged Brass finish compliments the wood grain of the cabinetry.

THE PINES

AUCKLAND, NEW ZEALAND

A private home in the iconic 'The Pines' apartment complex was imagined by the team at Schwarz Design and is a beautiful example of where hardware adds the finishing touch to great design. Using the HB2235 and HB2240 pulls in their different lengths provides interest and the Aged Brass finish compliments the wood grain of the cabinetry.

HOMEGROUND

AUCKLAND, NEW ZEALAND

Halliday + Baillie have recently contributed hardware to the first purpose-built complex for the charity, HomeGround designed by Stevens Lawson Architects which offers respite for people who are homeless, provides health services, therapy and activities such as art classes. It is also home to 80 apartments for longer term accommodation.

"For decades, Auckland City Mission had been squashed into buildings that weren't really fit for purpose and weren't ever designed with their needs in mind. HomeGround flips that completely around — it's a building that has been designed for them," says Tiffany. "It's a project that was certainly long overdue and a wonderful way that we could help and give back to the community."

The hardware in the community spaces of the thriving central city hub were Halliday + Baillie's contribution — its stair rail brackets, flush pulls and pull handles were used on every floor of the building. These shared spaces, such as the laneway that the public can use to access the building, have high traffic and are used 24/7 — demanding quality hardware. Solid brass hardware, finished to black chrome, answers to this and performs on two levels: form and function.

SOLID BRASS (D Pull Series Only)

Please note for project orders custom colours may be possible. Please contact your local Halliday + Baillie representative.

AB : Aged Brass. To get the traditional look (often called "Tuscan Brass"), solid brass bars undergo an oxidising process to give a darkened look which is then hand burnished and waxed to seal the finish. Please note that the wax on these items will gracefully wear away over time as the handle patinas.

PB : Polished Brass. After bending and/or milling, handles are hand polished to a mirror finish. On dispatch this finish is a bright mirror brass without further coating or lacquer, and is considered a "living finish". The surface will dull and patina over time and with different weather conditions if not kept polished which is considered a desirable characteristic in the aging process of brass.

SB : Satin Brass. After bending and/or milling, handles are given a light hand polish to remove any surface inconsistencies, then hand sateened to give a soft lustre. As with the Polished Brass pulls, this is a "living finish", and the surface will dull and patina over time and with different weather conditions if not kept polished. This is considered a desirable characteristic in the aging process of brass.

KC : Black Chrome. Similar to the standard black chrome the brass is double coppered, followed by a fine layer of bright nickel and a layer of satin nickel before brass plating. An additional plating step in a black chrome bath gives added protection and a deep black finish, before being hand waxed to provide surface consistency and to minimise finger printing on the surface when new. Please note that the wax on these items will gracefully wear away over time.

/ PASSIONATE ABOUT

MANUFACTURING

We have a passion for making great products, for great projects, using the best people, without compromising our responsibility as environmental stewards.

As we have grown, increased scale has allowed efficiencies in the production of our products. Constant evaluation and innovation around processes, raw materials, and sustainable work practices, has led to the development of more effective production techniques, less waste, and new products across the range. Our determination to keep 'doing it better' underpins everything we do.

At Halliday + Baillie this is more than just a make do and mend way of working, but an inventive drive to be fully involved with our customers' requirements, and a fundamental thinking that questions how we view the designed world around us.

This adaptive ability gives us an investigational way of working with new clients to problem solve quickly and stay abreast of changes in our industry.
