

Logic Wood

A NEW INTERPRETATION OF FIRE

New expression of fire

Living flames, ceramic logs and illuminated glow
come together in a refined architectural expression that brings
warmth and presence into the modern interior.

LogicWood

Bringing the atmosphere of a real wood fire into a modern architectural setting, the LogicWood series combines living flames, ceramic logs and an illuminated glow base in one carefully balanced design. The result is a fireplace experience with greater depth, warmth and visual presence, created to feel both refined and remarkably natural.

The series is developed to offer a new level of realism, where flame, material and light work together to create a stronger sense of fire. Even without flames, the glow effect continues to add ambience and character, making LogicWood a living element in the interior.

LINAR

Defined by a calm and architectural expression, this version brings flame, ceramic logs and glow together in a clean horizontal composition. The balanced arrangement creates a refined focal point with depth, warmth and a natural presence in the room.

SCULPT

Exploring a sculptural direction within the series, this concept works with a lifted log arrangement and a more elevated flame expression to bring added movement and visual variation to the fire experience.xa

LOGICWOOD LINEAR

Ceramic logs, decorative glow media and a split flame configuration come together in a refined architectural burner design. Separate flame lines across the tray create depth, balance and a natural visual expression.

AVAILABLE IN THREE SIZES

W 520 × H 160 × D 215 mm
W 720 × H 160 × D 215 mm
W 1120 × H 160 × D 215 mm

INCLUDED

- Ceramic logs
- Ember glass
- e-Ribbon technology
- Split flame configuration
- 5 + ECO levels
- Remote control
- Smart app Operation
- LCD Display
- CO₂ sencor
- Large fuel tank
- External Fuel pump with quick connection

SPLIT FLAME CONFIGURATION

Separate flame lines allow the ceramic logs to be arranged naturally between the flames, creating an authentic fireplace expression

CERAMIC LOGS

Ceramic logs with a natural texture create a more authentic wood-fire appearance.

EMBER GLASS

Dark brown decorative glass enhances the glow effect and adds depth to the burner base.

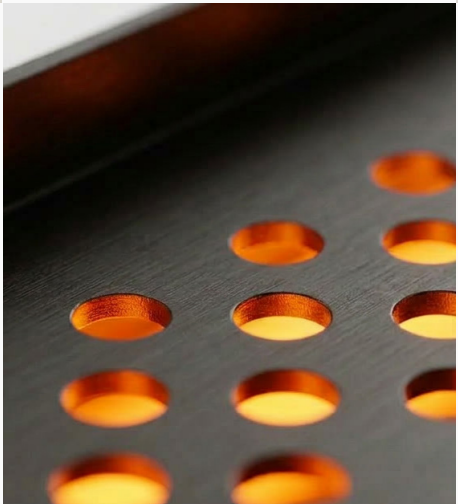

LED LIGHT HOLES

Integrated LED light holes create a warm illuminated glow beneath the logs and glass.

SMART APP OPERATION

Control flame level and burner functions directly from the Decoflame app.

REMOTE CONTROL

Remote control with five flame levels and Eco mode.

Burner Inspiration

Explore how LogicWood is integrated across different interiors and architectural settings. Each example highlights how flame, materials and placement shape the overall atmosphere.
