BEST DOOR OR WINDOW

Paying homage to the character of the home with sash windows, French doors and casement windows to enable light flow, whilst providing modern fittings and double glazing.

Client Brief:

We have French doors and an over bench window in need of restoration, plus our homes extension requires the addition of new sash, casement windows and exterior timber French doors to match the existing, whilst keeping all proportions in check.

Key Features:

- ◆ Unique Molding
- ◆ Double glazing with glazing bars
- ◆ Matched to existing windows and doors in the house
- ◆ Spiral balancers
- ◆ Proportioned design / scale

Challenges:

- ◆ The installation in a 100+ year old home with the floor out by 140mm over 20m, we really had to think on our feet and be adaptable to ensure sound functionality of the doors and windows.
- ◆ We were determined to match the existing profile of the old to the new within 95-100%, which was especially challenging as the moldings and the particular style of this exterior joinery was different to anything else had produced.
