Milu Odourless Toilets

Eliminate toilet odour at the source

Designed and developed in Australia, Milu Odourless is an exclusive range of toilets featuring innovative ventilation technology that prevents odours from leaving the toilet bowl.

The result is a more pleasant odour-free bathroom sanctuary that increases comfort and wellbeing in the home

Milu Odourless toilets are available in a range of contemporary designs for back-to-wall and in-wall configurations. The toilets are easy to install and have all of the quality features homeowners have come to expect from a modern toilet including soft close seats and rimless design for effective flushing and cleaning.

Toilets made odourless with an award winning integrated ventilation system

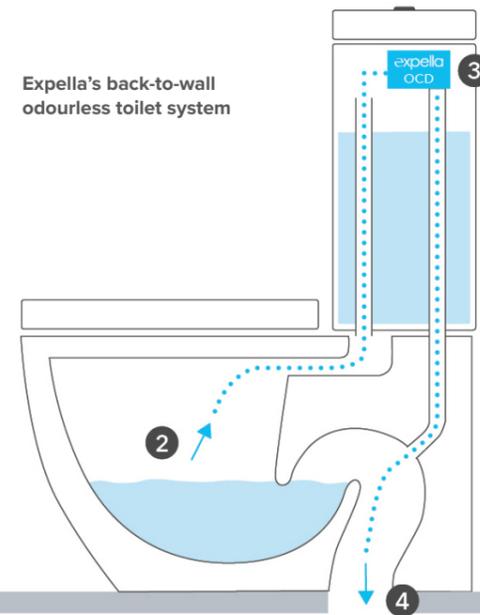

“A clever blend of design and technology innovation brought together to resolve an age old problem... A potential game-changer for this market. True design innovation that solves a problem and has the potential to make a positive impact on the quality of our lives.”

GOOD DESIGN AWARDS JURY COMMENT

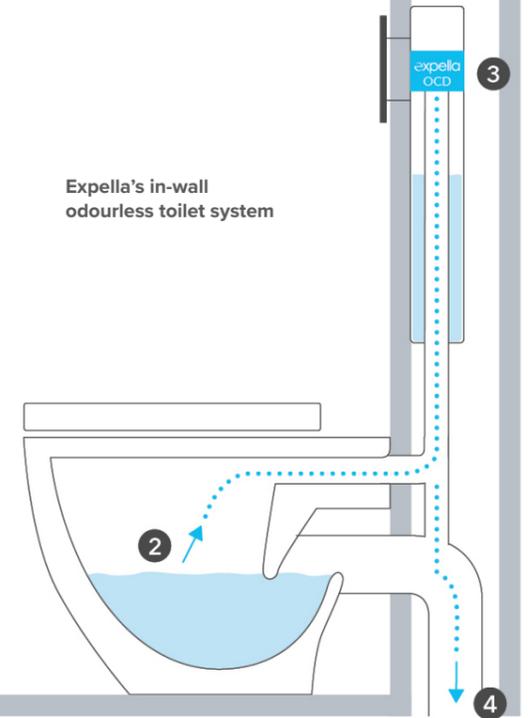

How The Odour Control System Works

- 1 Expella's patented¹ Odour Control Device (OCD) is hidden inside the cistern, it is activated by either a:
 - Light switch²
 - Manual switch²
 - Automatic sensor switch.²
- 2 The OCD contains an in-built extraction fan that draws odours from the bowl through the overflow pipe.
- 3 Odours pass through the OCD, opening a non return valve that prevents odours returning.
- 4 Odours are discharged to the sewer.

Designed for better bathroom comfort and a healthier bathroom sanctuary

INTEGRATED ODOUR CONTROL TECHNOLOGY — UP TO 99.7% EFFECTIVE AT REMOVING ODOURS

Removing toilet smells at the source is proven to be more efficient than conventional bathroom ventilation.

Milu Odourless toilets have undergone extensive research and testing by a range of independent experts and assessors, including The University of New South Wales' Hydraulics Lab and Odour Emissions Lab, who assessed the device as being up to 99.7% effective at removing odours.

ANTIBACTERIAL NANO-GLAZE FINISH

An antibacterial nano-glaze finish is applied directly to the surface of all Milu Odourless toilet ceramics during firing. This has the following benefits:

- The surface layer repels dry particles, water, oil and dirt
- The ceramic is made scratch resistant whilst improving hardness
- The toilet surface is more resistant to bacteria.

HYGIENIC RIMLESS DESIGN WITH A POWERFUL AND EFFICIENT DUAL FLUSH SYSTEM

All Milu Odourless toilets have a hygienic rimless toilet pan with a direct flush technique that results in a more powerful flush and superior washing of the pan.

As the name suggests, a rimless design is quite simply a toilet without a rim, meaning there are no crevices for germs, bacteria, limescale and mould to accumulate. This results in a more hygienic toilet that is quicker and easier to clean.

Milu's direct flush technique evenly distributes water around the entire pan so that it is washed to a high standard with every flush. The powerful yet efficient dual flush system and carries a WELS 4 Star Rating, using only 4.5 or 3.0 litres per flush.

With Milu's rimless design the water enters the pan from the very top, evenly but with power so that the entire surface of the pan is washed during flushing.

Available for In-wall models only. See page 11-13 for more information

Flush plates

Minimal profiles with premium finishes

MILU ODOURLESS SLIM FLUSH PLATES

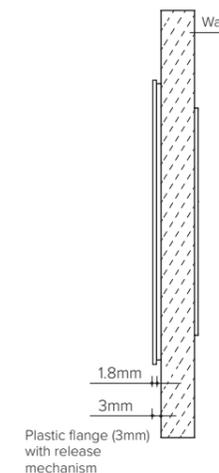

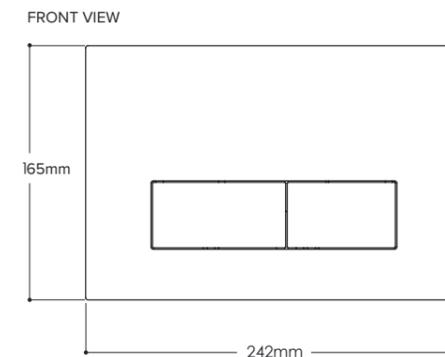

The Slim Collection of flush plates for Milu Odourless toilets have been designed and engineered to integrate seamlessly into any bathroom. Crafted and assembled in Australia by Expella, these slim plates are just 2mm thick and have a unique fixing mechanism allowing the face plate to be removed easily without the need for any tools. Manufactured from high quality materials, the flush plates come in a range of sophisticated and premium finishes.

Features

- Premium low profile aesthetic
- Constructed from brushed stainless steel (Marine grade 316)
- Concealed fixing
- Matte painted finish using oven baked enamel for easy cleaning and durability
- Selected PVD finishes to match popular brass, copper and gold tapware

Installation

- The Slim flush plate is positioned with a powdercoated steel frame that resides in the wall cavity. The frame can be easily positioned to suit varying cavity depths so that the flush plate always sits flush against the wall.
- The flush plate is supplied with a plastic flange with release mechanism which creates a 3mm gap between the wall and plate when installed.

PIR Smart Motion sensor

Smart PIR Motion Sensor that automatically activate Milu's odour control system so odours are eliminated no matter what.

EXPELLA PIR MOTION SENSOR (12V)

PIR motion sensor (12V)

\$126 RRP
Code: 8060

Recommend to purchase for your Odourless Toilet to run at full capacity

Features

- Automatically activates Milu's odour control system when motion is detected.
- Once motion is detected within range, the Odour Control System is activated and remains on while motion is present. When motion is no longer present the fan runs for 4 minutes before turning off.
- Sensor field of view has been designed to function within a small space to isolate the operating zone and minimise false triggers.

Installation *Installed by an qualified electrician*

- Designed for installation on the ceiling above the toilet (70mm circular ceiling cut-out)
- 2mm DC plug and socket for easy connection

Odourless In-wall Cisterns

Designed with the award winning inbuilt ventilation system for the Milu Mod or Crest Toilet Pans.

CONCEALED ODOURLESS CISTERN FOR FLOOR MOUNT PAN

In-wall cistern for floor mount pan
\$870 RRP
Code: 8053C

Features

- The concealed cistern comes with Expella's patented inbuilt ventilation system
- Adjustable fixing brackets to simplify installation
- Universal elbow (trap)
- Universal cistern design compatible

Installation

- To be installed by a registered Plumber
- The cistern fits between standard studs at 600mm centres and is 555mm wide

CONCEALED ODOURLESS CISTERN FOR WALL HUNG PAN

Support frame for in-wall wall hung pan and cistern
\$1165 RRP
Code: 8049C

Features

- Designed and manufactured by Expella for the Australian market
- The Support Frame is designed to support and secure the pan to the wall, elevating the pan off the floor and giving the bathroom a sense of space and opulence
- Compact, rigid and easy to handle

Installation

- The Support Frame makes installing the Concealed Odourless Cistern easy
- The frame fits between at 600mm centers and is 555mm wide
