## BRUSHED / MOLATA

SURFACE / SUPERFICIE

Brushing is a special way of working the ceramic surface to produce a slight but continuous glossy effect which evenly underlines the material's structure. Brushed surfaces evoke the attraction of lived-in materials and underline the product's aesthetic features, the depth of colour and the realism of details in various different graphic designs. Used to cover floors and walls, brushed materials are particularly recommended for use in residential spaces, but can also set off the design of commercial and public spaces with medium traffic intensity.

La molatura è una particolare lavorazione della superficie ceramica in grado di produrre un leggero ma continuo effetto lucido che asseconda in maniera uniforme la struttura del materiale. Le superfici molate evocano il fascino della materia vissuta ed esaltano l'estetica del prodotto, la profondità dei colori e il realismo dei dettagli delle diverse grafiche. Impiegati nel rivestimento di pavimenti e pareti, i prodotti molati sono particolarmente indicati negli spazi residenziali, ma possono arricchire anche il design degli spazi commerciali e pubblici a traffico medio.

## NATURAL / NATURALE

SURFACE / SUPERFICIE

The natural finish captures the original essence of the material and underlines its aesthetic qualities, such as colouring, veins and textures. Resistant and versatile, the natural surface finish is recommended for use on floors and walls in residential, commercial and public high traffic areas.

La finitura naturale permette di cogliere l'originale essenza materica del prodotto esaltandone le qualità estetiche, incluse le colorazioni e le eventuali venature e texture. Resistente e versatile, questa superficie è indicata per la posa a pavimento e a parete negli spazi residenziali, commerciali e pubblici ad alto traffico.
