STATE OF CLAD®

The authority for beautiful cladding.

Designing façades is the frontier of the future, where technology and high performance is combined with aesthetics and functionality. The focus in construction and manufacturing has now shifted to *what can be achieved?*

State of Clad is the home of carefully curated, design driven lightweight cladding systems within the NZ Brick Distributors LP stable of brands. We are the exclusive distributor of Cemintel Territory™, Cemintel Surround™ and Cemintel Barestone™ for the New Zealand architectural, construction and design communities. As our journey of innovation has just started, we continue to source beautiful cladding from our international partners, CSR and Brickworks, just for you.

Happy designing
State of Clad Team

*Fibre cement products are made
from natural ingredients. Ground
Sand (Silica), Cement, Air, Water,
Cellulose/Polyester Fibre, Additives
e.g. sealers. Fibre cement does not
contain magnesium chloride (salt).*

Fibre Cement Cladding Systems

—

The Fibre Cement Cladding products available exclusively in New Zealand through State of Clad are: Cemintel Territory, Cemintel Surround and Cemintel Barestone, each with their unique installation system. Cemintel® is part of the Australian owned icon, CSR Limited, manufacturing and supplying cement panels and building systems used for external façades, internal linings, ceilings and flooring which are suitable for use in commercial and residential applications.

Fibre cement products are becoming more popular in building due to a number of properties of the material:

• Durability
• Impact resistance
• Fire resistance
• Moisture resistance

In addition to these material properties, fibre cement products provide significant design flexibility.

• Material Choice. With many different profiles, thicknesses, sizes, colours and textures available; they can be mixed and matched to produce amazing and beautiful buildings.

• Durable and low maintenance. Fibre cement products are dimensionally stable, especially when compared to timber. They also hold colour very well, so they don't need frequent repainting, which can happen with some other products such as timber and render products. Prefinished options are also available.

• Increased speed of construction & easy to install. Fibre cement products and systems can increase speed of construction through fewer trades being required, and scaffold hire reduction. This can assist reaching lockup stage sooner.

—

Cemintel Territory™

—

Cemintel Territory prefinished panels are cement bonded, fibrous wood particle cladding that are pressed with a surface texture and colour.

Cemintel Territory is a natural cladding range that comes from Japanese values of simplicity, nature and quality. It is a building block to your home style.

The prefinished cladding panels simulate materials like stone, timber, concrete, metal, tiles and smooth render in a sophisticated way to enhance building façades without the ongoing maintenance requirements.

Panels are factory quality controlled, and the system has Codemark accreditation under Certificate of Conformity GM-CM30041.

Cemintel Territory - Quarry Urban Grey

Cemintel Territory™

—

Projects

Clockwise from top left: Woodlands Smoked, Quarry Concrete, Woodlands Limed, Woodlands Smoked & Quarry Urban Grey, Woodlands Teak, Quarry Concrete, Woodlands Teak
Product Specification

Panel Width	470mm (overall width)
	455mm (coverage)
Panel Length	3030mm
Panel Thickness	16mm
Panel Mass (EMC)	17.9-21.8kg/m2 (based on dry weight)

As Territory is a prefinished, manufactured product, images may vary from the actual product in regard to colour and surface finish. Panels should be inspected by the builder/installer prior to installation to ensure they meet aesthetic requirements.

Provenance

—

Manufactured in Japan by Nichiha to JIS A 5422* (Fibre Reinforced Cement Sidings).

System

—

The simple, concealed clip fixing system goes together like Meccano once the starter strip is installed. The system provides a ventilated cavity to keep your building dry. The system has a choice of simple aluminium or colour matched, preformed corners to suit your desired aesthetic.

Orientation

—

Cemintel Territory panels can be installed in either a horizontal or vertical orientation.

Finish

—

Prefinished using a durable, multi-layer paint process. Nichiguard® stain resistant and self cleaning coating is available on all panels. Additional Platinum Coating technology protects against UV damage and colour fade.

Suitability

—

Internal and external, commercial and residential.
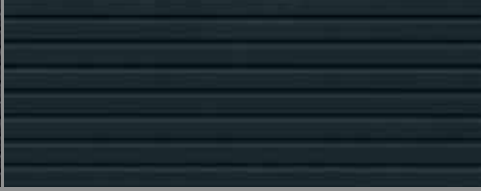

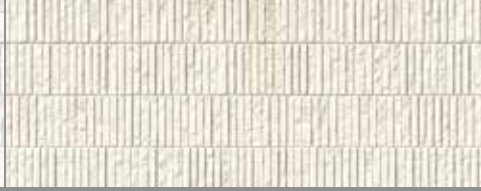

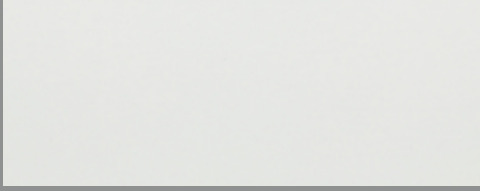

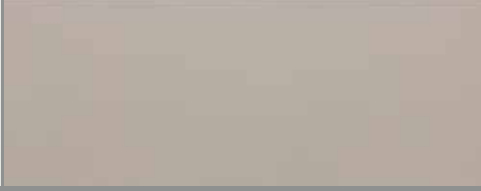

Availability

—

Stocked and indent, identified on the colour palette page.

As Territory is a prefinished, manufactured product, images may vary from the actual product in regard to colour and surface finish.
Panels should be inspected by the builder/installer prior to installation to ensure they meet aesthetic requirements.

Cemintel Surround™

—

Cemintel Surround prefinished fibre cement panels are factory quality controlled, prefinished and ready to be installed. A primary palette of five 'ISH' neutral colours in three discrete patterns and a secondary palette of 16 colours, enabling the creation of endless patterns and designs.

Pigments are added to the body of the panel to produce different base colours, which is where the term 'colour bodied' is derived. Each colour is designed as a standalone, but one that works exceptionally well with different materials and textures.

Cemintel Surround - Greyish

Cemintel Surround™

—

Projects

Product Specification

Panel Width	1200mm
Panel Length	3000mm
Panel Thickness	8mm colour bodied
Panel Mass (EMC)	15.7kg/m2 (based on dry weight)

As Surround is a prefinished, manufactured product, images may vary from the actual product in regard to colour and surface finish. Panels should be inspected by the builder/installer prior to installation to ensure they meet aesthetic requirements.

Provenance

—

Manufactured in Austria.

System

—

Aluminium rail system. Colour matched rivets accommodate the differential movement between the building structure and the façade. They also provide a more seamless aesthetic. Only one rivet type is used for both gliding and fixing points, making panel installation uncomplicated.

Orientation

—

Cemintel Surround panels can be installed in either a horizontal or vertical orientation. They can also be installed on angles giving the most design flexibility.

Finish

—

Each panel has a final sealant coating applied that will better withstand weathering over time, as well as environmental factors like pollution and microclimatic conditions, such as mould/algae.

Suitability

—

Internal and external, commercial and residential.

Availability

—

Indent. Please contact us for lead times.

As Surround is a prefinished, manufactured product, images may vary from the actual product in regard to colour and surface finish. Panels should be inspected by the builder/installer prior to installation to ensure they meet aesthetic requirements.

Cemintel Barestone™

—

Cemintel Barestone is the original raw concrete look.
Sophisticated and contemporary, because it is prefinished,
it is low maintenance and doesn't need painting.

Cemintel Barestone can be used in diverse ways and cut to
different shapes and sizes for dramatic design effect.
