

Southland Maple Beech Koru Wall Lining

Southland Maple Beech Koru Wall lining is a contemporary, stylish wall lining profile for residential and commercial lining applications. The Koru profile has a distinctive negative detail and is intended for installation in a vertical application however it can also be used in horizontal applications.

The Koru Wall lining is available in a range of widths and thicknesses which enables a variety of installation patterns to satisfy numerous designs. Koru Wall lining can be installed as fixed width, random width and random width random depth.

The beauty of Southland Maple Beech Koru Wall lining is intertwined with the history of Southern New Zealand, it is the only New Zealand native hardwood that is available with internationally recognised FSC certification, and it is manufactured locally. It is destined to become the wall lining of choice for discerning architects, specifiers and interior designers.
