## VERSATILE STRUCTURE

The strength, durability and attractive look of a Streamline carport allows the structure to be used for additional cover solutions. The simple, clutter free design also make them a popular cover option for walkways or entertainment patio areas.

## BUILT TOUGH. BUILT TO LAST.

The strength of a Streamline carport is in PurlinDek® roofing steel. The PurlinDek profile made from premium quality steel provides the durability and longevity to suit NZ conditions. Our carports are fully engineered to meet NZ codes.

## ATTRACTIVE LOOK & FEEL

Streamline carports attractive, clean and clutter free design make them a popular choice for many home owners. With the strength of the PurlinDek® roofing these carports have a clearspan that requires NO extra framing - only the roof, fascia, gutters and posts!

## COST-EFFECTIVE SOLUTION

The amount of steel used is kept to a minimum with Streamlines PurlinDek® profile - No extra cost for additional framing to create strength. Streamline carports are supplied in kitset form allowing for cost-effective transportation.

# A superior carport with strength & durability with PURLINDEK®

**PurlinDek® is a cold rolled metal profile with a 6 metre load-bearing span capability, designed for use as a long span roofing. The strength of PurlinDek's patented profile means less purlins, fixings and labour are required for the construction, resulting in time and cost savings!**

With almost five decades in the New Zealand market, the PurlinDek® high rib profile is a proven performer for large commercial and industrial buildings. Where wide coverage and large spans is an essential part of the structure, PurlinDek® is ideal with it's 6 metre load-bearing span capability.

purlins or sub-framing. PurlinDek also has outstanding eave overhang credentials. It can extend up to 1.8m, unsupported from the roof purlins in a 0.75 BMT.

The trapezoidal profile & shape provides incredible strength across long sections, and delivers greater water carrying capacity, and superior weather performance across a range of applications. It complies with current code requirements for loading without

Available in a range of our popular colour or Zinc finishes throughout New Zealand, in 0.4 or 0.75mm base metal thicknesses. PurlinDek® can be supplied with all the necessary fasteners and accessories. Translucent sheeting options also available in the PurlinDek® profile.
