Specifications Of The Elevators

*Our elevators will
come along with the
standardized package*

e-Power

In the event of a power failure, e-Power runs the elevator to the nearest floor for passengers to evacuate safely.

e-Call

During lift fault, the e-Touch system will start emergency calling interface automatically. The passenger can choose the preset calling for help.

self-Rescue

Once a major system malfunction occurs, the system will reboot and shut down the power supply. The elevator car will park to the lowest floor, and open the car via mechanical means.

Service Package

We provide sustainable support and services, our own team will stand by 24/7, and each of our elevators will along with a 5-year warranty max.

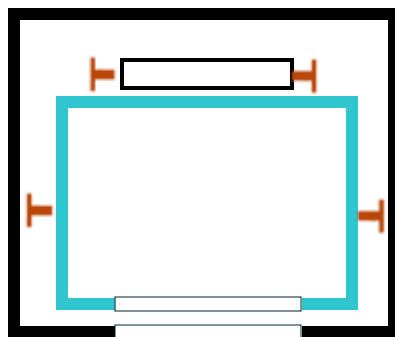

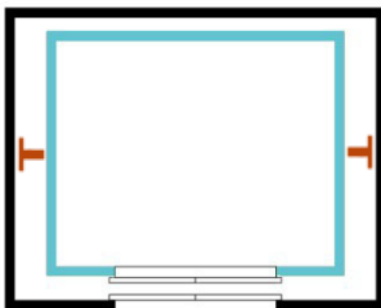

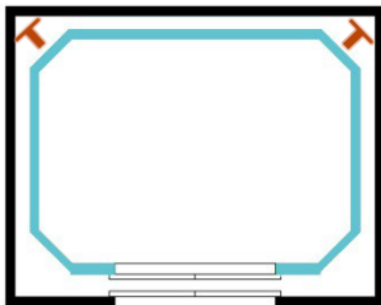

HOW DOES
IT LOOK

*TRANS Elevator
make life better!*

3

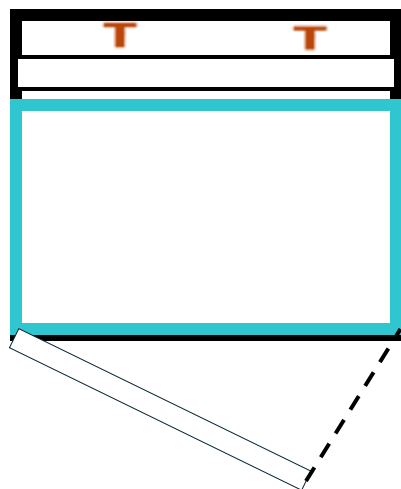

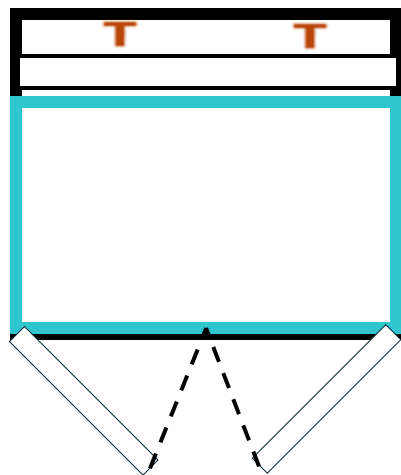

TRANS E Series offers a diverse range of cabin and drive system configurations, adaptable to a wide variety of shaft dimensions.

With hundreds of customizable interior design combinations—including the lighting, the wall, the floor, the landing doors, and control panel styles—it seamlessly integrates with any architectural or decorative concept.

*TRANS Elevator
make life better!*

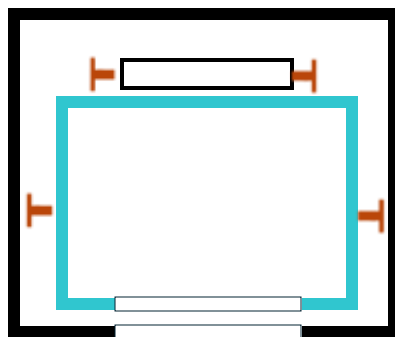

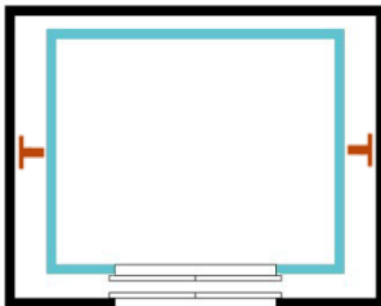

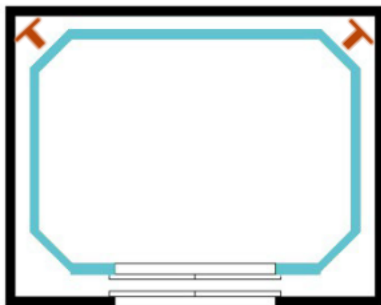

TRANS G Series is using the platform and traction drive technology, which considers the limited space of shaft space in the residential scenario.

The design gives a high utilization ratio, also comes with hundreds of customizable interior design combinations—including the lighting, the wall, the floor, and control panel styles—it seamlessly integrates with any architectural or decorative concept.

*TRANS Elevator
make life better!*
