
Vertica Cladding

Specifications

Why Choose Vertica Cladding?

SUSTAINABLE

New Zealand-Grown Radiata Clearwood

Graded precisely, removing defects for superior appearance and performance.

FSC® Certified

FSC® is dedicated to the promotion of responsible forest management worldwide.

STABLE

Quarter Sawn

Carefully selected timber with vertical grain for improved stability and appearance.

DURABLE

MCA Treatment

Vertica Cladding is treated with Koppers MicroPro® MCA timber preservative. MicroPro® technology is the first and only treated wood process to be certified under Scientific Certification Systems Environmentally Preferable Product (EPP) program based on Life-Cycle Assessment.

Hazard Class 4 (H4)

Treated to H4 (above standard of H3.2) for peace of mind.

BANDSAWN FINISH

Bandsawn finish to provide an attractive appearance and improve coating performance.

FACTORY OILED

Factory oiled on both faces with a quality penetrating oil to protect the timber and reduce onsite application costs.

Cost-effective without compromise.

Genia Vertica Cladding has been developed specifically with the New Zealand environment in mind.

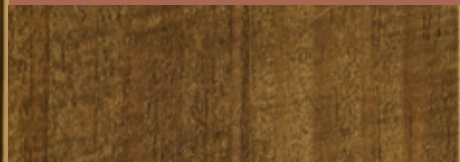

A cost-effective and responsible system, using FSC® certified, locally grown Radiata clearwood.

Innovative treatment and timber selection gives Genia Vertica Cladding an edge.

Why Genia?

Locally Owned. Locally Sourced

Genia is proudly New Zealand owned and operated. We manufacture right here in Aotearoa and source Vertica from trusted local sawmills who share our commitment to quality. It's a product shaped by our environment, and by the values that have guided our business for generations.

Vertica: Consistent, Considered, Architectural

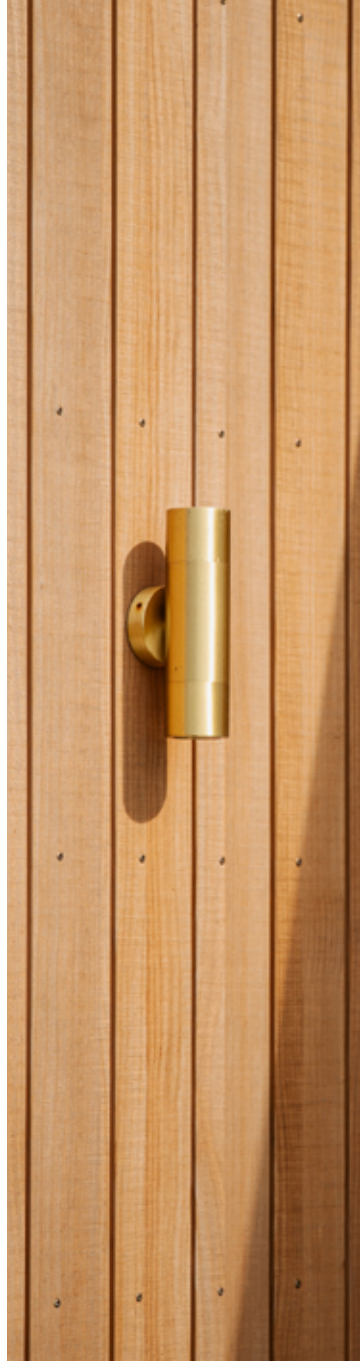

Vertica is carefully produced to meet the demands of design-focused projects. Each board is selected for clarity and consistency, providing a clean, natural finish that brings warmth and structure to modern exteriors. It's timber that speaks with confidence – subtle, refined, and ready to perform.

Crafted with Timber Expertise

Genia stands at the forefront of New Zealand's timber industry, shaped by decades of skill, knowledge, and innovation. Our team is united by a passion for purposeful, high-performing timber solutions – designed to elevate architectural spaces with clarity, character, and craftsmanship.

Built Around the Way You Work

From efficient set lengths that reduce waste to reliable lead times and easy service, Vertica is designed to keep your project moving. We make it straightforward to specify and supply, so your focus stays on delivery, not logistics.
