HEATING PILLOWS

The Warmset **Heating Pillow** is the ideal system to ensure high levels of **comfort** for the faithful during ecclesiastical celebrations.

Thanks **to the innovative heating system** patented by Warmset, its **reduced thickness** and the **care of the fabrics** and seams, the cushion combines **technology, comfort** and **design**.

Within a few minutes of being turned on, connected to any electrical outlet and consuming only 150 W/sqm, the Warmset pillow gives its user a pleasant **sensation of well-being** throughout the body.

Each pillow is connected to an internal temperature probe that allows you to regulate the radiation temperature of the cushion itself, preventing overheating.

The **100% Italian design** structure allows for a beautiful and functional product that offers the necessary well-being to the faithful.

FEATURES AND DIMENSIONS

HEATING PILLOWS

Physical characteristics

The Warmset Heating Pillow is a heating pillow suitable for warming and comforting the body, available in **2 red fabric ranges**: Danae and Fashion - both flame retardant.

It is a **multilayer system** inside which there is the Warmset heating technology spread over a 5 cm layer of wadding. On the outside we find the fabric and a **non-slip PVC** in the lower part.

Technical features

MODEL	DIMENSIONS	POWER
MADE TO MEASURE	Max 150 X 400 CM	150 W/m2

The Warmset Heating Pillow is usually made in dimensions of 35 cm wide for a variable length based on the needs of the user. From each cushion comes out a 5 pole cable thanks to which you can manage, in addition to the power supply also the internal temperature.

The heating technology inside is the soul of the entire pillow and thanks to its **patented geometry** it allows for excellent heat diffusion across the entire surface.
