the best for your guest

# History

## **Quality, style and experience at the table.**

Sambonet has represented Italian excellence in silver and stainless steel Cutlery and holloware production since 1856. From the most classic styles to experiments with the latest designs, Sambonet has won numerous prestigious international awards, including the Compasso D'Oro ADI, Red Dot and GOOD Design Award. Sambonet perfectly combines tradition and innovation, safeguarding quality and carefully crafted details.

## **Qualità, stile ed esperienza in tavola.**

A partire dal 1856 Sambonet rappresenta l'eccellenza italiana nella produzione di posateria e vasellame in acciaio inox e in acciaio argentato. Dai modelli più classici alle sperimentazioni contemporanee di design, insignite dei più importanti riconoscimenti internazionali come Compasso D'Oro ADI, Red Dot e GOOD Design Award, Sambonet sposa tradizione e innovazione, salvaguardando qualità e cura artigianale dei particolari.

## **Qualität, sti und erfahrung zu tisch.**

Seit 1856 steht Sambonet für italienische Exzellenz bei der Herstellung von Besteck und Geschirr aus Edelstahl und versilbertem Stahl. Von den mehr klassischen Modellen hin zu den zeitgenössischen Designentwürfen, prämiert mit den wichtigsten internationalen Auszeichnungen wie Compasso D'Oro ADI, Red Dot und GOOD Design Award, verbindet Sambonet Tradition und Innovation und bewahrt dabei die Qualität und die handwerkliche Fertigung der Details.

# Silverplating

## **Precious, elegant and timeless.**

The purity of the silver combined with the certified quality of steel and German silver are the base of Sambonet's silver production excellence. In respect to traditional silverplating, the exclusive H&P Hard Sambonet Silverplating technique ensures greater durability and resistance to the tarnishing of the product's silver coating. Each Sambonet silver product has its origins in stainless steel AISI 304 or alpaca silver, made 66% of copper, 13% of nickel and 21% of zinc and enriched with 999.5% pure silver.

## **Prezioso, elegante e senza tempo.**

La purezza assoluta dell'argento, assieme ai requisiti certificati dell'acciaio e dell'alpacca, sono alla base della qualità della produzione Sambonet. Rispetto all'argentatura tradizionale, l'esclusiva tecnica H&P Hard Sambonet Silverplating conferisce maggior durezza e resistenza alla solforazione del rivestimento argentato. Ogni produzione argentata Sambonet trae origine da posate in acciaio inox AISI 304 o in Alpacca, lega costituita da rame al 66%, nickel al 13% e zinco al 21%, e viene impreziosita con argento puro al 999,5%.

## **Wertvoll, elegant und zeitlos.**

Die absolute Reinheit des Silbers, zusammen mit den bescheinigten Eigenschaften des Stahls und des Alpakas bilden die Grundlage für die Qualität der Produktion Sambonet. Gemessen an der traditionellen Versilberung verleiht die exklusive Technik H&P Hard Sambonet Silverplating der Schwefelung des Silberüberzugs größere Härte und Widerstandsfähigkeit. Bei jeder versilberten Produktion von Sambonet besteht der Kern des Bestecks aus Edelstahl AISI 304 oder aus Alpaka, einer Legierung aus 66 % Kupfer, 13 % Nickel und 21 % Zink, und wird mit reinem Silber zu 999,5 % veredelt.

# PVD Physical Vapour Deposition

## **Precious shades.**

The **PVD** process – **Physical Vapour Deposition** – is a special treatment that gives the objects made of stainless-steel precious colours and trendy nuances. The coating is atomically welded to stainless steel, giving it great hardness and resistance. This is an exclusive process that Sambonet carries out internally and on which it focuses numerous resources in terms of research and development, using a cutting-edge technology.

## **Sfumature preziose.**

Il processo **PVD** – **Physical Vapour Deposition** – è uno speciale trattamento che conferisce agli oggetti in acciaio pregiate colorazioni e sfumature di tendenza. Il rivestimento si salda a livello atomico all'acciaio inox, dotandolo inoltre di maggiore durezza e resistenza. Si tratta di un esclusivo processo che Sambonet realizza internamente e per il quale concentra numerose risorse in termini di ricerca e sviluppo, impiegando tecnologie all'avanguardia.

## **Wertvolle Nuancen.**

Das **PVD**-Verfahren – **Physical Vapour Deposition** – ist eine spezielle Veredelungstechnik, die Edelstahlobjekten kostbare Farben und trendige Nuancen verleiht. Die Beschichtung wird dabei atomar mit dem Edelstahl verschweißt, was dem Material eine besondere Härte und Widerstandsfähigkeit verleiht. Das PVD Verfahren wurde mit großem Aufwand in den Bereichen Forschung und Entwicklung und unter Anwendung von Spitzentechnologie in der Produktion exklusiv von Sambonet entwickelt.

## Finishing

The market trends of the last years focused their attention on the decorative landscape, both in design and hospitality sector. Sambonet, as a key player in the market, has developed new processing techniques and enriched its flatware collections with precious finishes, in order to offer a widest range of choice and customization possibilities. Diamond, Vintage, Antique and PVD are just some of the possibilities that, thanks to the latest generation machines and organization's know-how, can generate exclusive product lines.

L'attenzione alla dimensione decorativa, cui il mercato del design e dell'ospitalità dedica ampio spazio, coincide con lo sviluppo da parte di Sambonet di nuove tecniche da applicare alle sue collezioni. Il brand arricchisce costantemente così la sua gamma di posateria con preziose finiture per offrire la più ampia possibilità di scelta.

Diamond, Vintage, Antique e PVD sono solo alcune delle opzioni che, tramite sofisticati macchinari di ultimissima generazione e il know-how dell'azienda, possono dar vita ad esclusive linee personalizzate.

Der Trend auf dem Markt geht hin zu dekorativer Vielfalt, sowohl im Design- wie auch im Gastronomiesektor. Marktführer Sambonet hat deshalb neue Verarbeitungstechniken entwickelt und seine Kollektionen um wertvolle Veredelungen bereichert. Diamant, Vintage, Antik und PVD sind nur einige der Möglichkeiten, die dank hochmoderner Maschinen und dem Know-how des Unternehmens exklusive Produktlinien schaffen. Damit wird die Auswahl an Bestecken noch größer und individueller.
