Hanex[®] Collection

Hanex is an acrylic solid surface material that is resistant to stains and chemicals and can be molded in a variety of designs with unique combinations of acrylic resin and natural materials.

It pursues flexible and scalable designs that can be applied to various spaces such as kitchens, hotels, healthcare and transportation, increasing the completeness of the space.

Inspired by
the Splendor of Nature

Benefits of Hanex[®]

Hanex Solid Surface is an acrylic solid surface material which is composed of Methyl Methacrylate (MMA) and Poly Methyl Methacrylate (PMMA) resin filled with Alumina-Trihydrate and other specialized formula to give it a timeless beauty and quality.

Seamless Design

Sheets can be bonded together with inconspicuous seams. Smooth integration allows large areas without joins.

Non-Porous

Unlike Natural stones such as granite and marble which are porous and require sealing, Hanex is naturally non-porous meaning it can block liquids and air without ever requiring a sealant.

Recyclable

Hanex is an eco-friendly material, as it is renewable and can be used again in its production process.

Zero Silica

Hanex contains zero silica, therefore no risk of silica exposure. A safe product with no first-class carcinogen radon detected.

Translucent

Various thickness of Hanex exhibit a special translucency when exposed to light.

Anti-Bacterial

Hanex is capable of withstanding the spread of other harmful germs and bacteria.

Thermoform

Sheets can be thermoformed to create curves and shapes of any design.

Safety Data Sheet

Hanex has various colors and patterns and is made of the same materials throughout all layers.

Hanex can be processed in limitless forms which are not possible with laminate and natural stone.

Fire-Fighting Measures & Explosion

- **Flammable Properties**
"HANEX" can be combusted only with difficulty.
Hazardous gases/vapor produced in fire are carbon monoxide, methyl methacrylate, aldehydes.
- **Extinguishing Media**
Water, Dry chemical, CO2
- **Fire Fighting Instructions**
Keep personnel removed and upwind of fire.
Wear self-contained breathing apparatus.

Accidental Release Measures

- **Safeguard (Personnel)**
NOTE : Review FIRE FIGHTING MEASURES and HANDLING (PERSONNEL) sections before proceeding with clean-up.
Use appropriate PERSONAL PROTECTIVE during clean up.
- **Spill Clean Up**
Recover undamaged and minimally contaminated material for reuse and reclamation.

Handling And Storage

- **Handling**
Avoid breathing fumes generated during sawing, routing or drilling. Avoid dust generation.
- **Storage**
Store in a cool place.

Exposure Controls & Personal Protection

- **Engineering Controls (Ventilation)**
Use ventilation that is adequate to keep employee exposure to airborne concentration below exposure limits.
- **Personal Protection**
Protective equipment: EYE/FACE PROTECTION
Wear safety glasses during operations such as sawing, sanding, drilling or routing.

Disposal Consideration

Dispose in accordance with federal, state and local regulation.
The owner of the material is responsible for proper waste disposal.

Other Information

The data in this Material Safety Data Sheet relates only to the specific material designated herein and does not relate to use in combination with any other material or in any process

Responsibility for MSDS : "HANEX" products

Certification

Hanex is highly regarded in the environment-friendly materials market with various environmental related certifications such as NSF, Greenguard, and SCS.
